(518) 695-8175

Facility: HOLLINGSWORTH & VOSE-EASTON MILL
3235 CO RTE 113
GREENWICH, NY 12834

Description:
Hollingsworth & Vose Company's Easton Facility is a manufacturer of technical industrial papers and other non-woven fabrics and is located in the Town of Easton, Washington County. At this facility, various papers or fabrics are formed, coated/saturated and dried/cured using three different paper machines. In all cases, the process begins by spreading a slurry containing wood pulp and/or other fiber onto a former and removing the moisture to form a paper or fabric web. For some formulations, a coating is sprayed onto the web during this part of the process in order to facilitate operations that occur further down the line. All wood pulp and/or other fiber used in the process is purchased from outside suppliers.

From here, the process varies depending upon the product being made. In some cases, no further processing occurs. In most cases, coatings (i.e., binders) are applied and the web is dried again. Sometimes, additional coatings are applied. The paper machines also have the ability to cure certain coatings by using natural gas fired curing units. The finished product is rolled into large rolls which may be converted into smaller sizes prior to packaging and shipment.

Processes performed on the three paper machines are grouped together as Emission Unit U-PAPER, and are regulated under 6 NYCRR Parts 212, and Part 228. Emissions of formaldehyde and 1,3-dichloro-2-propanol have been limited in order to comply with requirements contained in Section 212.4. Monitoring and record keeping of product usage, formulations produced and resulting emissions of these contaminants are required in order to demonstrate compliance with the limits. Coating processes must also use compliant coatings as specified in Section 228.7 and 40 CFR 63, Subpart JJJ & Subpart OOOO, as applicable. These limits the quantity of volatile organic compounds (VOC) and Hazardous Air Pollutants (HAPs), respectively, which are emitted during coating.
For some of the coatings used, ingredients are first dispersed in a mixer (Emission Source MIXR1) before being charged to the coater head tank. This mixer is the only Emission Source in Emission Unit U-MIXRS, and is regulated under 6 NYCRR Part 212. In many cases, coatings are mixed in other tanks which are exempt from permitting requirements.

Steam heated can dryers are used to dry the paper or fabric web, with steam provided by two dual fueled (natural gas/No. 6 fuel oil) boilers having rated capacities of 43.4 mmBTU/hr and 32.5 mmBTU/hr heat input (Emission Sources 00001 and 00002). For Paper Machine No. 10, drying is aided by a Thru-dryer, fired with natural gas. This Thru-dryer is exempt from permitting requirements. The two boilers are grouped together as Emission Unit U-BOILR. Particulates and Hazardous Air Pollutants (HAPs) are regulated under 6 NYCRR Part 227 and 40 CFR 63, Subpart DDDDD, respectively. Emissions of Sulfur Dioxide (SO2) and Oxides of Nitrogen (NOx) from this facility have been capped at 169 tpy and 83 tpy, respectively. These caps were established in 1995 to prevent the need for a full Prevention of Significant Deterioration (PSD) review, under 40 CFR 52.21(i), when Paper Machine No. 8 was installed. The cap on NOx emissions also serves to cap the combustion units out of Reasonably Available Control Technology (RACT) requirements contained in 6 NYCRR, Subpart 227-2 for that contaminant. Monitoring, recordkeeping and reporting of fuel use are required to demonstrate compliance with these limits. Fuel use for the entire facility is monitored, thereby appropriately accounting for SO2 and NOx emissions from several exempt combustion units in the totals. Notification requirements contained in National Emissions Standards for Hazardous Air Pollutants (NESHAP) for industrial boilers, under 40 CFR 63, Subpart DDDDD, has been provided. There are no additional Subpart DDDDD requirements for the existing boilers at this time.

Pulp from the broke (i.e., the waste paper from the process) is recovered by first dissolving the material in the Broke Beater (ES BEATR) and then washing the resulting pulp slurry in the Broke Washer (ES WASHR). It is then re-used in the process. Emission Unit U-BROKE covers these emission sources, which are regulated under 6 NYCRR Part 212.

In addition to formaldehyde, 1,3-dichloro-2-propanol, HAPs, VOC, SO2 and NOx, Hollingsworth & Vose Company's Easton Facility is regulated for the following pollutants: Carbon Monoxide (CO), Particulates (PM), and Sulfuric Acid. The facility has the potential to emit SO2 and HAPs above the Title V major source thresholds.

By acceptance of this permit, the permittee agrees that the permit is contingent upon strict compliance with the ECL, all applicable regulations, the General Conditions specified and any Special Conditions included as part of this permit.

Permit Administrator: KEVIN R BLISS

Authorized Signature: _________________________________ Date: ___ / ___ / _____
Notification of Other State Permittee Obligations

Item A: Permittee Accepts Legal Responsibility and Agrees to Indemnification

The permittee expressly agrees to indemnify and hold harmless the Department of Environmental Conservation of the State of New York, its representatives, employees and agents ("DEC") for all claims, suits, actions, and damages, to the extent attributable to the permittee's acts or omissions in connection with the compliance permittee's undertaking of activities in connection with, or operation and maintenance of, the facility or facilities authorized by the permit whether in compliance or not in any compliance with the terms and conditions of the permit. This indemnification does not extend to any claims, suits, actions, or damages to the extent attributable to DEC's own negligent or intentional acts or omissions, or to any claims, suits, or actions naming the DEC and arising under article 78 of the New York Civil Practice Laws and Rules or any citizen suit or civil rights provision under federal or state laws.

Item B: Permittee's Contractors to Comply with Permit

The permittee is responsible for informing its independent contractors, employees, agents and assigns of their responsibility to comply with this permit, including all special conditions while acting as the permittee's agent with respect to the permitted activities, and such persons shall be subject to the same sanctions for violations of the Environmental Conservation Law as those prescribed for the permittee.

Item C: Permittee Responsible for Obtaining Other Required Permits

The permittee is responsible for obtaining any other permits, approvals, lands, easements and rights-of-way that may be required to carry out the activities that are authorized by this permit.

Item D: No Right to Trespass or Interfere with Riparian Rights

This permit does not convey to the permittee any right to trespass upon the lands or interfere with the riparian rights of others in order to perform the permitted work nor does it authorize the impairment of any rights, title, or interest in real or personal property held or vested in a person not a party to the permit.

DEC GENERAL CONDITIONS

***** General Provisions *****

For the purpose of your Title V permit, the following section contains state-only enforceable terms and conditions.

GENERAL CONDITIONS - Apply to ALL Authorized Permits.

Condition 1: Facility Inspection by the Department
Applicable State Requirement: ECL 19-0305

Item 1.1:
The permitted site or facility, including relevant records, is subject to inspection at reasonable hours and intervals by an authorized representative of the Department of Environmental Conservation (the Department) to determine whether the permittee is complying with this permit and the ECL. Such representative may order the work suspended pursuant to ECL 71-0301 and SAPA 401(3).

Item 1.2:
The permittee shall provide a person to accompany the Department’s representative during an inspection to the permit area when requested by the Department.

Item 1.3:
A copy of this permit, including all referenced maps, drawings and special conditions, must be available for inspection by the Department at all times at the project site or facility. Failure to produce a copy of the permit upon request by a Department representative is a violation of this permit.

Condition 2: Relationship of this Permit to Other Department Orders and Determinations
Applicable State Requirement: ECL 3-0301 (2) (m)

Item 2.1:
Unless expressly provided for by the Department, issuance of this permit does not modify, supersede or rescind any order or determination previously issued by the Department or any of the terms, conditions or requirements contained in such order or determination.

Condition 3: Applications for permit renewals, modifications and transfers
Applicable State Requirement: 6 NYCRR 621.11

Item 3.1:
The permittee must submit a separate written application to the Department for renewal, modification or transfer of this permit. Such application must include any forms or supplemental information the Department requires. Any renewal, modification or transfer granted by the Department must be in writing.

Item 3.2:
The permittee must submit a renewal application at least 180 days before expiration of permits for Title V Facility Permits, or at least 30 days before expiration of permits for State Facility Permits.

Item 3.3:
Permits are transferrable with the approval of the department unless specifically prohibited by
the statute, regulation or another permit condition. Applications for permit transfer should be submitted prior to actual transfer of ownership.

