Description:
Application for renewal of Air Title V permit.

By acceptance of this permit, the permittee agrees that the permit is contingent upon strict compliance with the ECL, all applicable regulations, the General Conditions specified and any Special Conditions included as part of this permit.

Permit Administrator: ROGER EVANS
NYSDEC - REGION 1 SUNY @ STONY BROOK
50 CIRCLE RD
STONY BROOK, NY 11790-3409

Authorized Signature: _________________________________ Date: ___ / ___ / _____
Notification of Other State Permittee Obligations

Item A: Permittee Accepts Legal Responsibility and Agrees to Indemnification

The permittee expressly agrees to indemnify and hold harmless the Department of Environmental Conservation of the State of New York, its representatives, employees and agents ("DEC") for all claims, suits, actions, and damages, to the extent attributable to the permittee's acts or omissions in connection with the compliance permittee's undertaking of activities in connection with, or operation and maintenance of, the facility or facilities authorized by the permit whether in compliance or not in any compliance with the terms and conditions of the permit. This indemnification does not extend to any claims, suits, actions, or damages to the extent attributable to DEC's own negligent or intentional acts or omissions, or to any claims, suits, or actions naming the DEC and arising under article 78 of the New York Civil Practice Laws and Rules or any citizen suit or civil rights provision under federal or state laws.

Item B: Permittee's Contractors to Comply with Permit

The permittee is responsible for informing its independent contractors, employees, agents and assigns of their responsibility to comply with this permit, including all special conditions while acting as the permittee's agent with respect to the permitted activities, and such persons shall be subject to the same sanctions for violations of the Environmental Conservation Law as those prescribed for the permittee.

Item C: Permittee Responsible for Obtaining Other Required Permits

The permittee is responsible for obtaining any other permits, approvals, lands, easements and rights-of-way that may be required to carry out the activities that are authorized by this permit.

Item D: No Right to Trespass or Interfere with Riparian Rights

This permit does not convey to the permittee any right to trespass upon the lands or interfere with the riparian rights of others in order to perform the permitted work nor does it authorize the impairment of any rights, title, or interest in real or personal property held or vested in a person not a party to the permit.

DEC GENERAL CONDITIONS
**** General Provisions ****
For the purpose of your Title V permit, the following section contains state-only enforceable terms and conditions.
GENERAL CONDITIONS - Apply to ALL Authorized Permits.

Condition 1: Facility Inspection by the Department
Applicable State Requirement: ECL 19-0305

Item 1.1:
The permitted site or facility, including relevant records, is subject to inspection at reasonable hours and intervals by an authorized representative of the Department of Environmental Conservation (the Department) to determine whether the permittee is complying with this permit and the ECL. Such representative may order the work suspended pursuant to ECL 71-0301 and SAPA 401(3).

Item 1.2:
The permittee shall provide a person to accompany the Department’s representative during an inspection to the permit area when requested by the Department.

Item 1.3:
A copy of this permit, including all referenced maps, drawings and special conditions, must be available for inspection by the Department at all times at the project site or facility. Failure to produce a copy of the permit upon request by a Department representative is a violation of this permit.

Condition 2: Relationship of this Permit to Other Department Orders and Determinations
Applicable State Requirement: ECL 3-0301 (2) (m)

Item 2.1:
Unless expressly provided for by the Department, issuance of this permit does not modify, supersede or rescind any order or determination previously issued by the Department or any of the terms, conditions or requirements contained in such order or determination.

Condition 3: Applications for permit renewals, modifications and transfers
Applicable State Requirement: 6 NYCRR 621.11

Item 3.1:
The permittee must submit a separate written application to the Department for renewal, modification or transfer of this permit. Such application must include any forms or supplemental information the Department requires. Any renewal, modification or transfer granted by the Department must be in writing.

Item 3.2:
The permittee must submit a renewal application at least 180 days before expiration of permits for Title V Facility Permits, or at least 30 days before expiration of permits for State Facility Permits.

Item 3.3:
Permits are transferrable with the approval of the department unless specifically prohibited by
the statute, regulation or another permit condition. Applications for permit transfer should be submitted prior to actual transfer of ownership.

Condition 4: Permit modifications, suspensions or revocations by the Department

Applicable State Requirement: 6 NYCRR 621.13

Item 4.1:
The Department reserves the right to exercise all available authority to modify, suspend, or revoke this permit in accordance with 6NYCRR Part 621. The grounds for modification, suspension or revocation include:

a) materially false or inaccurate statements in the permit application or supporting papers;
b) failure by the permittee to comply with any terms or conditions of the permit;
c) exceeding the scope of the project as described in the permit application;
d) newly discovered material information or a material change in environmental conditions, relevant technology or applicable law or regulations since the issuance of the existing permit;
e) noncompliance with previously issued permit conditions, orders of the commissioner, any provisions of the Environmental Conservation Law or regulations of the Department related to the permitted activity.

**** Facility Level ****

Condition 5: Submission of application for permit modification or renewal - REGION 1

HEADQUARTERS

Applicable State Requirement: 6 NYCRR 621.6 (a)

Item 5.1:
Applications for permit modification or renewal are to be submitted to:

NYSDEC Regional Permit Administrator
Region 1 Headquarters
Division of Environmental Permits
Stony Brook University
50 Circle Road
Stony Brook, NY 11790-3409

NOTIFICATION OF GENERAL PERMITTEE OBLIGATIONS
The items listed below are not subject to the annual compliance certification requirements under Title V. Permittees may also have other obligations under regulations of general applicability.

Item A: Emergency Defense - 6 NYCRR 201-1.5

An emergency, as defined by subpart 201-2, constitutes an affirmative defense to penalties sought in an enforcement action brought by the Department for noncompliance with emissions limitations or permit conditions for all facilities in New York State.

(a) The affirmative defense of emergency shall be demonstrated through properly signed, contemporaneous operating logs, or other relevant evidence that:

(1) An emergency occurred and that the facility owner or operator can identify the cause(s) of the emergency;
(2) The equipment at the permitted facility causing the emergency was at the time being properly operated and maintained;
(3) During the period of the emergency the facility owner or operator took all reasonable steps to minimize levels of emissions that exceeded the emission standards, or other requirements in the permit; and
(4) The facility owner or operator notified the Department within two working days after the event occurred. This notice must contain a description of the emergency, any steps taken to mitigate emissions, and corrective actions taken.

(b) In any enforcement proceeding, the facility owner or operator seeking to establish the occurrence of an emergency has the burden of proof.

(c) This provision is in addition to any emergency or upset provision contained in any applicable requirement.

Item B: Public Access to Recordkeeping for Title V Facilities - 6 NYCRR 201-1.10 (b)
The Department will make available to the public any permit application, compliance plan, permit, and monitoring and compliance certification report pursuant to Section 503(e) of the Act, except for information entitled to confidential treatment pursuant to 6 NYCRR Part 616 - Public Access to records and Section 114(c) of the Act.
Item C: Timely Application for the Renewal of Title V Permits - 6 NYCRR 201-6.2 (a) (4)
Owners and/or operators of facilities having an issued Title V permit shall submit a complete application at least 180 days, but not more than eighteen months, prior to the date of permit expiration for permit renewal purposes.

Item D: Certification by a Responsible Official - 6 NYCRR 201-6.2 (d) (12)
Any application, form, report or compliance certification required to be submitted pursuant to the federally enforceable portions of this permit shall contain a certification of truth, accuracy and completeness by a responsible official. This certification shall state that based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.

Item E: Requirement to Comply With All Conditions - 6 NYCRR 201-6.4 (a) (2)
The permittee must comply with all conditions of the Title V facility permit. Any permit non-compliance constitutes a violation of the Act and is grounds for enforcement action; for permit termination, revocation and reissuance, or modification; or for denial of a permit renewal application.

Item F: Permit Revocation, Modification, Reopening, Reissuance or Termination, and Associated Information Submission Requirements - 6 NYCRR 201-6.4 (a) (3)
This permit may be modified, revoked, reopened and reissued, or terminated for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any permit condition.

Item G: Cessation or Reduction of Permitted Activity Not a Defense - 6 NYCRR 201-6.4 (a) (5)
It shall not be a defense for a permittee in an enforcement action to claim that a cessation or reduction in the permitted activity would have been necessary in order to maintain compliance with the conditions of this permit.

Item H: Property Rights - 6 NYCRR 201-6.4 (a) (6)
This permit does not convey any property rights of any sort or any exclusive privilege.
Item I: Severability - 6 NYCRR 201-6.4 (a) (9)

If any provisions, parts or conditions of this permit are found to be invalid or are the subject of a challenge, the remainder of this permit shall continue to be valid.

Item J: Permit Shield - 6 NYCRR 201-6.4 (g)

All permittees granted a Title V facility permit shall be covered under the protection of a permit shield, except as provided under 6 NYCRR Subpart 201-6. Compliance with the conditions of the permit shall be deemed compliance with any applicable requirements as of the date of permit issuance, provided that such applicable requirements are included and are specifically identified in the permit, or the Department, in acting on the permit application or revision, determines in writing that other requirements specifically identified are not applicable to the major stationary source, and the permit includes the determination or a concise summary thereof. Nothing herein shall preclude the Department from revising or revoking the permit pursuant to 6 NYCRR Part 621 or from exercising its summary abatement authority. Nothing in this permit shall alter or affect the following:

i. The ability of the Department to seek to bring suit on behalf of the State of New York, or the Administrator to seek to bring suit on behalf of the United States, to immediately restrain any person causing or contributing to pollution presenting an imminent and substantial endangerment to public health, welfare or the environment to stop the emission of air pollutants causing or contributing to such pollution;

ii. The liability of a permittee of the Title V facility for any violation of applicable requirements prior to or at the time of permit issuance;

iii. The applicable requirements of Title IV of the Act;

iv. The ability of the Department or the Administrator to obtain information from the permittee concerning the ability to enter, inspect and monitor the facility.

