Description:
The facility is an educational institution and an active Army installation. Potential emissions of sulfur dioxide, oxides of nitrogen, carbon monoxide, and volatile organic compounds from the facility are above major source thresholds, as defined in 6NYCRR Part 201. Therefore, the facility is required to obtain a Title V permit.

The facility is an area source of hazardous air pollutants, which includes perchloroethlene. The potential to emit perchloroethene is less that 10 tons per year.

Air emission sources at the facility include three boilers and an emergency generator at the Central Power Plant, two boilers and four perchloroethylene dry cleaning machines at the Laundry Plant, a paint spray booth at the Transportation Motor Pool, four gasoline dispensing sites, a landfill gas collection system, and various boilers and emergency generators throughout the facility.

Modification #1
The modification is for adding new emission sources associated with the replacement of the Target Hill Wastewater Treatment Plant. Odors from the new plant will be controlled by three carbon adsorption units. Emission sources also include miscellaneous combustion sources. The modification is also for replacement of two diesel generators at the Athletic Department Maintenance Building.
By acceptance of this permit, the permittee agrees that the permit is contingent upon strict compliance with the ECL, all applicable regulations, the General Conditions specified and any Special Conditions included as part of this permit.

**Monitoring Description:**
To meet the requirements of this facility permit with respect to reporting, the permittee must:

Submit reports of any required monitoring at a minimum frequency of every 6 months, based on a calendar year reporting schedule. These reports shall be submitted to the Department within 60 days after the end of a reporting period. All instances of deviations from permit requirements must be clearly identified in such reports. All required reports must be certified by the responsible official for this facility.

Notify the Department and report permit deviations and incidences of noncompliance stating the probable cause of such deviations, and any corrective actions or preventive measures taken. Where the underlying applicable requirement contains a definition of prompt or otherwise specifies a time frame for reporting deviations, that definition or time frame shall govern. Where the underlying applicable requirement fails to address the time frame for reporting deviations, reports of deviations shall be submitted to the permitting authority based on the following schedule:

1. For emissions of a hazardous air pollutant (as identified in an applicable regulation) that continue for more than an hour in excess of permit requirements, the report must be made within 24 hours of the occurrence.

2. For emissions of any regulated air pollutant, excluding those listed in paragraph (1) of this section, that continue for more than two hours in excess of permit requirements, the report must be made within 48 hours.

Notwithstanding any recordkeeping and reporting requirements in 6 NYCRR 201-1.4, reports of any deviations shall not be on a less frequent basis than the reporting periods described in paragraphs (1) and (4) above.

Item 30.1:
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

Emission Unit: U-604BL

Emission Unit: U-845BL

Regulated Contaminant(s):
CAS No: 0NY210-00-0 OXIDES OF NITROGEN

Item 30.2:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
The facility will use system wide averaging for the two large boilers (#1 and #2) at the Central Power Plant, the mid-size boiler (#3) at the Central Power Plant, and the two mid-size boilers (#1 and #2) at the Laundry Boiler Plant, to comply with NOx RACT requirements.

This will be accomplished by adding NOx emissions from these sources and comparing this to a calculated limit. Therefore, actual total NOx emissions from the boilers at both the Central Power Plant and the Laundry Boiler Plant must be equal to or less than the total NOx limit (which is equal to the sum of the limits of all these boilers).

NOx emissions from boilers #1 and #2 at the Central Power Plant are determined from fuel BTU value and CEMS data.

NOx emissions from the mid-size boilers are determined from natural gas usage, fuel BTU value, and the following emission rates (obtained from stack testing conducted at the facility):
0.0938 pounds of NOx per million BTU for Central Power Plant boiler #3
0.1064 pounds of NOx per million BTU for Laundry Boiler Plant boiler #1
0.1044 pounds of NOx per million BTU for Laundry Boiler Plant boiler #2

When oil is used, NOx emissions from the mid-size boilers are determined from the AP-42 factor of 20 pounds of NOx per 1000 gallons of oil.

The boiler limit will be determined from fuel usage, fuel
MTU value, and the emission limits specified in 6NYCRR Part 227-2, which are:

- 0.15 pounds of NOx per million BTU for large boilers
- 0.08 pounds of NOx per million BTU for mid-size boilers

The NOx emissions and limit will be calculated on a 12 month basis, rolled monthly.

Monitoring Frequency: MONTHLY
Averaging Method: ANNUAL MAXIMUM ROLLED MONTHLY
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 60 days after the reporting period.
The initial report is due 5/30/2017.
Subsequent reports are due every 6 calendar month(s).

NOTIFICATION OF GENERAL PERMITTEE OBLIGATIONS
This section contains terms and conditions which are not federally enforceable. Permittees may also have other obligations under regulations of general applicability

Item A: Emergency Defense - 6 NYCRR 201-1.5

An emergency, as defined by subpart 201-2, constitutes an affirmative defense to penalties sought in an enforcement action brought by the Department for noncompliance with emissions limitations or permit conditions for all facilities in New York State.

(a) The affirmative defense of emergency shall be demonstrated through properly signed, contemporaneous operating logs, or other relevant evidence that:

(1) An emergency occurred and that the facility owner or operator can identify the cause(s) of the emergency;
(2) The equipment at the permitted facility causing the emergency was at the time being properly operated and maintained;
(3) During the period of the emergency the facility owner or operator took all reasonable steps to minimize levels of emissions that exceeded the emission standards, or other requirements in the permit; and
(4) The facility owner or operator notified the Department within two working days after the event occurred. This notice must contain a description of the emergency, any steps taken to mitigate emissions, and corrective actions taken.

(b) In any enforcement proceeding, the facility owner or operator seeking to establish the occurrence of an emergency has the burden of proof.

(c) This provision is in addition to any emergency or upset provision contained in any applicable requirement.

Item B: General Provisions for State Enforceable Permit Terms and Condition - 6 NYCRR Part 201-5

Any person who owns and/or operates stationary sources shall operate and maintain all emission units and any required emission control devices in compliance with all applicable Parts of this Chapter and existing laws, and shall operate the facility in accordance with all criteria, emission limits, terms, conditions, and
Standards in this permit. Failure of such person to properly operate and maintain the effectiveness of such emission units and emission control devices may be sufficient reason for the Department to revoke or deny a permit.

The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or law.