**Condition 4: Permit modifications, suspensions or revocations by the Department**

**Applicable State Requirement:** 6 NYCRR 621.13

**Item 4.1:**
The Department reserves the right to exercise all available authority to modify, suspend, or revoke this permit in accordance with 6NYCRR Part 621. The grounds for modification, suspension or revocation include:

a) materially false or inaccurate statements in the permit application or supporting papers;
b) failure by the permittee to comply with any terms or conditions of the permit;
c) exceeding the scope of the project as described in the permit application;
d) newly discovered material information or a material change in environmental conditions, relevant technology or applicable law or regulations since the issuance of the existing permit;
e) noncompliance with previously issued permit conditions, orders of the commissioner, any provisions of the Environmental Conservation Law or regulations of the Department related to the permitted activity.

NOTIFICATION OF GENERAL PERMITTEE OBLIGATIONS
The items listed below are not subject to the annual compliance certification requirements under Title V. Permittees may also have other obligations under regulations of general applicability.

Item A: Emergency Defense - 6 NYCRR 201-1.5

An emergency, as defined by subpart 201-2, constitutes an affirmative defense to penalties sought in an enforcement action brought by the Department for noncompliance with emissions limitations or permit conditions for all facilities in New York State.

(a) The affirmative defense of emergency shall be demonstrated through properly signed, contemporaneous operating logs, or other relevant evidence that:

(1) An emergency occurred and that the facility owner or operator can identify the cause(s) of the emergency;

(2) The equipment at the permitted facility causing the emergency was at the time being properly operated and maintained;

(3) During the period of the emergency the facility owner or operator took all reasonable steps to minimize levels of emissions that exceeded the emission standards, or other requirements in the permit; and

(4) The facility owner or operator notified the Department within two working days after the event occurred. This notice must contain a description of the emergency, any steps taken to mitigate emissions, and corrective actions taken.

(b) In any enforcement proceeding, the facility owner or operator seeking to establish the occurrence of an emergency has the burden of proof.

(c) This provision is in addition to any emergency or upset provision contained in any applicable requirement.

Item B: Public Access to Recordkeeping for Title V Facilities - 6 NYCRR 201-1.10 (b)
The Department will make available to the public any permit application, compliance plan, permit, and monitoring and compliance certification report pursuant to Section 503(e) of the Act, except for information entitled to confidential treatment pursuant to 6 NYCRR Part 616 - Public Access to records and Section 114(c) of the Act.
Item C: Timely Application for the Renewal of Title V Permits - 6 NYCRR 201-6.2 (a) (4)
Owners and/or operators of facilities having an issued Title V permit shall submit a complete application at least 180 days, but not more than eighteen months, prior to the date of permit expiration for permit renewal purposes.

Item D: Certification by a Responsible Official - 6 NYCRR 201-6.2 (d) (12)
Any application, form, report or compliance certification required to be submitted pursuant to the federally enforceable portions of this permit shall contain a certification of truth, accuracy and completeness by a responsible official. This certification shall state that based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.

Item E: Requirement to Comply With All Conditions - 6 NYCRR 201-6.4 (a) (2)
The permittee must comply with all conditions of the Title V facility permit. Any permit non-compliance constitutes a violation of the Act and is grounds for enforcement action; for permit termination, revocation and reissuance, or modification; or for denial of a permit renewal application.

Item F: Permit Revocation, Modification, Reopening, Reissuance or Termination, and Associated Information Submission Requirements - 6 NYCRR 201-6.4 (a) (3)
This permit may be modified, revoked, reopened and reissued, or terminated for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any permit condition.

Item G: Cessation or Reduction of Permitted Activity Not a Defense - 6 NYCRR 201-6.4 (a) (5)
It shall not be a defense for a permittee in an enforcement action to claim that a cessation or reduction in the permitted activity would have been necessary in order to maintain compliance with the conditions of this permit.

Item H: Property Rights - 6 NYCRR 201-6.4 (a) (6)
This permit does not convey any property rights of any sort or any exclusive privilege.
Item I: Severability - 6 NYCRR 201-6.4 (a) (9)

If any provisions, parts or conditions of this permit are found to be invalid or are the subject of a challenge, the remainder of this permit shall continue to be valid.

Item J: Permit Shield - 6 NYCRR 201-6.4 (g)

All permittees granted a Title V facility permit shall be covered under the protection of a permit shield, except as provided under 6 NYCRR Subpart 201-6. Compliance with the conditions of the permit shall be deemed compliance with any applicable requirements as of the date of permit issuance, provided that such applicable requirements are included and are specifically identified in the permit, or the Department, in acting on the permit application or revision, determines in writing that other requirements specifically identified are not applicable to the major stationary source, and the permit includes the determination or a concise summary thereof. Nothing herein shall preclude the Department from revising or revoking the permit pursuant to 6 NYCRR Part 621 or from exercising its summary abatement authority. Nothing in this permit shall alter or affect the following:

i. The ability of the Department to seek to bring suit on behalf of the State of New York, or the Administrator to seek to bring suit on behalf of the United States, to immediately restrain any person causing or contributing to pollution presenting an imminent and substantial endangerment to public health, welfare or the environment to stop the emission of air pollutants causing or contributing to such pollution;

ii. The liability of a permittee of the Title V facility for any violation of applicable requirements prior to or at the time of permit issuance;

iii. The applicable requirements of Title IV of the Act;

iv. The ability of the Department or the Administrator to obtain information from the permittee concerning the ability to enter, inspect and monitor the facility.

Item K: Reopening for Cause - 6 NYCRR 201-6.4 (i)

This Title V permit shall be reopened and revised under any of the following circumstances:

i. If additional applicable requirements under the Act become applicable where this permit's remaining term is
three or more years, a reopening shall be completed not later than 18 months after promulgation of the applicable requirement. No such reopening is required if the effective date of the requirement is later than the date on which this permit is due to expire, unless the original permit or any of its terms and conditions has been extended by the Department pursuant to the provisions of Part 201-6.7 and Part 621.

ii. The Department or the Administrator determines that the permit contains a material mistake or that inaccurate statements were made in establishing the emissions standards or other terms or conditions of the permit.

iii. The Department or the Administrator determines that the Title V permit must be revised or reopened to assure compliance with applicable requirements.

iv. If the permitted facility is an "affected source" subject to the requirements of Title IV of the Act, and additional requirements (including excess emissions requirements) become applicable. Upon approval by the Administrator, excess emissions offset plans shall be deemed to be incorporated into the permit.

Proceedings to reopen and issue Title V facility permits shall follow the same procedures as apply to initial permit issuance but shall affect only those parts of the permit for which cause to reopen exists.

Reopenings shall not be initiated before a notice of such intent is provided to the facility by the Department at least thirty days in advance of the date that the permit is to be reopened, except that the Department may provide a shorter time period in the case of an emergency.

**Item L: Permit Exclusion - ECL 19-0305**
The issuance of this permit by the Department and the receipt thereof by the Applicant does not and shall not be construed as barring, diminishing, adjudicating or in any way affecting any legal, administrative or equitable rights or claims, actions, suits, causes of action or demands whatsoever that the Department may have against the Applicant for violations based on facts and circumstances alleged to have occurred or existed prior to the effective date of this permit, including, but not limited to, any enforcement action authorized pursuant to the provisions of applicable federal law, the Environmental Conservation Law of the State of New York (ECL) and Chapter III of the Official Compilation of the Codes, Rules and Regulations of the State of New York.
(NYCRR). The issuance of this permit also shall not in any way affect pending or future enforcement actions under the Clean Air Act brought by the United States or any person.

**Item M: Federally Enforceable Requirements - 40 CFR 70.6 (b)**

All terms and conditions in this permit required by the Act or any applicable requirement, including any provisions designed to limit a facility's potential to emit, are enforceable by the Administrator and citizens under the Act. The Department has, in this permit, specifically designated any terms and conditions that are not required under the Act or under any of its applicable requirements as being enforceable under only state regulations.

**MANDATORY FEDERALLY ENFORCEABLE PERMIT CONDITIONS SUBJECT TO ANNUAL CERTIFICATIONS AT ALL TIMES**

The following federally enforceable permit conditions are mandatory for all Title V permits and are subject to annual compliance certification requirements at all times.