Item K: Reopening for Cause - 6 NYCRR 201-6.4 (i)

This Title V permit shall be reopened and revised under any of the following circumstances:

i. If additional applicable requirements under the Act become applicable where this permit's remaining term is
three or more years, a reopening shall be completed not later than 18 months after promulgation of the applicable requirement. No such reopening is required if the effective date of the requirement is later than the date on which this permit is due to expire, unless the original permit or any of its terms and conditions has been extended by the Department pursuant to the provisions of Part 201-6.7 and Part 621.

ii. The Department or the Administrator determines that the permit contains a material mistake or that inaccurate statements were made in establishing the emissions standards or other terms or conditions of the permit.

iii. The Department or the Administrator determines that the Title V permit must be revised or reopened to assure compliance with applicable requirements.

iv. If the permitted facility is an "affected source" subject to the requirements of Title IV of the Act, and additional requirements (including excess emissions requirements) become applicable. Upon approval by the Administrator, excess emissions offset plans shall be deemed to be incorporated into the permit.

Proceedings to reopen and issue Title V facility permits shall follow the same procedures as apply to initial permit issuance but shall affect only those parts of the permit for which cause to reopen exists.

Reopenings shall not be initiated before a notice of such intent is provided to the facility by the Department at least thirty days in advance of the date that the permit is to be reopened, except that the Department may provide a shorter time period in the case of an emergency.

**Item L: Permit Exclusion - ECL 19-0305**
The issuance of this permit by the Department and the receipt thereof by the Applicant does not and shall not be construed as barring, diminishing, adjudicating or in any way affecting any legal, administrative or equitable rights or claims, actions, suits, causes of action or demands whatsoever that the Department may have against the Applicant for violations based on facts and circumstances alleged to have occurred or existed prior to the effective date of this permit, including, but not limited to, any enforcement action authorized pursuant to the provisions of applicable federal law, the Environmental Conservation Law of the State of New York (ECL) and Chapter III of the Official Compilation of the Codes, Rules and Regulations of the State of New York.
(NYCRR). The issuance of this permit also shall not in any way affect pending or future enforcement actions under the Clean Air Act brought by the United States or any person.

**Item M: Federally Enforceable Requirements - 40 CFR 70.6 (b)**

All terms and conditions in this permit required by the Act or any applicable requirement, including any provisions designed to limit a facility's potential to emit, are enforceable by the Administrator and citizens under the Act. The Department has, in this permit, specifically designated any terms and conditions that are not required under the Act or under any of its applicable requirements as being enforceable under only state regulations.

**MANDATORY FEDERALLY ENFORCEABLE PERMIT CONDITIONS SUBJECT TO ANNUAL CERTIFICATIONS AT ALL TIMES**

The following federally enforceable permit conditions are mandatory for all Title V permits and are subject to annual compliance certification requirements at all times.

**Condition 1: Acceptable Ambient Air Quality**

**Effective between the dates of 01/07/2015 and 01/06/2020**

**Applicable Federal Requirement:** 6 NYCRR 200.6

**Item 1.1:** Notwithstanding the provisions of 6 NYCRR Chapter III, Subchapter A, no person shall allow or permit any air contamination source to emit air contaminants in quantities which alone or in combination with emissions from other air contamination sources would contravene any applicable ambient air quality standard and/or cause air pollution. In such cases where contravention occurs or may occur, the Commissioner shall specify the degree and/or method of emission control required.

**Condition 2: Acceptable Ambient Air Quality**

**Effective between the dates of 01/07/2015 and 01/06/2020**

**Applicable Federal Requirement:** 6 NYCRR 200.6

**Item 2.1:** The provisions of 6NYCRR Part 200.6 apply to this facility.

**Condition 3: Fees**

**Effective between the dates of 01/07/2015 and 01/06/2020**

**Applicable Federal Requirement:** 6 NYCRR 201-6.4 (a) (7)

**Item 3.1:**
The owner and/or operator of a stationary source shall pay fees to the Department consistent with the fee schedule authorized by ECL 72-0303.

**Condition 4: Recordkeeping and Reporting of Compliance Monitoring**  
Effective between the dates of 01/07/2015 and 01/06/2020

**Applicable Federal Requirement:** 6 NYCRR 201-6.4 (c)

**Item 4.1:**  
The following information must be included in any required compliance monitoring records and reports:

(i) The date, place, and time of sampling or measurements;

(ii) The date(s) analyses were performed;

(iii) The company or entity that performed the analyses;

(iv) The analytical techniques or methods used including quality assurance and quality control procedures if required;

(v) The results of such analyses including quality assurance data where required; and

(vi) The operating conditions as existing at the time of sampling or measurement.

Any deviation from permit requirements must be clearly identified in all records and reports. Reports must be certified by a responsible official, consistent with Section 201-6.2 of Part 201.

**Condition 5: Records of Monitoring, Sampling, and Measurement**  
Effective between the dates of 01/07/2015 and 01/06/2020

**Applicable Federal Requirement:** 6 NYCRR 201-6.4 (c) (2)

**Item 5.1:**  
Compliance monitoring and recordkeeping shall be conducted according to the terms and conditions contained in this permit and shall follow all quality assurance requirements found in applicable regulations. Records of all monitoring data and support information must be retained for a period of at least 5 years from the date of the monitoring, sampling, measurement, report, or application. Support information includes all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by the permit.

**Condition 6: Compliance Certification**  
Effective between the dates of 01/07/2015 and 01/06/2020

**Applicable Federal Requirement:** 6 NYCRR 201-6.4 (c) (3) (ii)

**Item 6.1:**  
The Compliance Certification activity will be performed for the Facility.
Item 6.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
To meet the requirements of this facility permit with respect to reporting, the permittee must:

Submit reports of any required monitoring at a minimum frequency of every 6 months, based on a calendar year reporting schedule. These reports shall be submitted to the Department within 30 days after the end of a reporting period. All instances of deviations from permit requirements must be clearly identified in such reports. All required reports must be certified by the responsible official for this facility.

Notify the Department and report permit deviations and incidences of noncompliance stating the probable cause of such deviations, and any corrective actions or preventive measures taken. Where the underlying applicable requirement contains a definition of prompt or otherwise specifies a time frame for reporting deviations, that definition or time frame shall govern. Where the underlying applicable requirement fails to address the time frame for reporting deviations, reports of deviations shall be submitted to the permitting authority based on the following schedule:

(1) For emissions of a hazardous air pollutant (as identified in an applicable regulation) that continue for more than an hour in excess of permit requirements, the report must be made within 24 hours of the occurrence.

(2) For emissions of any regulated air pollutant, excluding those listed in paragraph (1) of this section, that continue for more than two hours in excess of permit requirements, the report must be made within 48 hours.

(3) For all other deviations from permit requirements, the report shall be contained in the 6 month monitoring report required above.

(4) This permit may contain a more stringent reporting requirement than required by paragraphs (1), (2) or (3) above. If more stringent reporting requirements have been placed in this permit or exist in applicable requirements that apply to this facility, the more stringent reporting requirement shall apply.
If above paragraphs (1) or (2) are met, the source must notify the permitting authority by telephone during normal business hours at the Regional Office of jurisdiction for this permit, attention Regional Air Pollution Control Engineer (RAPCE) according to the timetable listed in paragraphs (1) and (2) of this section. For deviations and incidences that must be reported outside of normal business hours, on weekends, or holidays, the DEC Spill Hotline phone number at 1-800-457-7362 shall be used. A written notice, certified by a responsible official consistent with 6 NYCRR Part 201-6.2(d)(12), must be submitted within 10 working days of an occurrence for deviations reported under (1) and (2). All deviations reported under paragraphs (1) and (2) of this section must also be identified in the 6 month monitoring report required above.

The provisions of 6 NYCRR 201-1.4 shall apply if the permittee seeks to have a violation excused unless otherwise limited by regulation. In order to have a violation of a federal regulation (such as a new source performance standard or national emissions standard for hazardous air pollutants) excused, the specific federal regulation must provide for an affirmative defense during start-up, shutdowns, malfunctions or upsets. Notwithstanding any recordkeeping and reporting requirements in 6 NYCRR 201-1.4, reports of any deviations shall not be on a less frequent basis than the reporting periods described in paragraphs (1) and (4) above.

In the case of any condition contained in this permit with a reporting requirement of "Upon request by regulatory agency" the permittee shall include in the semiannual report, a statement for each such condition that the monitoring or recordkeeping was performed as required or requested and a listing of all instances of deviations from these requirements.

In the case of any emission testing performed during the previous six month reporting period, either due to a request by the Department, EPA, or a regulatory requirement, the permittee shall include in the semiannual report a summary of the testing results and shall indicate whether or not the Department or EPA has approved the results.

All semiannual reports may be submitted electronically or physically. Electronic reports shall be submitted using the Department’s Air Compliance and Emissions Electronic-Reporting system (ACE). If the facility owner or operator elects to send physical copies instead, two copies shall be sent to the Department (one copy to the
regional air pollution control engineer (RAPCE) in the regional office and one copy to the Bureau of Quality Assurance (BQA) in the DEC central office) and one copy shall be sent to the Administrator (or his or her representative). Mailing addresses for the above referenced persons are contained in the monitoring condition for 6 NYCRR Part 201-6.4(e), contained elsewhere in this permit.

Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2015.
Subsequent reports are due every 6 calendar month(s).

Condition 7: Compliance Certification
Effective between the dates of 01/07/2015 and 01/06/2020

Applicable Federal Requirement: 6 NYCRR 201-6.4 (e)

Item 7.1:
The Compliance Certification activity will be performed for the Facility.

Item 7.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
Requirements for compliance certifications with terms and conditions contained in this facility permit include the following:

i. Compliance certifications shall contain:
- the identification of each term or condition of the permit that is the basis of the certification;
- the compliance status;
- whether compliance was continuous or intermittent;
- the method(s) used for determining the compliance status of the facility, currently and over the reporting period consistent with the monitoring and related recordkeeping and reporting requirements of this permit;
- such other facts as the Department may require to determine the compliance status of the facility as specified in any special permit terms or conditions; and
- such additional requirements as may be specified elsewhere in this permit related to compliance certification.

ii. The responsible official must include in the annual certification report all terms and conditions contained in this permit which are identified as being subject to certification, including emission limitations, standards,
or work practices. That is, the provisions labeled herein as "Compliance Certification" are not the only provisions of this permit for which an annual certification is required.

iii. Compliance certifications shall be submitted annually. Certification reports are due 30 days after the anniversary date of four consecutive calendar quarters. The first report is due 30 days after the calendar quarter that occurs just prior to the permit anniversary date, unless another quarter has been acceptable by the Department.

iv. All annual compliance certifications may be submitted electronically or physically. Electronic reports shall be submitted using the Department’s Air Compliance and Emissions Electronic-Reporting system (ACE). If the facility owner or operator elects to send physical copies instead, two copies shall be sent to the Department (one copy to the regional air pollution control engineer (RAPCE) in the regional office and one copy to the Bureau of Quality Assurance (BQA) in the DEC central office) and one copy shall be sent to the Administrator (or his or her representative). The mailing addresses for the above referenced persons are:

Chief – Stationary Source Compliance Section
USEPA Region 2
Air Compliance Branch
290 Broadway
New York, NY 10007-1866

The address for the RAPCE is as follows:

Regional Air Pollution Control Engineer
NYSDEC- Region 1 Headquarters
Stony Brook University
50 Circle Road
Stony Brook, NY 11790-3409

The address for the BQA is as follows:

NYSDEC
Bureau of Quality Assurance
625 Broadway
Albany, NY 12233-3258

Monitoring Frequency: ANNUALLY
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2016.
Subsequent reports are due on the same day each year
Condition 8: Compliance Certification
Effective between the dates of 01/07/2015 and 01/06/2020

Applicable Federal Requirement: 6 NYCRR 202-2.1

Item 8.1:
The Compliance Certification activity will be performed for the Facility.