**Condition 1:** Acceptable Ambient Air Quality
Effective between the dates of 01/19/2016 and 01/18/2021

**Applicable Federal Requirement:** 6 NYCRR 200.6

**Item 1.1:**
Notwithstanding the provisions of 6 NYCRR Chapter III, Subchapter A, no person shall allow or permit any air contamination source to emit air contaminants in quantities which alone or in combination with emissions from other air contamination sources would contravene any applicable ambient air quality standard and/or cause air pollution. In such cases where contravention occurs or may occur, the Commissioner shall specify the degree and/or method of emission control required.

**Condition 2:** Fees
Effective between the dates of 01/19/2016 and 01/18/2021

**Applicable Federal Requirement:** 6 NYCRR 201-6.4 (a) (7)

**Item 2.1:**
The owner and/or operator of a stationary source shall pay fees to the Department consistent with the fee schedule authorized by ECL 72-0303.

**Condition 3:** Recordkeeping and Reporting of Compliance Monitoring
Effective between the dates of 01/19/2016 and 01/18/2021

**Applicable Federal Requirement:** 6 NYCRR 201-6.4 (c)
**Item 3.1:**
The following information must be included in any required compliance monitoring records and reports:

(i) The date, place, and time of sampling or measurements;

(ii) The date(s) analyses were performed;

(iii) The company or entity that performed the analyses;

(iv) The analytical techniques or methods used including quality assurance and quality control procedures if required;

(v) The results of such analyses including quality assurance data where required; and

(vi) The operating conditions as existing at the time of sampling or measurement.

Any deviation from permit requirements must be clearly identified in all records and reports. Reports must be certified by a responsible official, consistent with Section 201-6.2 of Part 201.

**Condition 4:** Records of Monitoring, Sampling, and Measurement

Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR 201-6.4 (c) (2)

**Item 4.1:**
Compliance monitoring and recordkeeping shall be conducted according to the terms and conditions contained in this permit and shall follow all quality assurance requirements found in applicable regulations. Records of all monitoring data and support information must be retained for a period of at least 5 years from the date of the monitoring, sampling, measurement, report, or application. Support information includes all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by the permit.

**Condition 5:** Compliance Certification

Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR 201-6.4 (c) (3) (ii)

**Item 5.1:**
The Compliance Certification activity will be performed for the Facility.

**Item 5.2:**
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES

Monitoring Description:
To meet the requirements of this facility permit with respect to reporting, the permittee must:
Submit reports of any required monitoring at a minimum frequency of every 6 months, based on a calendar year reporting schedule. These reports shall be submitted to the Department within 30 days after the end of a reporting period. All instances of deviations from permit requirements must be clearly identified in such reports. All required reports must be certified by the responsible official for this facility.

Notify the Department and report permit deviations and incidences of noncompliance stating the probable cause of such deviations, and any corrective actions or preventive measures taken. Where the underlying applicable requirement contains a definition of prompt or otherwise specifies a time frame for reporting deviations, that definition or time frame shall govern. Where the underlying applicable requirement fails to address the time frame for reporting deviations, reports of deviations shall be submitted to the permitting authority based on the following schedule:

(1) For emissions of a hazardous air pollutant (as identified in an applicable regulation) that continue for more than an hour in excess of permit requirements, the report must be made within 24 hours of the occurrence.

(2) For emissions of any regulated air pollutant, excluding those listed in paragraph (1) of this section, that continue for more than two hours in excess of permit requirements, the report must be made within 48 hours.

(3) For all other deviations from permit requirements, the report shall be contained in the 6 month monitoring report required above.

(4) This permit may contain a more stringent reporting requirement than required by paragraphs (1), (2) or (3) above. If more stringent reporting requirements have been placed in this permit or exist in applicable requirements that apply to this facility, the more stringent reporting requirement shall apply.

If above paragraphs (1) or (2) are met, the source must notify the permitting authority by telephone during normal business hours at the Regional Office of jurisdiction for this permit, attention Regional Air Pollution Control Engineer (RAPCE) according to the timetable listed in paragraphs (1) and (2) of this section. For deviations and incidences that must be reported outside of normal business hours, on weekends, or holidays, the DEC Spill
Hotline phone number at 1-800-457-7362 shall be used. A written notice, certified by a responsible official consistent with 6 NYCRR Part 201-6.2(d)(12), must be submitted within 10 working days of an occurrence for deviations reported under (1) and (2). All deviations reported under paragraphs (1) and (2) of this section must also be identified in the 6 month monitoring report required above.

The provisions of 6 NYCRR 201-1.4 shall apply if the permittee seeks to have a violation excused unless otherwise limited by regulation. In order to have a violation of a federal regulation (such as a new source performance standard or national emissions standard for hazardous air pollutants) excused, the specific federal regulation must provide for an affirmative defense during start-up, shutdowns, malfunctions or upsets. Notwithstanding any recordkeeping and reporting requirements in 6 NYCRR 201-1.4, reports of any deviations shall not be on a less frequent basis than the reporting periods described in paragraphs (1) and (4) above.

In the case of any condition contained in this permit with a reporting requirement of "Upon request by regulatory agency" the permittee shall include in the semiannual report, a statement for each such condition that the monitoring or recordkeeping was performed as required or requested and a listing of all instances of deviations from these requirements.

In the case of any emission testing performed during the previous six month reporting period, either due to a request by the Department, EPA, or a regulatory requirement, the permittee shall include in the semiannual report a summary of the testing results and shall indicate whether or not the Department or EPA has approved the results.

All semiannual reports may be submitted electronically or physically. Electronic reports shall be submitted using the Department’s Air Compliance and Emissions Electronic-Reporting system (ACE). If the facility owner or operator elects to send physical copies instead, two copies shall be sent to the Department (one copy to the regional air pollution control engineer (RAPCE) in the regional office and one copy to the Bureau of Quality Assurance (BQA) in the DEC central office) and one copy shall be sent to the Administrator (or his or her representative). Mailing addresses for the above referenced persons are contained in the monitoring condition for 6 NYCRR Part 201-6.4(e), contained elsewhere in this permit.
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2016.
Subsequent reports are due every 6 calendar month(s).

Condition 6: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR 201-6.4 (e)

Item 6.1:
The Compliance Certification activity will be performed for the Facility.

Item 6.2:
Compliance Certification shall include the following monitoring:

Requirements for compliance certifications with terms and conditions contained in this facility permit include the following:

i. Compliance certifications shall contain:
   - the identification of each term or condition of the permit that is the basis of the certification;
   - the compliance status;
   - whether compliance was continuous or intermittent;
   - the method(s) used for determining the compliance status of the facility, currently and over the reporting period consistent with the monitoring and related recordkeeping and reporting requirements of this permit;
   - such other facts as the Department may require to determine the compliance status of the facility as specified in any special permit terms or conditions; and
   - such additional requirements as may be specified elsewhere in this permit related to compliance certification.

ii. The responsible official must include in the annual certification report all terms and conditions contained in this permit which are identified as being subject to certification, including emission limitations, standards, or work practices. That is, the provisions labeled herein as "Compliance Certification" are not the only provisions of this permit for which an annual certification is required.

iii. Compliance certifications shall be submitted annually. Certification reports are due 30 days after the anniversary date of four consecutive calendar quarters.
The first report is due 30 days after the calendar quarter that occurs just prior to the permit anniversary date, unless another quarter has been acceptable by the Department.

iv. All annual compliance certifications may be submitted electronically or physically. Electronic reports shall be submitted using the Department’s Air Compliance and Emissions Electronic-Reporting system (ACE). If the facility owner or operator elects to send physical copies instead, two copies shall be sent to the Department (one copy to the regional air pollution control engineer (RAPCE) in the regional office and one copy to the Bureau of Quality Assurance (BQA) in the DEC central office) and one copy shall be sent to the Administrator (or his or her representative). The mailing addresses for the above referenced persons are:

Chief – Stationary Source Compliance Section
USEPA Region 2
Air Compliance Branch
290 Broadway
New York, NY 10007-1866

The address for the RAPCE is as follows:

Regional Air Pollution Control Engineer
Region 5 Suboffice
232 Golf Course Road
Warrensburg, NY 12885-1172

The address for the BQA is as follows:

NYSDEC
Bureau of Quality Assurance
625 Broadway
Albany, NY 12233-3258

Monitoring Frequency: ANNUALLY
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2016.
Subsequent reports are due on the same day each year

**Condition 7:** Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

**Applicable Federal Requirement:** 6 NYCRR 202-2.1

**Item 7.1:**
The Compliance Certification activity will be performed for the Facility.
Item 7.2: Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
Emission statements shall be submitted on or before April 15th each year for emissions of the previous calendar year.

Monitoring Frequency: ANNUALLY
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due by April 15th for previous calendar year

Condition 8: Recordkeeping requirements
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR 202-2.5

Item 8.1: The following records shall be maintained for at least five years:

(1) a copy of each emission statement submitted to the department; and

(2) records indicating how the information submitted in the emission statement was determined, including any calculations, data, measurements, and estimates used.

(b) These records shall be made available at the facility to the representatives of the department upon request during normal business hours.

Condition 9: Open Fires - Prohibitions
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR 215.2

Item 9.1: Except as allowed by Title 6 NYCRR Section 215.3, no person shall burn, cause, suffer, allow or permit the burning of any materials in an open fire.

Item 9.2 Per Section 215.3, burning in an open fire, provided it is not contrary to other law or regulation, will be allowed as follows:
(a) On-site burning in any town with a total population less than 20,000 of downed limbs and branches (including branches with attached leaves or needles) less than six inches in diameter and eight feet in length between May 15th and the following March 15th. For the purposes of this subdivision, the total population of a town shall include the population of any village or portion thereof located within the town. However, this subdivision shall not be construed to allow burning within any village.
(b) Barbecue grills, maple sugar arches and similar outdoor cooking devices when actually used for cooking or processing food.
(c) Small fires used for cooking and camp fires provided that only charcoal or untreated wood is used as fuel and the fire is not left unattended until extinguished.
(d) On-site burning of agricultural wastes as part of a valid agricultural operation on contiguous
agricultural lands larger than five acres actively devoted to agricultural or horticultural use, provided such waste is actually grown or generated on those lands and such waste is capable of being fully burned within a 24-hour period.

(e) The use of liquid petroleum fueled smudge pots to prevent frost damage to crops.

(f) Ceremonial or celebratory bonfires where not otherwise prohibited by law, provided that only untreated wood or other agricultural products are used as fuel and the fire is not left unattended until extinguished.

(g) Small fires that are used to dispose of a flag or religious item, and small fires or other smoke producing process where not otherwise prohibited by law that are used in connection with a religious ceremony.

(h) Burning on an emergency basis of explosive or other dangerous or contraband materials by police or other public safety organization.

(i) Prescribed burns performed according to Part 194 of this Title.

(j) Fire training, including firefighting, fire rescue, and fire/arson investigation training, performed under applicable rules and guidelines of the New York State Department of State's Office of Fire Prevention and Control. For fire training performed on acquired structures, the structures must be emptied and stripped of any material that is toxic, hazardous or likely to emit toxic smoke (such as asbestos, asphalt shingles and vinyl siding or other vinyl products) prior to burning and must be at least 300 feet from other occupied structures. No more than one structure per lot or within a 300 foot radius (whichever is bigger) may be burned in a training exercise.

(k) Individual open fires as approved by the Director of the Division of Air Resources as may be required in response to an outbreak of a plant or animal disease upon request by the commissioner of the Department of Agriculture and Markets, or for the destruction of invasive plant and insect species.

(l) Individual open fires that are otherwise authorized under the environmental conservation law, or by rule or regulation of the Department.

**MANDATORY FEDERALLY ENFORCEABLE PERMIT CONDITIONS**

**SUBJECT TO ANNUAL CERTIFICATIONS ONLY IF APPLICABLE**

The following federally enforceable permit conditions are mandatory for all Title V permits and are subject to annual compliance certification requirements only if effectuated during the reporting period.

[NOTE: The corresponding annual compliance certification for those conditions not effectuated during the reporting period shall be specified as "not applicable".]

**Condition 10:** Maintenance of Equipment  
Effective between the dates of 01/19/2016 and 01/18/2021  

Applicable Federal Requirement: 6 NYCRR 200.7

**Item 10.1:** Any person who owns or operates an air contamination source which is equipped with an emission control device shall operate such device and keep it in a satisfactory state of maintenance and repair in accordance with ordinary and necessary practices, standards and procedures, inclusive of manufacturer's specifications, required to operate such device effectively.
Condition 11: Recycling and Salvage
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR 201-1.7

Item 11.1:
Where practical, the owner or operator of an air contamination source shall recycle or salvage air contaminants collected in an air cleaning device according to the requirements of the ECL.

Condition 12: Prohibition of Reintroduction of Collected Contaminants to the air
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR 201-1.8

Item 12.1:
No person shall unnecessarily remove, handle or cause to be handled, collected air contaminants from an air cleaning device for recycling, salvage or disposal in a manner that would reintroduce them to the outdoor atmosphere.

Condition 13: Exempt Sources - Proof of Eligibility
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR 201-3.2 (a)

Item 13.1:
The owner or operator of an emission source or activity that is listed as being exempt may be required to certify that it is operated within the specific criteria described in this Subpart. The owner or operator of any such emission source or activity must maintain all records necessary for demonstrating compliance with this Subpart on-site for a period of five years, and make them available to representatives of the department upon request.

Condition 14: Trivial Sources - Proof of Eligibility
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR 201-3.3 (a)

Item 14.1:
The owner or operator of an emission source or activity that is listed as being trivial in this Section may be required to certify that it is operated within the specific criteria described in this Subpart. The owner or operator of any such emission source or activity must maintain all required records on-site for a period of five years and make them available to representatives of the department upon request.

Condition 15: Requirement to Provide Information
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR 201-6.4 (a) (4)

Item 15.1:
The owner and/or operator shall furnish to the department, within a reasonable time, any
information that the department may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating the permit or to determine compliance with the permit. Upon request, the permittee shall also furnish to the department copies of records required to be kept by the permit or, for information claimed to be confidential, the permittee may furnish such records directly to the administrator along with a claim of confidentiality, if the administrator initiated the request for information or otherwise has need of it.

Condition 16: Right to Inspect
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR 201-6.4 (a) (8)

Item 16.1:
The department or an authorized representative shall be allowed upon presentation of credentials and other documents as may be required by law to:

(i) enter upon the permittee's premises where a facility subject to the permitting requirements of this Subpart is located or emissions-related activity is conducted, or where records must be kept under the conditions of the permit;

(ii) have access to and copy, at reasonable times, any records that must be kept under the conditions of the permit;

(iii) inspect at reasonable times any emission sources, equipment (including monitoring and air pollution control equipment), practices, and operations regulated or required under the permit; and

(iv) sample or monitor at reasonable times substances or parameters for the purpose of assuring compliance with the permit or applicable requirements.

Condition 17: Off Permit Changes
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR 201-6.4 (f) (6)

Item 17.1:
No permit revision will be required for operating changes that contravene an express permit term, provided that such changes would not violate applicable requirements as defined under this Part or contravene federally enforceable monitoring (including test methods), recordkeeping, reporting, or compliance certification permit terms and conditions. Such changes may be made without requiring a permit revision, if the changes are not modifications under any provision of title I of the act and the changes do not exceed the emissions allowable under the permit (whether expressed therein as a rate of emissions or in terms of total emissions) provided that the facility provides the administrator and the department with written notification as required below in advance of the proposed changes within a minimum of seven days. The facility owner or operator, and the department shall attach each such notice to their copy of the relevant permit.

(i) For each such change, the written notification required above shall include a brief description of the change within the permitted facility, the date on which the change will occur, any change in emissions, and any permit term or condition that is no longer applicable as a result of the
change.

(ii) The permit shield described in section 6 NYCRR 201-6.4 shall not apply to any change made pursuant to this paragraph.

Condition 18: Required Emissions Tests
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR 202-1.1

Item 18.1:
For the purpose of ascertaining compliance or non-compliance with any air pollution control code, rule or regulation, the commissioner may require the person who owns such air contamination source to submit an acceptable report of measured emissions within a stated time.