Item 8.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
Emission statements shall be submitted on or before April 15th each year for emissions of the previous calendar year.

Monitoring Frequency: ANNUALLY
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due by April 15th for previous calendar year

Condition 9: Recordkeeping requirements
Effective between the dates of 01/07/2015 and 01/06/2020

Applicable Federal Requirement: 6 NYCRR 202-2.5

Item 9.1:
(a) The following records shall be maintained for at least five years:

   (1) a copy of each emission statement submitted to the department; and

   (2) records indicating how the information submitted in the emission statement was determined, including any calculations, data, measurements, and estimates used.

(b) These records shall be made available at the facility to the representatives of the department upon request during normal business hours.

Condition 10: Open Fires - Prohibitions
Effective between the dates of 01/07/2015 and 01/06/2020

Applicable Federal Requirement: 6 NYCRR 215.2

Item 10.1:
Except as allowed by Title 6 NYCRR Section 215.3, no person shall burn, cause, suffer, allow or permit the burning of any materials in an open fire.

Item 10.2
Per Section 215.3, burning in an open fire, provided it is not contrary to other law or regulation, will be allowed as follows:
(a) On-site burning in any town with a total population less than 20,000 of downed limbs and branches (including branches with attached leaves or needles) less than six inches in diameter.
and eight feet in length between May 15th and the following March 15th. For the purposes of this subdivision, the total population of a town shall include the population of any village or portion thereof located within the town. However, this subdivision shall not be construed to allow burning within any village.

(b) Barbecue grills, maple sugar arches and similar outdoor cooking devices when actually used for cooking or processing food.

(c) Small fires used for cooking and camp fires provided that only charcoal or untreated wood is used as fuel and the fire is not left unattended until extinguished.

(d) On-site burning of agricultural wastes as part of a valid agricultural operation on contiguous agricultural lands larger than five acres actively devoted to agricultural or horticultural use, provided such waste is actually grown or generated on those lands and such waste is capable of being fully burned within a 24-hour period.

(e) The use of liquid petroleum fueled smudge pots to prevent frost damage to crops.

(f) Ceremonial or celebratory bonfires where not otherwise prohibited by law, provided that only untreated wood or other agricultural products are used as fuel and the fire is not left unattended until extinguished.

(g) Small fires that are used to dispose of a flag or religious item, and small fires or other smoke producing process where not otherwise prohibited by law that are used in connection with a religious ceremony.

(h) Burning on an emergency basis of explosive or other dangerous or contraband materials by police or other public safety organization.

(i) Prescribed burns performed according to Part 194 of this Title.

(j) Fire training, including firefighting, fire rescue, and fire/arson investigation training, performed under applicable rules and guidelines of the New York State Department of State's Office of Fire Prevention and Control. For fire training performed on acquired structures, the structures must be emptied and stripped of any material that is toxic, hazardous or likely to emit toxic smoke (such as asbestos, asphalt shingles and vinyl siding or other vinyl products) prior to burning and must be at least 300 feet from other occupied structures. No more than one structure per lot or within a 300 foot radius (whichever is bigger) may be burned in a training exercise.

(k) Individual open fires as approved by the Director of the Division of Air Resources as may be required in response to an outbreak of a plant or animal disease upon request by the commissioner of the Department of Agriculture and Markets, or for the destruction of invasive plant and insect species.

(l) Individual open fires that are otherwise authorized under the environmental conservation law, or by rule or regulation of the Department.

MANDATORY FEDERALLY ENFORCEABLE PERMIT CONDITIONS SUBJECT TO ANNUAL CERTIFICATIONS ONLY IF APPLICABLE

The following federally enforceable permit conditions are mandatory for all Title V permits and are subject to annual compliance certification requirements only if effectuated during the reporting period.

[NOTE: The corresponding annual compliance certification for those conditions not effectuated during the reporting period shall be specified as "not applicable".]

Condition 11: Maintenance of Equipment
Effective between the dates of 01/07/2015 and 01/06/2020

Applicable Federal Requirement: 6 NYCRR 200.7
Item 11.1:  
Any person who owns or operates an air contamination source which is equipped with an emission control device shall operate such device and keep it in a satisfactory state of maintenance and repair in accordance with ordinary and necessary practices, standards and procedures, inclusive of manufacturer's specifications, required to operate such device effectively.

Condition 12: Recycling and Salvage  
Effective between the dates of 01/07/2015 and 01/06/2020  
Applicable Federal Requirement: 6 NYCRR 201-1.7

Item 12.1:  
Where practical, the owner or operator of an air contamination source shall recycle or salvage air contaminants collected in an air cleaning device according to the requirements of the ECL.

Condition 13: Prohibition of Reintroduction of Collected Contaminants to the air  
Effective between the dates of 01/07/2015 and 01/06/2020  
Applicable Federal Requirement: 6 NYCRR 201-1.8

Item 13.1:  
No person shall unnecessarily remove, handle or cause to be handled, collected air contaminants from an air cleaning device for recycling, salvage or disposal in a manner that would reintroduce them to the outdoor atmosphere.

Condition 14: Exempt Sources - Proof of Eligibility  
Effective between the dates of 01/07/2015 and 01/06/2020  
Applicable Federal Requirement: 6 NYCRR 201-3.2 (a)

Item 14.1:  
The owner or operator of an emission source or activity that is listed as being exempt may be required to certify that it is operated within the specific criteria described in this Subpart. The owner or operator of any such emission source or activity must maintain all records necessary for demonstrating compliance with this Subpart on-site for a period of five years, and make them available to representatives of the department upon request.

Condition 15: Trivial Sources - Proof of Eligibility  
Effective between the dates of 01/07/2015 and 01/06/2020  
Applicable Federal Requirement: 6 NYCRR 201-3.3 (a)

Item 15.1:  
The owner or operator of an emission source or activity that is listed as being trivial in this Section may be required to certify that it is operated within the specific criteria described in this Subpart. The owner or operator of any such emission source or activity must maintain all required records on-site for a period of five years and make them available to representatives of the department upon request.
Condition 16:  Requirement to Provide Information  
Effective between the dates of 01/07/2015 and 01/06/2020  

Applicable Federal Requirement: 6 NYCRR 201-6.4 (a) (4)

Item 16.1:  
The owner and/or operator shall furnish to the department, within a reasonable time, any information that the department may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating the permit or to determine compliance with the permit. Upon request, the permittee shall also furnish to the department copies of records required to be kept by the permit or, for information claimed to be confidential, the permittee may furnish such records directly to the administrator along with a claim of confidentiality, if the administrator initiated the request for information or otherwise has need of it.

Condition 17:  Right to Inspect  
Effective between the dates of 01/07/2015 and 01/06/2020  

Applicable Federal Requirement: 6 NYCRR 201-6.4 (a) (8)

Item 17.1:  
The department or an authorized representative shall be allowed upon presentation of credentials and other documents as may be required by law to:

(i) enter upon the permittee's premises where a facility subject to the permitting requirements of this Subpart is located or emissions-related activity is conducted, or where records must be kept under the conditions of the permit;

(ii) have access to and copy, at reasonable times, any records that must be kept under the conditions of the permit;

(iii) inspect at reasonable times any emission sources, equipment (including monitoring and air pollution control equipment), practices, and operations regulated or required under the permit; and

(iv) sample or monitor at reasonable times substances or parameters for the purpose of assuring compliance with the permit or applicable requirements.

Condition 18:  Off Permit Changes  
Effective between the dates of 01/07/2015 and 01/06/2020  

Applicable Federal Requirement: 6 NYCRR 201-6.4 (f) (6)

Item 18.1:  
No permit revision will be required for operating changes that contravene an express permit term, provided that such changes would not violate applicable requirements as defined under this Part or contravene federally enforceable monitoring (including test methods), recordkeeping, reporting, or compliance certification permit terms and conditions. Such changes may be made without requiring a permit revision, if the changes are not modifications under any provision of title I of the act and the changes do not exceed the emissions allowable under the permit.
(whether expressed therein as a rate of emissions or in terms of total emissions) provided that the facility provides the administrator and the department with written notification as required below in advance of the proposed changes within a minimum of seven days. The facility owner or operator, and the department shall attach each such notice to their copy of the relevant permit.

(i) For each such change, the written notification required above shall include a brief description of the change within the permitted facility, the date on which the change will occur, any change in emissions, and any permit term or condition that is no longer applicable as a result of the change.

(ii) The permit shield described in section 6 NYCRR 201-6.4 shall not apply to any change made pursuant to this paragraph.

**Condition 19: Required Emissions Tests**
Effective between the dates of 01/07/2015 and 01/06/2020

**Applicable Federal Requirement:** 6 NYCRR 202-1.1

**Item 19.1:** For the purpose of ascertaining compliance or non-compliance with any air pollution control code, rule or regulation, the commissioner may require the person who owns such air contamination source to submit an acceptable report of measured emissions within a stated time.

**Condition 20: Accidental release provisions.**
Effective between the dates of 01/07/2015 and 01/06/2020

**Applicable Federal Requirement:** 40 CFR Part 68

**Item 20.1:** If a chemical is listed in Tables 1, 2, 3 or 4 of 40 CFR §68.130 is present in a process in quantities greater than the threshold quantity listed in Tables 1, 2, 3 or 4, the following requirements will apply:

a) The owner or operator shall comply with the provisions of 40 CFR Part 68 and;

b) The owner or operator shall submit at the time of permit issuance (if not previously submitted) one of the following, if such quantities are present:

1) A compliance schedule for meeting the requirements of 40 CFR Part 68 by the date provided in 40 CFR §68.10(a) or,

2) A certification statement that the source is in compliance with all requirements of 40 CFR Part 68, including the registration and submission of the Risk Management Plan. Information should be submitted to:

Risk Management Plan Reporting Center
C/O CSC
8400 Corporate Dr
Carrollton, Md. 20785
Effective between the dates of 01/07/2015 and 01/06/2020

Applicable Federal Requirement: 40 CFR Part 68

Item 21.1:
If a chemical is listed in Tables 1, 2, 3 or 4 of 40 CFR §68.130 is present in a process in quantities greater than the threshold quantity listed in Tables 1, 2, 3 or 4, the following requirements will apply:

a) The owner or operator shall comply with the provisions of 40 CFR Part 68 and;

b) The owner or operator shall submit at the time of permit issuance (if not previously submitted) one of the following, if such quantities are present:

1) A compliance schedule for meeting the requirements of 40 CFR Part 68 by the date provided in 40 CFR §68.10(a) or,

2) A certification statement that the source is in compliance with all requirements of 40 CFR Part 68, including the registration and submission of the Risk Management Plan. Information should be submitted to:

Risk Management Plan Reporting Center
C/O CSC
8400 Corporate Dr
Carrollton, Md. 20785

Condition 22: Recycling and Emissions Reduction  
Effective between the dates of 01/07/2015 and 01/06/2020

Applicable Federal Requirement: 40 CFR 82, Subpart F

Item 22.1:
The permittee shall comply with all applicable provisions of 40 CFR Part 82.

The following conditions are subject to annual compliance certification requirements for Title V permits only.

Condition 23: False statement  
Effective between the dates of 01/07/2015 and 01/06/2020

Applicable Federal Requirement: 6 NYCRR 200.3

Item 23.1:
No person shall make a false statement in connection with applications, plans, specifications and/or reports submitted pursuant to this Subchapter.

Condition 24: Emission Unit Definition
Air Pollution Control Permit Conditions

Effective between the dates of 01/07/2015 and 01/06/2020

Applicable Federal Requirement: 6 NYCRR Subpart 201-6

Item 24.1:
The facility is authorized to perform regulated processes under this permit for:

Emission Unit: 1-MBMWC

Emission Unit Description:

Emission unit consists of a municipal waste combustor/boiler with a nominal design capacity of 375 tons per day. The combustor is a mass burn waterwall design that utilizes a martin stoker technology. The combustor exhausts through a separate flue in a stack common to the second combustor/boiler. Air pollution control equipment at the Babylon Resource Recovery Facility (BRRF) includes dry scrubbers for acid gas control, a selective non-catalytic reduction (SNCR) process using urea based reagents to control nitrogen oxides, activated carbon injection for mercury control, fabric filters for particulate removal and good combustion practices. The BRRF employs a continuous emission monitoring system (CEMS) that provides continuous feedback on the efficiencies of the air pollution control (APC) equipment. The BRRF Title V permit establishes certified emission reduction credits (ERC) for past emission reductions which are the result of over-controlling for nitrogen oxide (NOx) emissions from the two existing municipal waste combustor units. The NOx emissions will be limited to 245 tons per year, with a daily 24 hour block average of 150 ppm by volume (dry, corrected to 7% oxygen). The amount of ERCs created via the over-controlling for NOx emission is 141 tons. The Title V permit includes the adoption of PAH/PCB testing to follow the testing for dioxin/furan testing (i.e. testing of one unit per year on a rotating basis per 40 CFR 60.38b) and the processing of the ash leachate from the adjacent Babylon monofill to be injected into the spray dry adsorber at a maximum rate of 1300 gallons per hour.

Building(s): 1

Item 24.2:
The facility is authorized to perform regulated processes under this permit for:

Emission Unit: 2-MBMWC

Emission Unit Description:

Emission unit consists of a municipal waste combustor/boiler with a nominal design capacity of 375 tons per day. The combustor is a mass burn waterwall design that utilizes a martin stoker technology. The combustor exhausts through a separate flue in a stack common to the second combustor/boiler. Air pollution control equipment at the Babylon Resource Recovery...
Facility (BRRF) includes dry scrubbers for acid gas control, a selective non-catalytic reduction (SNCR) process using urea based reagents to control nitrogen oxides, activated carbon injection for mercury control, fabric filters for particulate removal and good combustion practices. The BRRF employs a continuous emission monitoring system (CEMS) that provides continuous feedback on the efficiencies of the air pollution control (APC) equipment. The BRRF modification of the existing Title V permit establishes certified emission reduction credits (ERC) for past emission reductions which are the result of over-controlling for nitrogen oxide (NOx) emissions from the two existing municipal waste combustor units. The NOx emissions will be limited to 245 tons per year, with a daily 24 hour block average of 150 ppm by volume (dry, corrected to 7% oxygen). The amount of ERCs to be created via the over-controlling for NOx emission will be 141 tons. The modification includes the adoption of PAH/PCB testing to follow the testing for dioxin/furan testing (i.e. testing of one unit per year on a rotating basis per 40 CFR 60.38b) and the processing of the ash leachate from the adjacent Babylon monofill to be injected into the spray dry adsorber at a maximum rate of 1300 gallons per hour.

Building(s): 1

Condition 25: Progress Reports Due Semiannually
Effective between the dates of 01/07/2015 and 01/06/2020

Applicable Federal Requirement: 6 NYCRR 201-6.4 (d) (4)

Item 25.1:
Progress reports consistent with an applicable schedule of compliance are to be submitted at least semiannually, or at a more frequent period if specified in the applicable requirement or by the department. Such progress reports shall contain the following:

(i) dates for achieving the activities, milestones, or compliance required in the schedule of compliance, and dates when such activities, milestones or compliance were achieved; and

(ii) an explanation of why any dates in the schedule of compliance were not or will not be met, and any preventive or corrective measures adopted.

Condition 26: Facility Permissible Emissions
Effective between the dates of 01/07/2015 and 01/06/2020

Applicable Federal Requirement: 6 NYCRR 201-7.1 (a)

Item 26.1:
The sum of emissions from the emission units specified in this permit shall not equal or exceed the following
Potential To Emit (PTE) rate for each regulated contaminant:

CAS No: 0NY210-00-0  PTE: 490,000  pounds per year
Name: OXIDES OF NITROGEN

Condition 27:  Capping Monitoring Condition
Effective between the dates of 01/07/2015 and 01/06/2020

Applicable Federal Requirement: 6 NYCRR 201-7.1 (a)

Item 27.1:
Under the authority of 6 NYCRR Part 201-7, this condition contains an emission cap for the purpose of limiting emissions from the facility, emission unit or process to avoid being subject to the following applicable requirement(s) that the facility, emission unit or process would otherwise be subject to:

6 NYCRR 231-2.6

Item 27.2:
Operation of this facility shall take place in accordance with the approved criteria, emission limits, terms, conditions and standards in this permit.

Item 27.3:
The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or law.

Item 27.4:
On an annual basis, unless otherwise specified below, beginning one year after the granting of an emissions cap, the responsible official shall provide a certification to the Department that the facility has operated all emission units within the limits imposed by the emission cap. This certification shall include a brief summary of the emissions subject to the cap for that time period and a comparison to the threshold levels that would require compliance with an applicable requirement.

Item 27.5:
The emission of pollutants that exceed the applicability thresholds for an applicable requirement, for which the facility has obtained an emissions cap, constitutes a violation of Part 201 and of the Act.

Item 27.6:
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

Emission Unit: 1-MBMWC

Emission Unit: 2-MBMWC

Regulated Contaminant(s):
Item 27.7:
Compliance Certification shall include the following monitoring:

Capping: Yes
Monitoring Type: CONTINUOUS EMISSION MONITORING (CEM)
Monitoring Description: Annual OXIDES OF NITROGEN (NOx) Limit.

The Babylon Resource Recovery Facility has established 141 tons of NOx emission reduction credits by overcontrolling NOx emissions from the two existing municipal waste combustors.

The mass emission rate of NOx in pounds per hour shall be determined by the following equation, which is based on 40CFR60, Appendix A, Method 19. This equation utilizes a design heat input of 146.625 MM Btu per hour, Method 19 "F" factor for MSW and NOx conversion factor from Table 19.1:

\[ \text{NOx (lb/hr)} = (\text{NOx ppm dry corrected to 7% O2}) \times 0.2416 \]

The tons of NOx emission shall be determined by the following equation:

\[ \text{NOx (tons)} = (\text{NOx lb/hr}) \times (\text{Actual valid operating hours}) / (2000) \]

Records for demonstration of compliance with the NOx emission limit shall be maintained on site for five years. These records shall include i) mass emissions totaled over each 24-hour daily period (the total of hourly averages 12:00 midnight to the following midnight), and ii) the total mass emissions over a 365 day period beginning on August 26, 2008. Any exceedance of the allowable annual NOx emission limitation must be reported in writing to the DEC Regional office within 10 working days of the exceedance.

Annual Relative Accuracy Test Audits of mass emission rate must be performed in accordance with 40CFR60, Appendix B, Performance Specification (PS) 6.

Manufacturer Name/Model Number: California Analytical ZRE
Parameter Monitored: OXIDES OF NITROGEN
Upper Permit Limit: 245 tons per year
Reference Test Method: EPA Method 19
Monitoring Frequency: CONTINUOUS
Averaging Method: ANNUAL MAXIMUM ROLLED DAILY
Reporting Requirements: QUARTERLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 4/30/2015.
Subsequent reports are due every 3 calendar month(s).

**Condition 28:** Required Emissions Tests - Facility Level
Effective between the dates of 01/07/2015 and 01/06/2020

Applicable Federal Requirement: 6 NYCRR 202-1.1

**Item 28.1:**
An acceptable report of measured emissions shall be submitted, as required by the commissioner, to ascertain compliance or noncompliance with any air pollution code, rule, or regulation.