Condition 19: Accidental release provisions.
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 40 CFR Part 68

Item 19.1:
If a chemical is listed in Tables 1, 2, 3 or 4 of 40 CFR §68.130 is present in a process in quantities greater than the threshold quantity listed in Tables 1, 2, 3 or 4, the following requirements will apply:

a) The owner or operator shall comply with the provisions of 40 CFR Part 68 and;

b) The owner or operator shall submit at the time of permit issuance (if not previously submitted) one of the following, if such quantities are present:

1) A compliance schedule for meeting the requirements of 40 CFR Part 68 by the date provided in 40 CFR §68.10(a) or,

2) A certification statement that the source is in compliance with all requirements of 40 CFR Part 68, including the registration and submission of the Risk Management Plan. Information should be submitted to:

Risk Management Plan Reporting Center
C/O CSC
8400 Corporate Dr
Carrollton, Md. 20785

Condition 20: Recycling and Emissions Reduction
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 40 CFR 82, Subpart F

Item 20.1:
The permittee shall comply with all applicable provisions of 40 CFR Part 82.
The following conditions are subject to annual compliance certification requirements for Title V permits only.

Condition 21:  Emission Unit Definition
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR Subpart 201-6

Item 21.1:
The facility is authorized to perform regulated processes under this permit for:
Emission Unit: U-BOILR
Emission Unit Description:
Two (2) boilers with combined heat input capacity of 75.9 mmBtu/hr fired with either No. 6 fuel oil or natural gas.

Building(s): BOILERHOUS

Item 21.2:
The facility is authorized to perform regulated processes under this permit for:
Emission Unit: U-BROKE
Emission Unit Description:
Broke is processed for reuse in paper making operations.
It is first broken down using caustic and steam heat in a beater type mixer (PR 003) vented to emission point 00024.
Then, it is washed in a process also using caustic and steam heat in a beater type mixer (PR 004) vented to emission point 00025.

Building(s): EASTON MIL

Item 21.3:
The facility is authorized to perform regulated processes under this permit for:
Emission Unit: U-MIXRS
Emission Unit Description:
Chemical mixing exhaust system - includes one mixing tank (ES MIXR1) used for mixing of ingredients such as clay and titanium dioxide with liquid ingredients and vented to Emission Point No. 009A7.

Building(s): EASTON MIL

Item 21.4:
The facility is authorized to perform regulated processes under this permit for:
Emission Unit: U-PAPER
Emission Unit Description:
Paper making operations on Paper Machine Nos. 8, 9 and 10. This includes forming, drying and coating/saturating
of a paper or fabric web on each of the three machines. Paper Machine Nos. 8, 9 and 10 also have natural gas fired curing units to enhance sheet properties through additional drying.

Building(s): EASTON MIL

**Condition 22:** Progress Reports Due Semiannually
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR 201-6.4 (d) (4)

**Item 22.1:**
Progress reports consistent with an applicable schedule of compliance are to be submitted at least semiannually, or at a more frequent period if specified in the applicable requirement or by the department. Such progress reports shall contain the following:

(i) dates for achieving the activities, milestones, or compliance required in the schedule of compliance, and dates when such activities, milestones or compliance were achieved; and

(ii) an explanation of why any dates in the schedule of compliance were not or will not be met, and any preventive or corrective measures adopted.

**Condition 23:** Facility Permissible Emissions
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR Subpart 201-7

**Item 23.1:**
The sum of emissions from the emission units specified in this permit shall not equal or exceed the following Potential To Emit (PTE) rate for each regulated contaminant:

- CAS No: 007446-09-5  PTE: 338,000 pounds per year  
  Name: SULFUR DIOXIDE

- CAS No: 0NY210-00-0  PTE: 166,000 pounds per year  
  Name: OXIDES OF NITROGEN

**Condition 24:** Capping Monitoring Condition
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR Subpart 201-7

**Item 24.1:**
Under the authority of 6 NYCRR Part 201-7, this condition contains an emission cap for the purpose of limiting emissions from the facility, emission unit or process to avoid being subject to the following applicable requirement(s) that the facility, emission unit or process would otherwise be subject to:
Item 24.2:
Operation of this facility shall take place in accordance with the approved criteria, emission limits, terms, conditions and standards in this permit.

Item 24.3:
The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or law.

Item 24.4:
On an annual basis, unless otherwise specified below, beginning one year after the granting of an emissions cap, the responsible official shall provide a certification to the Department that the facility has operated all emission units within the limits imposed by the emission cap. This certification shall include a brief summary of the emissions subject to the cap for that time period and a comparison to the threshold levels that would require compliance with an applicable requirement.

Item 24.5:
The emission of pollutants that exceed the applicability thresholds for an applicable requirement, for which the facility has obtained an emissions cap, constitutes a violation of Part 201 and of the Act.

Item 24.6:
The Compliance Certification activity will be performed for the Facility.

Regulated Contaminant(s):
CAS No: 007446-09-5 SULFUR DIOXIDE

Item 24.7:
Compliance Certification shall include the following monitoring:

Capping: Yes
Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE
Monitoring Description:
Facility-wide emissions of SO2 shall not exceed 169 tons per year (338,000 lbs/yr) as determined by summing monthly SO2 emissions during any consecutive 12-month period.

Records shall be maintained on-site which demonstrate compliance with the SO2 emission cap. These records shall include the mass emissions totaled over each month, the total mass emissions over each rolling twelve (12) month period, fuel use (both No. 6 fuel oil and natural gas) and emission factors used in calculating emissions.

Monthly fuel usage quantities shall be used to calculate
corresponding monthly SO2 emissions according to the following formulas for the specific fuel burned:

Natural Gas:

\[ \text{SO2 (lbs/month)} = 6 \times 10^{-7} \text{ lbs/标准 cu. ft. x NG} \]

where NG is the amount of natural gas burned per month, in standard cubic feet

No. 6 Fuel Oil:

\[ \text{SO2 (lbs/month)} = 0.157S \text{ lbs/gallon x FO} \]

where FO is the gallons of No. 6 fuel oil burned per month; and

- S is the sulfur content of the No. 6 fuel oil burned, \%
  (assumed to be 1.5\% unless documentation shows otherwise)

Parameter Monitored: SULFUR DIOXIDE
Upper Permit Limit: 169 tons per year
Monitoring Frequency: MONTHLY
Averaging Method: ANNUAL MAXIMUM ROLLED MONTHLY
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2016.
Subsequent reports are due every 6 calendar month(s).

**Condition 25: Capping Monitoring Condition**
**Effective between the dates of 01/19/2016 and 01/18/2021**

**Applicable Federal Requirement:** 6 NYCRR Subpart 201-7

**Item 25.1:**
Under the authority of 6 NYCRR Part 201-7, this condition contains an emission cap for the purpose of limiting emissions from the facility, emission unit or process to avoid being subject to the following applicable requirement(s) that the facility, emission unit or process would otherwise be subject to:

- 6 NYCRR Subpart 227-2
- 6 NYCRR Subpart 231-2
- 40 CFR 52.21

**Item 25.2:**
Operation of this facility shall take place in accordance with the approved criteria, emission limits, terms, conditions and standards in this permit.
Item 25.3:
The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or law.

Item 25.4:
On an annual basis, unless otherwise specified below, beginning one year after the granting of an emissions cap, the responsible official shall provide a certification to the Department that the facility has operated all emission units within the limits imposed by the emission cap. This certification shall include a brief summary of the emissions subject to the cap for that time period and a comparison to the threshold levels that would require compliance with an applicable requirement.

Item 25.5:
The emission of pollutants that exceed the applicability thresholds for an applicable requirement, for which the facility has obtained an emissions cap, constitutes a violation of Part 201 and of the Act.

Item 25.6:
The Compliance Certification activity will be performed for the Facility.

</table>

Item 25.7:
Compliance Certification shall include the following monitoring:

Capping: Yes
Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:

On an annual basis, the responsible official shall provide a certification to the Department that the facility has operated all emission units within the limits imposed by the emissions caps. This certification shall include the following information for each of the twelve (12) consecutive months of the previous year:

1. the amount of fuel used (both No. 6 fuel oil and natural gas);

2. SO2 and NOx emissions generated, in pounds/month;

3. the rolling annual total of SO2 and NOx emissions, in tons per year; and

4. the threshold levels to which the annual totals are being compared.
Monitoring Frequency: MONTHLY
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2016.
Subsequent reports are due every 12 calendar month(s).