**Condition 29:** Acceptable procedures
Effective between the dates of 01/07/2015 and 01/06/2020

Applicable Federal Requirement: 6 NYCRR 202-1.3

**Item 29.1:**
Emission testing, sampling, and analytical determinations to ascertain compliance with this Subpart shall be conducted in accordance with test methods acceptable to the commissioner.

**Condition 30:** Acceptable procedures - Stack test report submittal
Effective between the dates of 01/07/2015 and 01/06/2020

Applicable Federal Requirement: 6 NYCRR 202-1.3

**Item 30.1:**
Emission test reports must be submitted in triplicate to the commissioner within 60 days after the completion of the tests, unless additional time is requested in writing.

**Condition 31:** Air pollution prohibited
Effective between the dates of 01/07/2015 and 01/06/2020

Applicable Federal Requirement: 6 NYCRR 211.1

**Item 31.1:**
No person shall cause or allow emissions of air contaminants to the outdoor atmosphere of such quantity, characteristic or duration which are injurious to human, plant or animal life or to property, or which unreasonably interfere with the comfortable enjoyment of life or property. Notwithstanding the existence of specific air quality standards or emission limits, this prohibition applies, but is not limited to, any particulate, fume, gas, mist, odor, smoke, vapor, pollen, toxic or deleterious emission, either alone or in combination with others.

**Condition 32:** Compliance Certification
Effective between the dates of 01/07/2015 and 01/06/2020

Applicable Federal Requirement: 6 NYCRR 219-5.4
Item 32.1:
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

- Emission Unit: 1-MBMWC Emission Point: 00003 Emission Source: 000BH
- Emission Unit: 1-MBMWC Emission Point: 00003 Emission Source: 00MWC
- Emission Unit: 1-MBMWC Emission Point: 00003 Emission Source: 00NOX
- Emission Unit: 1-MBMWC Emission Point: 00003 Emission Source: 00SDA
- Emission Unit: 1-MBMWC Emission Point: 00004 Emission Source: SHICK
- Emission Unit: 2-MBMWC Emission Point: 00004 Emission Source: 001BH
- Emission Unit: 2-MBMWC Emission Point: 00004 Emission Source: 01MWC
- Emission Unit: 2-MBMWC Emission Point: 00004 Emission Source: 01NOX
- Emission Unit: 2-MBMWC Emission Point: 00004 Emission Source: 01SDA
- Emission Unit: 2-MBMWC Emission Point: 00004 Emission Source: 1SHIC

Item 32.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:

Stack Test Frequency:
Stack tests shall be conducted at intervals specified by the Department for the following pollutants: particulates, hydrogen chloride, heavy metals (arsenic, beryllium, cadmium, chromium, lead, mercury, and nickel), polychlorinated dibenzo-p-dioxins, polychlorinated dibenzo furans, polycyclic aromatic hydrocarbons, polychlorinated biphenyls. This list may be changed as deemed necessary by the Commissioner of NYSDEC. The permittee must also comply with the testing frequencies as required by 40 CFR 60, Subpart Cb.

A protocol for the stack testing must be submitted to
NYSDEC for approval at least 90 days prior to the start of the stack test. The Department will not accept the results of any stack tests done in the absence of an approved protocol.

Compliance with sulfur dioxide, oxides of nitrogen and carbon monoxide emission limits are based on facility continuous emission monitoring system.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: ONCE / BATCH OR MONITORING OCCURRENCE

**Condition 33:** Compliance Certification
Effective between the dates of 01/07/2015 and 01/06/2020

**Applicable Federal Requirement:** 6 NYCRR 231-2.6

**Item 33.1:**
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

- **Emission Unit:** 1-MBMWC  
  **Emission Point:** 00003  
  **Emission Source:** 000BH

- **Emission Unit:** 1-MBMWC  
  **Emission Point:** 00003  
  **Emission Source:** 00MWC

- **Emission Unit:** 1-MBMWC  
  **Emission Point:** 00003  
  **Emission Source:** 00NOX

- **Emission Unit:** 1-MBMWC  
  **Emission Point:** 00003  
  **Emission Source:** 00SDA

- **Emission Unit:** 1-MBMWC  
  **Emission Point:** 00003  
  **Emission Source:** SHICK

- **Emission Unit:** 2-MBMWC  
  **Emission Point:** 00004  
  **Emission Source:** 001BH

- **Emission Unit:** 2-MBMWC  
  **Emission Point:** 00004  
  **Emission Source:** 01MWC

- **Emission Unit:** 2-MBMWC  
  **Emission Point:** 00004  
  **Emission Source:** 01NOX

- **Emission Unit:** 2-MBMWC  
  **Emission Point:** 00004  
  **Emission Source:** 01SDA

- **Emission Unit:** 2-MBMWC  
  **Emission Point:** 00004  
  **Emission Source:** 1SHIC
Regulated Contaminant(s):
   CAS No: 0NY210-00-0   OXIDES OF NITROGEN

Item 33.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: CONTINUOUS EMISSION MONITORING (CEM)
Monitoring Description:
   Oxides of nitrogen (NOx) limit for each flue of mass burn waterwall municipal waste combustor (MWC), not Utilizing a NOx emission averaging plan. This limit has been established based on a NOx emission reduction credit (ERC) application dated July 2003 and replaces the NOx limit required by 40 CFR 60.33b(d), Subpart Cb (Emission Guidelines for Existing Large MWC).

Manufacturer Name/Model Number: California Analytical ZRE
Parameter Monitored: OXIDES OF NITROGEN
Upper Permit Limit: 150  parts per million by volume (dry, corrected to 7% O2)
Reference Test Method: 40 CFR 60 App B & F
Monitoring Frequency: CONTINUOUS
Averaging Method: 24 HOUR BLOCK AVERAGE
Reporting Requirements: QUARTERLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 4/30/2015.
Subsequent reports are due every 3 calendar month(s).

Condition 34:  Compliance Certification
Effective between the dates of  01/07/2015 and 01/06/2020

Applicable Federal Requirement:40CFR 52.21(j)(2), Subpart A

Item 34.1:
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

**Item 36.2:**

Compliance Certification shall include the following monitoring:

**Monitoring Type:** MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE

**Monitoring Description:**

Discharge to the atmosphere of visible emissions of combustion ash from the ash conveying system (including conveyor transfer points) may not exceed 5 percent of the observation period (i.e. 9 minutes per 3-hour period), as determined by EPA Reference Method 22 observations. This emission limit does not cover visible emissions discharged inside buildings or enclosures of ash conveying systems; however, it does cover visible emissions discharged to the atmosphere from buildings or enclosures of ash conveying systems. This emission limit does not apply during maintenance and repair of ash conveying systems.

**Parameter Monitored:** OPACITY

**Upper Permit Limit:** 5 percent

**Reference Test Method:** EPA Ref. Method 22
Monitoring Frequency: ANNUALLY
Averaging Method: 9 MINUTES PER 3-HOUR PERIOD
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2015.
Subsequent reports are due every 6 calendar month(s).

**Condition 37: Compliance Certification**

**Effective between the dates of 01/07/2015 and 01/06/2020**

**Applicable Federal Requirement:** 40CFR 60.39b(a), NSPS Subpart Cb

**Item 37.1:**
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

- Emission Unit: 1-MBMWC  Emission Point: 00003  Emission Source: 000BH
- Emission Unit: 1-MBMWC  Emission Point: 00003  Emission Source: 00MWC
- Emission Unit: 1-MBMWC  Emission Point: 00003  Emission Source: 00NOX
- Emission Unit: 1-MBMWC  Emission Point: 00003  Emission Source: 00SDA
- Emission Unit: 1-MBMWC  Emission Point: 00003  Emission Source: SHICK
- Emission Unit: 2-MBMWC  Emission Point: 00004  Emission Source: 01BH
- Emission Unit: 2-MBMWC  Emission Point: 00004  Emission Source: 01MWC
- Emission Unit: 2-MBMWC  Emission Point: 00004  Emission Source: 01NOX
- Emission Unit: 2-MBMWC  Emission Point: 00004  Emission Source: 01SDA
- Emission Unit: 2-MBMWC  Emission Point: 00004  Emission Source: 1SHIC

**Item 37.2:**
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description: The Permittee shall comply with the reporting and
recordkeeping requirements listed in §60.59b of Subpart Eb, as applicable, excluding the siting requirements under §60.59b(a), (b)(5), and (d)(11).

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION

Reporting Requirements: SEMI-ANNUALLY (CALENDAR)  
Reports due 30 days after the reporting period.  
The initial report is due 7/30/2015.  
Subsequent reports are due every 6 calendar month(s).

**** Emission Unit Level ****

Condition 38: Emission Point Definition By Emission Unit  
Effective between the dates of 01/07/2015 and 01/06/2020

Applicable Federal Requirement: 6 NYCRR Subpart 201-6

Item 38.1:
The following emission points are included in this permit for the cited Emission Unit:

  Emission Unit: 1-MBMWC

  Emission Point: 00003  
      Height (ft.): 170  
      Diameter (in.): 57  
      NYTMN (km.): 4510.5  
      NYTME (km.): 636.243  
      Building: 1

Item 38.2:
The following emission points are included in this permit for the cited Emission Unit:

  Emission Unit: 2-MBMWC

  Emission Point: 00004  
      Height (ft.): 170  
      Diameter (in.): 57  
      NYTMN (km.): 4510.512  
      NYTME (km.): 636.237  
      Building: 1

Condition 39: Process Definition By Emission Unit  
Effective between the dates of 01/07/2015 and 01/06/2020

Applicable Federal Requirement: 6 NYCRR Subpart 201-6

Item 39.1:
This permit authorizes the following regulated processes for the cited Emission Unit:

  Emission Unit: 1-MBMWC
  Process: 1MW  
  Source Classification Code: 5-01-001-02
  Process Description:
      Municipal waste combustor rated at a 375 tpd nominal capacity processing solid waste. The base operating scenario for the Babylon Resource Recovery Facility (BRRF)
includes the combustion of solid waste as allowed in the BRRF solid waste permit contained in the facility's certificate to operate and as otherwise approved by NYSDEC. The facility is authorized to receive municipal solid waste which includes residential, commercial and governmental and/or institutional waste, the combustible portion of construction and demolition (C&D) debris, light industrial waste, treated regulated medical waste, treated and destroyed medical waste, and other non-hazardous industrial waste streams as approved by NYSDEC on a case by case basis. The authorized non-hazardous waste is hereby termed as "MSW".