Condition 26: Capping Monitoring Condition
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR Subpart 201-7

Item 26.1:
Under the authority of 6 NYCRR Part 201-7, this condition contains an emission cap for the purpose of limiting emissions from the facility, emission unit or process to avoid being subject to the following applicable requirement(s) that the facility, emission unit or process would otherwise be subject to:

- 6 NYCRR Subpart 227-2
- 6 NYCRR Subpart 231-2
- 40 CFR 52.21

Item 26.2:
Operation of this facility shall take place in accordance with the approved criteria, emission limits, terms, conditions and standards in this permit.

Item 26.3:
The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or law.

Item 26.4:
On an annual basis, unless otherwise specified below, beginning one year after the granting of an emissions cap, the responsible official shall provide a certification to the Department that the facility has operated all emission units within the limits imposed by the emission cap. This certification shall include a brief summary of the emissions subject to the cap for that time period and a comparison to the threshold levels that would require compliance with an applicable requirement.

Item 26.5:
The emission of pollutants that exceed the applicability thresholds for an applicable requirement, for which the facility has obtained an emissions cap, constitutes a violation of Part 201 and of the Act.

Item 26.6:
The Compliance Certification activity will be performed for the Facility.

Regulated Contaminant(s):
CAS No: 0NY210-00-0  OXIDES OF NITROGEN

Item 26.7:
Compliance Certification shall include the following monitoring:

Capping: Yes

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE

Monitoring Description:
Facility-wide emissions of NOx shall not exceed 83 tons per year (166,000 lbs/yr) as determined by summing monthly NOx emissions during any consecutive 12-month period.

Records shall be maintained on-site which demonstrate compliance with the NOx emission cap. These records shall include the mass emissions totaled over each month, the total mass emissions over each rolling twelve (12) month period, fuel use (both No. 6 fuel oil and natural gas) and emission factors used in calculating emissions.

Monthly fuel usage quantities shall be used to calculate corresponding monthly NOx emissions according to the following formulas for the specific fuel burned:

Natural Gas:

\[ \text{NOx (lbs/month)} = 0.0001 \text{ lbs/ std. cu. ft} \times \text{NG} \]

where NG is the amount of natural gas burned per month, in standard cubic feet

No. 6 Fuel Oil:

\[ \text{NOx (lbs/month)} = 5 \times 10^{-7} \text{ lbs/ BTU} \times 153,300 \text{ BTU/gal} \times \text{FO} \]

where FO is the number of gallons of No. 6 fuel oil burned per month

Parameter Monitored: OXIDES OF NITROGEN
Upper Permit Limit: 83 tons per year
Monitoring Frequency: MONTHLY
Averaging Method: ANNUAL MAXIMUM ROLLED MONTHLY
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period. The initial report is due 7/30/2016.
Subsequent reports are due every 6 calendar month(s).

**Condition 27:** Air pollution prohibited
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement:6 NYCRR 211.1
Item 27.1:
No person shall cause or allow emissions of air contaminants to the outdoor atmosphere of such quantity, characteristic or duration which are injurious to human, plant or animal life or to property, or which unreasonably interfere with the comfortable enjoyment of life or property. Notwithstanding the existence of specific air quality standards or emission limits, this prohibition applies, but is not limited to, any particulate, fume, gas, mist, odor, smoke, vapor, pollen, toxic or deleterious emission, either alone or in combination with others.

Condition 28: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR 212-1.5 (d)

Item 28.1:
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

- Emission Unit: U-PAPER
- Process: AAA
- Emission Source: 00PM8

Regulated Contaminant(s):
- CAS No: 000050-00-0 FORMALDEHYDE

Item 28.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE

Monitoring Description:
Source owner shall limit annual emissions of formaldehyde from Paper Machine Nos. 8, 9 & 10 to a total of 7,170 lbs. or less, during any twelve (12) consecutive months, rolled monthly, with no more than 420 lbs. of the total contributed by Paper Machine No. 8.

The formulations run on each paper machine shall be monitored and recorded along with the time, date and duration of the run, in order to document that this annual emission limit is not exceeded. This record shall include, for each month, acceptable calculations of the pounds of formaldehyde emitted from Paper Machine No. 8 alone and the overall total from the emission unit for that month, as well as the total amounts emitted from Paper Machine No. 8 and the overall total for the past consecutive twelve (12) months. Each consecutive twelve (12) month total must meet the applicable limits stated above.

Parameter Monitored: FORMALDEHYDE
Upper Permit Limit: 420 pounds  
Monitoring Frequency: MONTHLY  
Averaging Method: ANNUAL MAXIMUM ROLLED MONTHLY  
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)  
Reports due 30 days after the reporting period.  
The initial report is due 7/30/2016.  
Subsequent reports are due every 6 calendar month(s).

**Condition 29:** Compliance Certification  
Effective between the dates of 01/19/2016 and 01/18/2021  

**Applicable Federal Requirement:** 6 NYCRR 212-1.5 (d)

**Item 29.1:** The Compliance Certification activity will be performed for the facility:  
The Compliance Certification applies to:

- Emission Unit: U-PAPER  
  Process: 016  
  Emission Source: DRY10

- Emission Unit: U-PAPER  
  Process: 017  
  Emission Source: DRY9

- Emission Unit: U-PAPER  
  Process: AAA  
  Emission Source: 00PM8

Regulated Contaminant(s):  
CAS No: 000050-00-0 FORMALDEHYDE

**Item 29.2:** Compliance Certification shall include the following monitoring:

**Monitoring Type:** MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE  
**Monitoring Description:**  
Source owner shall limit annual emissions of formaldehyde from Paper Machine Nos. 8, 9 & 10 to a total of 7,170 lbs. or less, during any twelve (12) consecutive months, rolled monthly, with no more than 420 lbs. of the total contributed by Paper Machine No. 8.

The formulations run on each paper machine shall be monitored and recorded along with the time, date and duration of the run, in order to document that this annual emission limit is not exceeded. This record shall include, for each month, acceptable calculations of the pounds of formaldehyde emitted from Paper Machine No. 8 alone and the overall total from the emission unit for that month, as well as the total amounts emitted from Paper Machine No. 8 and the overall total for the past consecutive twelve (12) months. Each consecutive twelve (12) month total must meet the applicable limits stated.
Parameter Monitored: FORMALDEHYDE  
Upper Permit Limit: 7170 pounds  
Monitoring Frequency: MONTHLY  
Averaging Method: ANNUAL MAXIMUM ROLLED MONTHLY  
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)  
Reports due 30 days after the reporting period.  
The initial report is due 7/30/2016.  
Subsequent reports are due every 6 calendar month(s).

**Condition 30:**  
**Compliance Certification**  
Effective between the dates of 01/19/2016 and 01/18/2021

**Applicable Federal Requirement:** 6 NYCRR 212-1.5 (e) (2)

**Item 30.1:**  
The Compliance Certification activity will be performed for the facility:  
The Compliance Certification applies to:

- **Emission Unit:** U-PAPER  
- **Process:** AAA  
- **Emission Source:** 00PM8  
- **Regulated Contaminant(s):**  
  - **CAS No:** 000050-00-0  
  - **FORMALDEHYDE**

**Item 30.2:**  
Compliance Certification shall include the following monitoring:

**Monitoring Type:** MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE

**Monitoring Description:**  
Source owner shall limit hourly emission rate of formaldehyde from Paper Machine Nos. 8, 9 & 10 to a total of 1.85 lbs. or less, with no more than 0.15 lbs. of the total contributed by Paper Machine No. 8. These limits apply at all times including periods of R & D activities.

The formulations being run on each paper machine shall be monitored and recorded along with the time, date and duration of the run, in order to document that these hourly emission limits are not exceeded. This record shall include acceptable calculations of the formaldehyde emission rates from Paper Machine No. 8 alone and the overall total from the emission unit for each hour that the facility is operating. Each hourly emission rate must meet the applicable limit as stated above.

Parameter Monitored: FORMALDEHYDE  
Upper Permit Limit: 0.15 pounds per hour  
Monitoring Frequency: PER BATCH OF PRODUCT/RAW MATERIAL
CHANGE

Averaging Method: 1 HOUR MAXIMUM - NOT TO BE EXCEEDED AT ANY TIME

Reporting Requirements: SEMI-ANNUALLY (CALENDAR)

Reports due 30 days after the reporting period.
The initial report is due 7/30/2016.
Subsequent reports are due every 6 calendar month(s).

Condition 31: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR 212-1.5 (e) (2)

Item 31.1:
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

Regulated Contaminant(s):
CAS No: 000050-00-0 FORMALDEHYDE

Item 31.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE

Monitoring Description:
Source owner shall limit hourly emission rate of formaldehyde from Paper Machine Nos. 8, 9 & 10 to a total of 1.85 lbs. or less, with no more than 0.15 lbs. of the total contributed by Paper Machine No. 8. These limits apply at all times including periods of R & D activities.

The formulations being run on each paper machine shall be monitored and recorded along with the time, date and duration of the run, in order to document that these hourly emission limits are not exceeded. This record shall include acceptable calculations of the formaldehyde emission rates from Paper Machine No. 8 alone and the overall total from the emission unit for each hour that the facility is operating. Each hourly emission rate must meet the applicable limit as stated above.
Parameter Monitored: FORMALDEHYDE
Upper Permit Limit: 1.85 pounds per hour
Monitoring Frequency: PER BATCH OF PRODUCT/RAW MATERIAL
Averaging Method: 1 HOUR MAXIMUM - NOT TO BE EXCEEDED AT ANY TIME
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2016.
Subsequent reports are due every 6 calendar month(s).

**Condition 32: Compliance Certification**
Effective between the dates of 01/19/2016 and 01/18/2021

**Applicable Federal Requirement:** 6 NYCRR 212-1.6 (a)

**Item 32.1:**
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

- Emission Unit: U-BROKE
- Emission Unit: U-MIXRS
- Emission Unit: U-PAPER

**Item 32.2:**
Compliance Certification shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE

Monitoring Description:
No person shall cause or allow emissions having an average opacity during any six consecutive minutes of 20 percent or greater from any process emission source, except only the emission of uncombined water. The Department reserves the right to perform or require the performance of a Method 9 opacity evaluation at any time during facility operation.
The permittee will conduct observations of visible emissions from the emission unit, process, etc. to which this condition applies at the monitoring frequency stated below while the process is in operation. The permittee will investigate, in a timely manner, any instance where there is cause to believe that visible emissions have the potential to exceed the opacity standard.
The permittee shall investigate the cause, make any necessary corrections, and verify that the excess visible emissions problem has been corrected. If visible emissions with the potential to exceed the standard continue, the permittee will conduct a Method 9 assessment within the next operating day of the sources associated...
with the potential noncompliance to determine the degree of opacity and will notify the NYSDEC if the method 9 test indicates that the opacity standard is not met.
Records of visible emissions observations (or any follow-up method 9 tests), investigations and corrective actions will be kept on-site. Should the Department determine that permittee’s record keeping format is inadequate to demonstrate compliance with this condition, it shall provide written notice to the permittee stating the inadequacies, and permittee shall have 90 days to revise its prospective record keeping format in a manner acceptable to the Department.
This monitoring activity also serves to demonstrate compliance or noncompliance with opacity requirements for coating lines specified in 6NYCRR 228-1.3(a).

Parameter Monitored: OPACITY
Upper Permit Limit: 20 percent
Reference Test Method: Method 9
Monitoring Frequency: DAILY
Averaging Method: 6 MINUTE AVERAGE
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2016.
Subsequent reports are due every 6 calendar month(s).

**Condition 33:** Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR 212-2.1 (b)

**Item 33.1:**
The Compliance Certification activity will be performed for the Facility.

**Item 33.2:**
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
Emissions of air contaminants to the outdoor atmosphere from any process emission source or emission point are restricted for any air contaminant not listed on Table 2. Unless it is a solid particulate described in subdivision (c) of this Section, then the facility owner or operator shall not allow emissions of an air contaminant to violate the requirements specified in Subdivision 212-2.3(a), Table 3 Degree of Air Cleaning Required for Criteria Air Contaminants, or Subdivision 212-2.3(b), Table 4 – Degree of Air Cleaning Required for Non-Criteria Air Contaminants, as applicable, for the environmental rating assigned to the contaminant by the department.
Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2016.
Subsequent reports are due every 6 calendar month(s).

Condition 34: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR 225-1.2 (e)

Item 34.1:
The Compliance Certification activity will be performed for the Facility.

Item 34.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: WORK PRACTICE INVOLVING SPECIFIC OPERATIONS
Monitoring Description:
Owners and/or operators of any stationary combustion installation that fires residual oil are limited to the purchase of residual oil with a sulfur content of 0.50% sulfur on or after July 1, 2014 and to the firing of residual oil with a sulfur content of 0.50% on or after July 1, 2016.

Data collected pursuant to this Subpart must be tabulated and summarized in a form acceptable to the Department, and must be retained for at least five years. The owner of a Title V facility must furnish to the Department such records and summaries, on a semiannual calendar basis, within 30 days after the end of the semiannual period. All other facility owners or distributors must submit these records and summaries upon request of the Department.

Work Practice Type: PARAMETER OF PROCESS MATERIAL
Process Material: RESIDUAL FUEL (#4, #5 AND/OR #6 FUEL OIL)
Parameter Monitored: SULFUR CONTENT
Upper Permit Limit: 0.50 percent by weight
Monitoring Frequency: PER DELIVERY
Averaging Method: MAXIMUM - NOT TO BE EXCEEDED AT ANY TIME (INSTANTANEOUS/DISCRETE OR GRAB)
Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 35: Surface Coating - Handling, Storage and Disposal
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR 228-1.3 (d)
Item 35.1: This Condition applies to:

- Emission Unit: UPAPER  
  Process: 016

- Emission Unit: UPAPER  
  Process: 017

- Emission Unit: UPAPER  
  Process: AAA

Item 35.2: Within the work area(s) associated with a coating line, the owner or operator of a facility must:

1. use closed, non-leaking containers to store or dispose of cloth or other absorbent applicators impregnated with VOC solvents that are used for surface preparation, cleanup or coating removal;

2. store in closed, non-leaking containers spent or fresh VOC solvents to be used for surface preparation, cleanup or coating removal;

3. not use VOC solvents to clean spray equipment unless equipment is used to collect the cleaning compounds and to minimize VOC evaporation;

Condition 36: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR 228-1.4 (d) (2)

Item 36.1: The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

- Emission Unit: U-PAPER  
  Process: 016  
  Emission Source: 0DRY9

- Emission Unit: U-PAPER  
  Process: 017  
  Emission Source: 0DRY9

Item 36.2: Compliance Certification shall include the following monitoring:

Monitoring Type: WORK PRACTICE INVOLVING SPECIFIC OPERATIONS

Monitoring Description: 
The facility applying coatings to magnet wire, metal cans, coils, vinyl and fabric may not use coatings with VOC contents, as applied, which exceed the limits specified in table D-1. The units in table D-1 are in...
terms of pounds of VOC per gallon of coating (minus water and excluded compounds) at application.

Work Practice Type: PARAMETER OF PROCESS MATERIAL  
Process Material: COATING  
Parameter Monitored: VOC CONTENT  
Upper Permit Limit: 2.9 pounds per gallon  
Monitoring Frequency: PER BATCH OF PRODUCT/RAW MATERIAL CHANGE  
Averaging Method: MAXIMUM - NOT TO BE EXCEEDED AT ANY TIME (INSTANTANEOUS/DISCRETE OR GRAB)  
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)  
Reports due 30 days after the reporting period.  
The initial report is due 7/30/2016.  
Subsequent reports are due every 6 calendar month(s).

Condition 37:  
Compliance Certification  
Effective between the dates of 01/19/2016 and 01/18/2021  
Applicable Federal Requirement: 6 NYCRR 228-1.4 (d) (3)

Item 37.1:  
The Compliance Certification activity will be performed for the facility:  
The Compliance Certification applies to:

- Emission Unit: U-PAPER  
  Process: 016  
  Emission Source: 0DRY9

- Emission Unit: U-PAPER  
  Process: 016  
  Emission Source: DRY10

- Emission Unit: U-PAPER  
  Process: 017  
  Emission Source: 0DRY9

- Emission Unit: U-PAPER  
  Process: AAA  
  Emission Source: 00PM8

Item 37.2:  
Compliance Certification shall include the following monitoring:

Monitoring Type: WORK PRACTICE INVOLVING SPECIFIC OPERATIONS  
Monitoring Description:  
The facility applying coatings to paper film and foil may not use coatings with VOC contents, as applied, which exceed the limits specified in table D-2. The units in table D-2 are in terms of weight of VOC per weight of coating applied.