BRRF will follow the procedures outlined in 40 CFR 60, Subpart Cb and 6 NYCRR Part 201-1.4 for startup, shutdown and malfunction relief.

Emission Source/Control: 000BH - Control  
Control Type: FABRIC FILTER

Emission Source/Control: 00NOX - Control  
Control Type: SELECTIVE NON-CATALYTIC REDUCTION (SNCR)

Emission Source/Control: 00SDA - Control  
Control Type: DRY SPRAY ABSORPTION

Emission Source/Control: SHICK - Control  
Control Type: ACTIVATED CARBON INJECTION

Emission Source/Control: 00MWC - Incinerator  
Design Capacity: 375 tons per day  
Waste Feed Method: CHUTE FED  
Waste Type: MUNICIPAL SOLID WASTE AND/OR SOLID WASTE

Item 39.2:  
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 1-MBMWC  
Process: 1ST  
Source Classification Code: 5-01-001-02  
Process Description:  
Municipal waste combustor firing no. 2 fuel oil during startup/shutdown and malfunction in addition to conditions while transitioning to/from MSW firing or to maintain required furnace temperatures. The Babylon Resource Recovery Facility (BRRF) uses no. 2 fuel oil as an auxiliary fuel only in its base operating scenario. Fuel oil is used during startup to warm the unit before introducing refuse into the furnace and during the transition period before the fires are fully sustained by
the refuse. Fuel oil is used as an auxiliary fuel during shutdown until refuse is burned off the grates. Auxiliary fuel is also used during periods of upset to stabilize boiler operations.

BRRF will follow the procedures outlined in 40 CFR 60, Subpart Cb and 6 NYCRR Part 201-1.4 for startup, shutdown and malfunction relief and can seek relief for additional regulated parameters from NYSDEC on a case by case basis pursuant to 6 NYCRR Part 201-1.4. In addition, the emergency defense provision of 6 NYCRR Part 201-1.5 also applies to BRRF. The following descriptions/definitions will be utilized to identify MWC operating modes.

1. Warm-up: Fuel oil is typically the fuel used during the warmup period at the BRRF. The BRRF is in the warmup stage when only fossil fuel is being fired in order to warm the unit, or to keep the unit warm, before MSW feeding has commenced.

2. Start-up: Startup is initiated at the BRRF when a boiler's feed chute damper is opened and continuous burning of MSW is commenced.

3. Continuous burning: Defines continuous burning as "the continuous, semi-continuous, or batch feeding of MSW for purposes of waste disposal, energy production, or providing heat to the combustion system in preparation for waste disposal or energy production. The use of MSW solely to provide thermal protection of the grate or hearth during the startup period shall not be considered to be continuous burning."

4. Shutdown: The shutdown period for a boiler begins when the continuous burning of MSW is ceased and the shutdown period ends when all refuse is burned off the grates. The shutdown period at the BRRF commences when the subject unit's feed chute damper is shut (this is the time at which continuous feeding is ceased). Shutdown of a unit is complete when all of the municipal solid waste is burned off the grates. The operator verifies that the shutdown is complete by visually inspecting the grates to make sure the fires are out.

5. Malfunction: 40 CFR 60.2 defines malfunction as "any sudden and unavoidable failure of air pollution control equipment or process equipment or of a process to operate in a normal or usual manner. Failures that are caused entirely or in part by poor maintenance, careless operation, or any other preventable upset condition or preventable equipment breakdown shall not be considered malfunctions." malfunction is similarly defined in 6 NYCRR
Part 201-2 as "any sudden and unavoidable failure of an air cleaning device or air contamination source to operate in compliance with all applicable parts of this chapter [6 NYCRR Part 201] and shall not include failures that are caused entirely or partially by poor maintenance, careless operation, or other preventable condition."

6. Emergency Conditions: 6 NYCRR Part 201-2(b)(12) defines emergency as "any situation arising from suddenly and reasonably unforeseeable events beyond the control of the owner and/or operator of a facility, including acts of God, which situation requires immediate corrective action to restore normal operation and which causes the emission source to exceed a technology-based requirement under the permit of state-established emission limitations, due to unavoidable increases in emissions attributable to the situation. An emergency shall not include situations caused by improperly designed equipment, lack of preventative maintenance, careless or improper operation, or operator error."

Emission Source/Control: 000BH - Control
Control Type: FABRIC FILTER

Emission Source/Control: 00NOX - Control
Control Type: SELECTIVE NON-CATALYTIC REDUCTION (SNCR)

Emission Source/Control: 00SDA - Control

Emission Source/Control: SHICK - Control
Control Type: ACTIVATED CARBON INJECTION

Emission Source/Control: 00MWC - Incinerator
Design Capacity: 375 tons per day
Waste Feed Method: CHUTE FED
Waste Type: MUNICIPAL SOLID WASTE AND/OR SOLID WASTE

Item 39.3:
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 2-MBMWC
Process: 2MW
Source Classification Code: 5-01-001-02
Process Description:
Municipal waste combustor rated at a 375 tpd nominal capacity processing solid waste. The base operating scenario for the Babylon Resource Recovery Facility (BRRF) includes the combustion of solid waste as allowed in the BRRF solid waste permit contained in the facility's

Air Pollution Control Permit Conditions
Renewal 3 Page 35 FINAL
certificate to operate and as otherwise approved by NYSDEC. The facility is authorized to receive municipal solid waste which includes residential, commercial and governmental and/or institutional waste, the combustible portion of construction and demolition (C&D) debris, light industrial waste, treated regulated medical waste, treated and destroyed medical waste, and other non-hazardous industrial waste streams as approved by NYSDEC on a case by case basis. The authorized non-hazardous waste is hereby termed as “MSW”.

BRRF will follow the procedures outlined in 40 CFR 60, Subpart Cb and 6 NYCRR Part 201-1.4 for startup, shutdown and malfunction relief.

Control Type: FABRIC FILTER

Emission Source/Control: 01NOX - Control
Control Type: SELECTIVE NON-CATALYTIC REDUCTION (SNCR)

Emission Source/Control: 01SDA - Control
Control Type: DRY SPRAY ABSORPTION

Emission Source/Control: 1SHIC - Control
Control Type: ACTIVATED CARBON INJECTION

Emission Source/Control: 01MWC - Incinerator
Design Capacity: 375 tons per day
Waste Feed Method: CHUTE FED
Waste Type: MUNICIPAL SOLID WASTE AND/OR SOLID WASTE

Item 39.4:
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 2-MBMWC
Process: 2ST
Source Classification Code: 5-01-001-02

Process Description:
Municipal waste combustor firing no. 2 fuel oil during startup/shutdown and malfunction in addition to conditions while transitioning to/from MSW firing or to maintain required furnace temperatures. The Babylon Resource Recovery Facility (BRRF) uses no. 2 fuel oil as an auxiliary fuel only in its base operating scenario. Fuel oil is used during startup to warm the unit up before introducing refuse into the furnace and during the transition period before the fires are fully sustained by the refuse. Fuel oil is used as an auxiliary fuel during shutdown until refuse is burned off the grates. Auxiliary
fuel is also used during periods of upset to stabilize boiler operation.

BRRF will follow the procedures outlined in 40 CFR 60, Subpart Cb and 6 NYCRR Part 201-1.4 for startup, shutdown and malfunction relief and can seek relief for additional regulated parameters from NYSDEC on a case by case basis pursuant to 6 NYCRR Part 201-1.4. In addition, the emergency defense provision of 6 NYCRR Part 201-1.5 also applies to BRRF. The following descriptions/definitions will be utilized to identify MWC operating modes.

1. Warm-up: Fuel oil is typically the fuel used during the warmup period at the BRRF. The BRRF is in the warmup stage when only fossil fuel is being fired in order to warm the unit, or to keep the unit warm, before MSW feeding has commenced.

2. Start-up: Startup is initiated at the BRRF when a boiler's feed chute damper is opened and continuous burning of MSW is commenced.

3. Continuous burning: Defines continuous burning as "the continuous, semi-continuous, or batch feeding of MSW for purposes of waste disposal, energy production, or providing heat to the combustion system in preparation for waste disposal or energy production. The use of MSW solely to provide thermal protection of the grate or hearth during the startup period shall not be considered to be continuous burning."

4. Shutdown: The shutdown period for a boiler begins when the continuous burning of MSW is ceased and the shutdown period ends when all refuse is burned off the grates. The shutdown period at the BRRF commences when the subject unit's feed chute damper is shut (this is the time at which continuous feeding is ceased). Shutdown of a unit is complete when all of the municipal solid waste is burned off the grates. The operator verifies that the shutdown is complete by visually inspecting the grates to make sure the fires are out.

5. Malfunction: 40 CFR 60.2 defines malfunction as "any sudden and unavoidable failure of air pollution control equipment or process equipment or of a process to operate in a normal or usual manner. Failures that are caused entirely or in part by poor maintenance, careless operation, or any other preventable upset condition or preventable equipment breakdown shall not be considered malfunctions." Malfunction is similarly defined in 6 NYCRR Part 201-2 as "any sudden and unavoidable failure of an air cleaning device or air contamination source to operate..."
in compliance with all applicable parts of this chapter [6 NYCCR Part 201] and shall not include failures that are caused entirely or partially by poor maintenance, careless operation, or other preventable condition."

6. Emergency Conditions: 6 NYCRR Part 201-2(b)(12) defines emergency as "any situation arising from suddenly and reasonably unforeseeable events beyond the control of the owner and/or operator of a facility, including acts of God, which situation requires immediate corrective action to restore normal operation and which causes the emission source to exceed a technology-based requirement under the permit of state-established emission limitations, due to unavoidable increases in emissions attributable to the situation. An emergency shall not include situations caused by improperly designed equipment, lack of preventative maintenance, careless or improper operation, or operator error."

Regulated Contaminant(s):
CAS No: 0NY075-00-0   PARTICULATES

Item 40.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: INTERMITTENT EMISSION TESTING
Monitoring Description:
Each affected MWC unit is required to meet an emission limit for particulate matter not to exceed 25 milligrams per dry standard cubic meter, corrected to 7 percent oxygen. Compliance will be determined by conducting a stack emission test according to a protocol and schedule approved by the Department. The protocol and schedule for the initial test are to be submitted within 180 days of the issued date of this permit. Reporting shall be done in accordance with 40 CFR 60.39b, as applicable. Subsequent stack emissions tests will be required on annual basis unless otherwise directed by the Department.

Upper Permit Limit: 25 milligrams per dry standard cubic meter (corrected to 7% oxygen)
Reference Test Method: 40 CFR 60 App A RM5
Monitoring Frequency: ANNUALLY
Averaging Method: ARITHMETIC MEAN
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2015.
Subsequent reports are due every 6 calendar month(s).

**Condition 41:** Compliance Certification
Effective between the dates of 01/07/2015 and 01/06/2020

**Applicable Federal Requirement:** 40CFR 60.33b(a)(1)(iii), NSPS Subpart Cb

**Item 41.1:**
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

- Emission Unit: 1-MBMWC Emission Point: 00003 Emission Source: 000BH
- Emission Unit: 1-MBMWC Emission Point: 00003 Emission Source: 00MWC
- Emission Unit: 1-MBMWC Emission Point: 00003 Emission Source: 00NOX
- Emission Unit: 1-MBMWC Emission Point: 00003 Emission Source: 00SDA
- Emission Unit: 1-MBMWC Emission Point: 00003 Emission Source: SHICK
- Emission Unit: 2-MBMWC Emission Point: 00004 Emission Source: 001BH

- Emission Unit: 2-MBMWC Emission Point: 00004 Emission Source: 01NOX
- Emission Unit: 2-MBMWC Emission Point: 00004 Emission Source: 01SDA
- Emission Unit: 2-MBMWC Emission Point: 00004 Emission Source: 1SHIC

**Item 41.2:**
Compliance Certification shall include the following monitoring:

- Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE
- Monitoring Description:
The emission limit for opacity exhibited by the gases discharged to the atmosphere from a designated facility must not exceed 10 percent (6-minute average). Compliance with this limit shall be demonstrated using a continuous opacity monitor (COM) operated in accordance with a quality assurance/quality control protocol approved by the Department.

Parameter Monitored: OPACITY  
Upper Permit Limit: 10 percent  
Monitoring Frequency: CONTINUOUS  
Averaging Method: 6 MINUTE AVERAGE  
Reporting Requirements: QUARTERLY (CALENDAR)  
Reports due 30 days after the reporting period.  
The initial report is due 4/30/2015.  
Subsequent reports are due every 3 calendar month(s).

**Condition 42:** Compliance Certification  
**Effective between the dates of 01/07/2015 and 01/06/2020**  
**Applicable Federal Requirement:** 40CFR 60.33b(a)(2)(i), NSPS Subpart Cb

**Item 42.1:**  
The Compliance Certification activity will be performed for the facility:  
The Compliance Certification applies to:

Process: 2MW  Emission Source: 1SHIC

Regulated Contaminant(s):
CAS No: 007440-43-9 CADMIUM

Item 42.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: INTERMITTENT EMISSION TESTING
Monitoring Description:
Each affected MWC unit is required to meet an emission limit for cadmium not to exceed 35 micrograms per dry standard cubic meter, corrected to 7 percent oxygen. Compliance will be determined by conducting a stack emission test according to a protocol and schedule approved by the Department. The protocol and schedule for the initial test are to be submitted within 180 days of the issued date of this permit. Reporting shall be done in accordance with 40 CFR 60.39b, as applicable. Subsequent stack emissions tests will be required on annual basis unless otherwise directed by the Department.

Upper Permit Limit: 35 micrograms per dry standard cubic meter (corrected to 7% oxygen)
Reference Test Method: EPA Ref Test Method
Monitoring Frequency: ANNUALLY
Averaging Method: ARITHMETIC MEAN
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period. The initial report is due 7/30/2015. Subsequent reports are due every 6 calendar month(s).

Condition 43: Compliance Certification
Effective between the dates of 01/07/2015 and 01/06/2020

Applicable Federal Requirement: 40CFR 60.33b(a)(3), NSPS Subpart Cb

Item 43.1:
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

Regulated Contaminant(s):
   CAS No: 007439-97-6  MERCURY

Item 43.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: INTERMITTENT EMISSION TESTING
Monitoring Description:
Each affected MWC unit is required to meet the less stringent of either of the following: an emission limit for mercury not to exceed 50 micrograms per dry standard cubic meter, corrected to 7 percent oxygen or, an 85 percent reduction by weight of the potential mercury emission concentration. Compliance with the emission concentration limit will be determined by conducting a stack emission test according to a protocol and schedule approved by the Department. The protocol and schedule for the initial test are to be submitted within 180 days of the issued date of this permit. Reporting shall be done in accordance with 40 CFR 60.39b, as applicable. Subsequent stack emissions tests will be required on annual basis unless otherwise directed by the Department.

Upper Permit Limit: 50 micrograms per dry standard cubic meter (corrected to 7% oxygen)
Reference Test Method: 40 CFR 60 App A RM29
Monitoring Frequency: ANNUALLY
Averaging Method: ARITHMETIC MEAN
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2015.
Subsequent reports are due every 6 calendar month(s).

Regulated Contaminant(s):
- CAS No: 007446-09-5 SULFUR DIOXIDE

**Item 46.2:**
Compliance Certification shall include the following monitoring:

**Monitoring Type:** CONTINUOUS EMISSION MONITORING (CEM)

**Monitoring Description:**
Each affected MWC unit is required to meet the less stringent of either of the following: an emission limit for sulfur dioxide not to exceed 29 parts per million by volume or 25 percent of the potential sulfur dioxide emission concentration (75-percent reduction by weight or volume), corrected to 7 percent oxygen (dry basis). Compliance with these limits is based on a 24-hour daily geometric mean. To demonstrate compliance with the emission limit the owner or operator of the facility shall install, calibrate, maintain and operate a continuous emissions monitor for sulfur dioxide according to a QA/QC.
Plan approved by the Department.

Upper Permit Limit: 29 parts per million by volume (dry, corrected to 7% O2)
Reference Test Method: 40 CFR 60 App B & F
Monitoring Frequency: CONTINUOUS
Averaging Method: 24 HOUR DAILY AVERAGE (GEOMETRIC MEAN)
Reporting Requirements: QUARTERLY (CALENDAR)

Reports due 30 days after the reporting period.
The initial report is due 4/30/2015.
Subsequent reports are due every 3 calendar month(s).

Item 52.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE
Monitoring Description:
An affected municipal waste combustor unit may not be operated at a steam load level exceeding 110 percent of the maximum demonstrated municipal waste combustor unit.
load (highest 4-hour block arithmetic average unit steam load, measured in pounds per hour) reached during the most recent performance test where compliance with the dioxin/furan emission limit was demonstrated) except as follows:

(1) During the annual dioxin/furan or mercury performance test and the 2 weeks preceding the annual dioxin/furan or mercury performance test, no municipal waste combustor unit load limit is applicable.

(2) The municipal waste combustor unit load limit may be waived in writing by the Department for the purpose of evaluating system performance, testing new technology or control technologies, diagnostic testing, or related activities for the purpose of improving municipal waste combustor performance or advancing the state-of-the-art for controlling municipal waste combustor emissions. The municipal waste combustor unit load limit continues to apply, and remains enforceable, until and unless the Department grants the waiver.

Parameter Monitored: STEAM OUTPUT  
Upper Permit Limit: 110 percent  
Monitoring Frequency: CONTINUOUS  
Averaging Method: 4-HOUR BLOCK (ARITHMETIC AVERAGE)  
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)  
Reports due 30 days after the reporting period.  
The initial report is due 7/30/2015.  
Subsequent reports are due every 6 calendar month(s).

Condition 53: Compliance Certification  
Effective between the dates of 01/07/2015 and 01/06/2020

Air Pollution Control Permit Conditions
Renewal 3          Page 57          FINAL

Item 53.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE

Monitoring Description:
Each affected MWC unit will be required to operate at a temperature not to exceed 17 degrees Centigrade above the maximum demonstrated particulate matter control device temperature, as measured at the particulate matter control device inlet, during four consecutive hours (4-hour block arithmetic average) determined at the most recent dioxin/furan performance test demonstrating compliance with the applicable dioxin/furan limit, except as follows:

(1) During the annual dioxin/furan or mercury performance test and the 2 weeks preceding the annual dioxin/furan or mercury performance test, no particulate matter control device temperature limitations are applicable.

(2) The particulate matter control device temperature limits may be waived in writing by the Department for the purpose of evaluating system performance, testing new technology or control technologies, diagnostic testing, or related activities for the purpose of improving municipal waste combustor performance or advancing the state-of-the-art for controlling municipal waste combustor emissions. The temperature limits continue to apply, and remain enforceable, until and unless the Department grants the waiver.

Parameter Monitored: TEMPERATURE ABOVE CONTROL DEVICE TEMPERATURE
Upper Permit Limit: 17 degrees Centigrade (or Celsius)
Monitoring Frequency: CONTINUOUS  
Averaging Method: 4-HOUR BLOCK (ARITHMETIC AVERAGE)  
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)  
Reports due 30 days after the reporting period.  
The initial report is due 7/30/2015.  
Subsequent reports are due every 6 calendar month(s).

**Condition 54: Operating Manual**  
**Effective between the dates of 01/07/2015 and 01/06/2020**

**Applicable Federal Requirement:** 40CFR 60.35b, NSPS Subpart Cb

**Item 54.1:**  
This Condition applies to  
Emission Unit: 1-MBMWC  
Emission Point: 00003  
Process: 1MW  
Emission Source: 00MWC

**Item 54.2:**  
The Permittee must develop and update on a yearly basis a site-specific operating manual that must, at a minimum, address the elements of municipal waste combustor unit operation specified below. This manual must be found acceptable by the Department.

- (1) A summary of the applicable standards under 40 CFR 60, Subpart Cb;  
- (2) A description of basic combustion theory applicable to a municipal waste combustor;  
- (3) Procedures for receiving, handling, and feeding municipal solid waste;  
- (4) Municipal waste combustor unit startup, shutdown, and malfunction procedures;  
- (5) Procedures for maintaining proper combustion air supply levels;  
- (6) Procedures for operating the municipal waste combustor unit within the standards established under 40 CFR 60, Subpart Cb;  
- (7) Procedures for responding to periodic upset or off-specification conditions;  
- (8) Procedures for minimizing particulate matter carryover;  
- (9) Procedures for handling ash;  
- (10) Procedures for monitoring municipal waste combustor unit emissions; and  
- (11) Reporting and recording keeping procedures.

A training program shall be established to review the operating manual according to the schedule below, with each person who has responsibilities affecting the operation of a municipal waste combustor including, but not limited to, chief facility operators, shift supervisors, control room operators, ash handlers, maintenance personnel, and crane/load handlers. Training shall be completed as follows:

- (1) Initial training shall be completed by the date prior to the day when the person assumes responsibilities affecting municipal waste combustor unit operation, and  
- (2) Annually, following the initial training.
The operating manual must be kept in a readily accessible location for all persons required to undergo training. The operating manual and records of training must be available for inspection by the Department upon request.

**Condition 55: Operator Training**
**Effective between the dates of 01/07/2015 and 01/06/2020**

**Applicable Federal Requirement:** 40CFR 60.35b, NSPS Subpart Cb

**Item 55.1:**
This Condition applies to Emission Unit: 1-MBMWC Emission Point: 00003
Process: 1MW Emission Source: 00MWC

**Item 55.2:**
All chief facility operators, shift supervisors, and control room operators must complete a municipal waste combustor operator training course which is acceptable to the Department prior to the date they assume responsibilities that affect operation of the municipal waste combustor unit. This requirement does not apply to chief facility operators, shift supervisors, and control room operators who have obtained full certification from the American Society of Mechanical Engineers on or before October 5, 1998. The owner or operator may request that the Department waive the requirements of this condition for chief facility operators, shift supervisors, and control room operators who have obtained only provisional certification from the American Society of Mechanical Engineers on or before October 5, 1998.

**Condition 56: Compliance Certification**
**Effective between the dates of 01/07/2015 and 01/06/2020**

**Applicable Federal Requirement:** 40CFR 60.35b, NSPS Subpart Cb

**Item 56.1:**
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

- Emission Unit: 1-MBMWC Emission Point: 00003 Emission Source: 000BH
- Emission Unit: 1-MBMWC Emission Point: 00003 Emission Source: 00MWC
- Emission Unit: 1-MBMWC Emission Point: 00003 Emission Source: 00NOX
- Emission Unit: 1-MBMWC Emission Point: 00003 Emission Source: 00SDA
- Emission Unit: 1-MBMWC Emission Point: 00003 Emission Source: SHICK
Item 56.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES

Monitoring Description:
If both the certified chief facility operator and certified shift supervisor are unavailable, a provisionally certified control room operator on site at the municipal waste combustion unit may fulfill the certified operator requirement. Depending on the length of time that a certified chief facility operator and certified shift supervisor are away, the owner or operator of the affected facility must meet one of three criteria:

(1) When the certified chief facility operator and certified shift supervisor are both off site for 12 hours or less, and no other certified operator is on site, the provisionally certified control room operator may perform the duties of the certified chief facility operator or certified shift supervisor.

(2) When the certified chief facility operator and certified shift supervisor are off site for more than 12 hours, but for two weeks or less, and no other certified operator is on site, the provisionally certified control room operator may perform the duties of the certified chief facility operator or certified shift supervisor without notice to, or approval by, the Department. However, the owner or operator of the affected facility must record the period when the certified chief facility operator and certified shift supervisor are off site and include that information in the annual report as specified under §60.59b(g)(5).

(3) When the certified chief facility operator and certified shift supervisor are off site for more than two
weeks, and no other certified operator is on site, the provisionally certified control room operator may perform the duties of the certified chief facility operator or certified shift supervisor without approval by the Department. However, the owner or operator of the affected facility must take two actions:

(a) Notify the Department in writing. In the notice, state what caused the absence and what actions are being taken by the owner or operator of the facility to ensure that a certified chief facility operator or certified shift supervisor is on site as expeditiously as practicable.

(b) Submit a status report and corrective action summary to the Department every four weeks following the initial notification. If the Department provides notice that the status report or corrective action summary is disapproved, the municipal waste combustion unit may continue operation for 90 days, but then must cease operation. If corrective actions are taken in the 90-day period such that the Department withdraws the disapproval, municipal waste combustion unit operation may continue.

A provisionally certified operator who is newly promoted or recently transferred to a shift supervisor position or a chief facility operator position at the municipal waste combustion unit may perform the duties of the certified chief facility operator or certified shift supervisor without notice to, or approval by, the Department for up to six months before taking the ASME QRO certification exam.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 57: Compliance and performance testing.
Effective between the dates of 01/07/2015 and 01/06/2020

Applicable Federal Requirement: 40CFR 60.38b, NSPS Subpart Cb

Item 57.1:
This Condition applies to Emission Unit: 1-MBMWC Emission Point: 00003 Process: 1MW Emission Source: 00MWC

Item 57.2:
The Permittee shall meet the compliance and performance testing requirements listed in 40 CFR 60.58b as amended on May 10, 2006, as applicable, to determine compliance
with the limits specified in this permit.

**Item 57.3:**
If the MWC achieves a dioxin/furan emission level less than or equal to 15 nanograms per dry standard cubic meter total mass, corrected to 7 percent oxygen, the alternative performance testing schedule for dioxins/furans specified in 40 CFR 60.58b(g)(5)(iii) may be used.
STATE ONLY ENFORCEABLE CONDITIONS
**** Facility Level ****

NOTIFICATION OF GENERAL PERMITTEE OBLIGATIONS
This section contains terms and conditions which are not federally enforceable. Permittees may also have other obligations under regulations of general applicability

Item A: General Provisions for State Enforceable Permit Terms and Condition - 6 NYCRR Part 201-5
Any person who owns and/or operates stationary sources shall operate and maintain all emission units and any required emission control devices in compliance with all applicable Parts of this Chapter and existing laws, and shall operate the facility in accordance with all criteria, emission limits, terms, conditions, and standards in this permit. Failure of such person to properly operate and maintain the effectiveness of such emission units and emission control devices may be sufficient reason for the Department to revoke or deny a permit.

The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or law.

STATE ONLY APPLICABLE REQUIREMENTS
The following conditions are state applicable requirements and are not subject to compliance certification requirements unless otherwise noted or required under 6 NYCRR Part 201.

Condition 58: Contaminant List
Effective between the dates of 01/07/2015 and 01/06/2020

Applicable State Requirement:ECL 19-0301

Item 58.1: Emissions of the following contaminants are subject to contaminant specific requirements in this permit(emission limits, control requirements or compliance monitoring conditions).

CAS No: 000630-08-0
Name: CARBON MONOXIDE
Condition 59: Malfunctions and start-up/shutdown activities
Effective between the dates of 01/07/2015 and 01/06/2020

Applicable State Requirement: 6 NYCRR 201-1.4

Item 59.1:
(a) The facility owner or operator shall take all necessary and appropriate actions to prevent the emission of air pollutants that result in contravention of any applicable emission standard during periods of start-up, shutdown, or malfunction.

(b) The facility owner or operator shall compile and maintain records of all equipment malfunctions, maintenance, or start-up/shutdown activities when they can be expected to result in an exceedance of any applicable emission standard, and shall submit a report of such activities to the department when requested to do so, or when so required by a condition of a permit issued for the corresponding air contamination source. Such reports shall state whether any violations occurred and, if so, whether they were unavoidable, include the time, frequency and duration of the maintenance and/or start-up/shutdown activities, and an estimate of the emission rates of any air contaminants released. Such records shall be maintained for a period of at least five years and made available for review to department representatives upon request. Facility owners or operators subject to continuous stack monitoring and quarterly reporting requirements need not submit additional reports for equipment maintenance or start-up/shutdown activities for the facility to the department.

(c) In the event that emissions of air contaminants in excess of any emission standard in this Subchapter occur due to a malfunction, the facility owner or operator shall compile and maintain records of the malfunction and notify the department as soon as possible during normal working hours, but not later than two working days after becoming aware that the malfunction occurred.
When requested by the department, the facility owner or operator shall submit a written report to the department describing the malfunction, the corrective action taken, identification of air contaminants, and an estimate of the emission rates.

(d) The department may also require the owner or operator to include, in reports described under Subdivisions (b) and (c) of this Section, an estimate of the maximum ground level concentration of each air contaminant emitted and the effect of such emissions.

(e) A violation of any applicable emission standard resulting from start-up, shutdown, or malfunction conditions at a permitted or registered facility may not be subject to an enforcement action by the department and/or penalty if the department determines, in its sole discretion, that such a violation was unavoidable. The actions and recordkeeping and reporting requirements listed above must be adhered to in such circumstances.

**Condition 60: Compliance Demonstration**
**Effective between the dates of 01/07/2015 and 01/06/2020**

**Applicable State Requirement:** 6 NYCRR 617.11 (d)

**Item 60.1:**
The Compliance Demonstration activity will be performed for the facility:
The Compliance Demonstration applies to:

Item 60.2:
Compliance Demonstration shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES

Monitoring Description:

ADDITIONAL STACK TESTING REQUIREMENTS
Stack testing must be conducted for the following contaminants (all concentration corrected to 7% O2):
- Polychlorinated dibenzo-p-dioxins (ng/dscm)*
- Polychlorinated dibenzo-p-furans (ng/dscm)*
- Polycyclic Aromatic Hydrocarbon (ng/dscm)**
- Polychlorinated Biphenyls (ng/dscm)**
- Heavy Metals (in pounds per hour) ***
  Arsenic
  Beryllium
  Cadmium
  Chromium
  Lead
  Mercury
  Nickel

The above list of contaminants may be changed as deemed necessary by the Commissioner of DEC. The permittee shall also comply with the testing requirements of 40CFR60, Subpart Cb.

* Testing of congeners of these contaminants is required, as specified by DEC. Such testing will only be required at one of the two incinerator sources at the facility each year.

** Testing of PAH and PCB will follow the testing schedule as specified in 40CFR60.58b(g)(5)(iii).

*** Testing of metals (except Cadmium, Lead and Mercury) can be performed for one boiler flue and shall alternate between units for each scheduled testing. Testing of Cadmium, Lead and Mercury shall be performed in accordance with 40CFR60, Subpart Cb requirements.

Witnessing of any portion of stack tests, at the discretion of DEC staff, is required. DEC will not accept the results of any stack tests done in the absence of an approved protocol, or which are not properly witnessed. A report presenting the results of stack testing shall be submitted by the permittee to DEC in accordance with 6NYCRR Part 202.