Work Practice Type: PARAMETER OF PROCESS MATERIAL  
Process Material: COATING  
Parameter Monitored: VOC CONTENT
Upper Permit Limit: 0.08 kilograms VOC per kilogram as applied
Monitoring Frequency: PER BATCH OF PRODUCT/RAW MATERIAL CHANGE
Averaging Method: MAXIMUM - NOT TO BE EXCEEDED AT ANY TIME (INSTANTANEOUS/DISCRETE OR GRAB)
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2016. Subsequent reports are due every 6 calendar month(s).

Condition 38: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021
Applicable Federal Requirement: 40CFR 63.7495(b), Subpart DDDDD

Item 38.1:
The Compliance Certification activity will be performed for the Facility.

Item 38.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
Facilities that are major sources of hazardous air pollutants (HAPs) that have industrial, commercial or institutional boilers must comply with 40 CFR 63 Subpart DDDDD by January 31, 2016.

Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 39: Notification requirements
Effective between the dates of 01/19/2016 and 01/18/2021
Applicable Federal Requirement: 40CFR 63.7495(d), Subpart DDDDD

Item 39.1:
The owner or operator of an affected boiler must meet the notification requirements in 40 CFR 63.7545 according to the schedule in 40 CFR 63.7545 and in 40 CFR 63 subpart A. Some of the notifications must be submitted before the owner or operator is required to comply with the emission limits and work practice standards in subpart DDDDD.

Condition 40: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021
Applicable Federal Requirement: 40CFR 63.7500(a)(1), Subpart DDDDD

Item 40.1:
The Compliance Certification activity will be performed for the Facility.

Item 40.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
Boilers with a heat input capacity of 10 million Btu per hour or greater must conduct an annual tune-up as specified in 40 CFR 63.7540(a)(10) and must be conducted no more than 13 months after the previous tune-up. New or reconstructed boilers must conduct the first annual tune-up no later than 13 months after the initial startup of the affected source.

Monitoring Frequency: ANNUALLY
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2016.
Subsequent reports are due every 6 calendar month(s).

**Condition 41:** Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 40CFR 63.7500(a)(1), Subpart DDDD

**Item 41.1:**
The Compliance Certification activity will be performed for the Facility.

Regulated Contaminant(s):
CAS No: 000630-08-0 CARBON MONOXIDE

**Item 41.2:**
Compliance Certification shall include the following monitoring:

Monitoring Type: INTERMITTENT EMISSION TESTING
Monitoring Description:
The owner or operator of an existing industrial, commercial, or institutional heavy liquid fuel-fired boiler with heat input capacity of 10 million Btu per hour or greater located at a major source of HAP emissions must limit the concentration of carbon monoxide emissions.

The concentration limit for carbon monoxide is 130 ppmvd or less corrected to 3% oxygen based on the average of three runs. Each run must be for at least one hour.

The performance stack test must be conducted at the representative operating load conditions while burning the type of fuel or mixture of fuels that have the highest emissions potential for each regulated pollutant. The owner or operator of an industrial, commercial, or institutional boiler that demonstrates compliance with a
The performance stack test must maintain the operating load of each unit such that it does not exceed 110 percent of the highest hourly average operating load recorded during the most recent performance stack test.

The facility must also meet the applicable operating limits listed in table 4 of subpart DDDDD.

Initial compliance will be demonstrated according to the provisions in 40 CFR 63.7530.

Subsequent performance tests will be required as specified in 40 CFR 63.7515, which requires performance tests to be conducted on an annual basis, no more than 13 months after the previous performance test. Testing can be reduced if the requirements in 40 CFR 63.7515 are followed.

Continuous compliance will then be demonstrated according to 40 CFR 63.7540. The facility must submit notifications and reports and keep records and according to the provisions in 40 CFR 63.7545, 7550, and 7555.

Parameter Monitored: CARBON MONOXIDE
Upper Permit Limit: 130 parts per million by volume
(dry, corrected to 3% oxygen)
Reference Test Method: see table 5.5 of subpart DDDDD
Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Averaging Method: AVERAGING METHOD - SEE MONITORING DESCRIPTION
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2016.
Subsequent reports are due every 6 calendar month(s).

Condition 42: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 40 CFR 63.7500(a)(1), Subpart DDDDD

Item 42.1:
The Compliance Certification activity will be performed for the Facility.

Regulated Contaminant(s):
CAS No: 0NY075-00-0 PARTICULATES

Item 42.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: INTERMITTENT EMISSION TESTING
Monitoring Description:
The owner or operator of an existing industrial, commercial, or institutional heavy liquid fuel-fired boiler with heat input capacity of 10 million Btu per hour or greater located at a major source of HAP emissions must limit the concentration of filterable particulate matter emissions.

The concentration limit for filterable particulate matter is 0.062 lb/mmBtu of heat input or less based on the average of three runs. Each run must collect a minimum of one dry standard cubic meter.

The performance stack test must be conducted at the representative operating load conditions while burning the type of fuel or mixture of fuels that have the highest emissions potential for each regulated pollutant. The owner or operator of an industrial, commercial, or institutional boiler that demonstrates compliance with a performance stack test must maintain the operating load of each unit such that it does not exceed 110 percent of the highest hourly average operating load recorded during the most recent performance stack test.

The facility must also meet the applicable operating limits listed in table 4 of subpart DDDDD.

Initial compliance will be demonstrated according to the provisions in 40 CFR 63.7530.

Subsequent performance tests will be required as specified in 40 CFR 63.7515, which requires performance tests to be conducted on an annual basis, no more than 13 months after the previous performance test. Testing can be reduced if the requirements in 40 CFR 63.7515 are followed.

Continuous compliance will then be demonstrated according to 40 CFR 63.7540. The facility must submit notifications and reports and keep records and according to the provisions in 40 CFR 63.7545, 7550, and 7555.

Upper Permit Limit: 0.062 pounds per million Btus
Reference Test Method: see table 5.1 of subpart DDDDD
Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Averaging Method: AVERAGING METHOD - SEE MONITORING DESCRIPTION
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2016.
Subsequent reports are due every 6 calendar month(s).
Condition 43: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 40 CFR 63.7500(a)(1), Subpart DDDDD

Item 43.1:
The Compliance Certification activity will be performed for the Facility.

Regulated Contaminant(s):
CAS No: 0NY507-00-0
40 CFR 63 SUBPART DDDDD TOTAL SELECTED METALS

Item 43.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: INTERMITTENT EMISSION TESTING
Monitoring Description:
The owner or operator of an existing industrial, commercial, or institutional heavy liquid fuel-fired boiler with heat input capacity of 10 million Btu per hour or greater located at a major source of HAP emissions must limit the concentration of total selected metal (TSM) emissions. TSM consists of the sum of the following metallic hazardous air pollutants: arsenic, beryllium, cadmium, chromium, lead, manganese, nickel, and selenium.

The concentration limit for TSM is 0.00020 lb/mmBtu of heat input or less based on the average of three runs. Each run must collect a minimum of one dry standard cubic meter.

The performance stack test must be conducted at the representative operating load conditions while burning the type of fuel or mixture of fuels that have the highest emissions potential for each regulated pollutant. The owner or operator of an industrial, commercial, or institutional boiler that demonstrates compliance with a performance stack test must maintain the operating load of each unit such that it does not exceed 110 percent of the highest hourly average operating load recorded during the most recent performance stack test.

The facility must also meet the applicable operating limits listed in table 4 of subpart DDDDD.

Initial compliance will be demonstrated according to the provisions in 40 CFR 63.7530.

Subsequent performance tests will be required as specified in 40 CFR 63.7515, which requires performance tests to be conducted on an annual basis, no more than 13 months after
the previous performance test. Testing can be reduced if the requirements in 40 CFR 63.7515 are followed.

Continuous compliance will then be demonstrated according to 40 CFR 63.7540. The facility must submit notifications and reports and keep records and according to the provisions in 40 CFR 63.7545, 7550, and 7555.

Upper Permit Limit: 0.00020 pounds per million Btus
Reference Test Method: see table 5.2 of subpart DDDDD
Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Averaging Method: AVERAGING METHOD - SEE MONITORING DESCRIPTION
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2016.
Subsequent reports are due every 6 calendar month(s).

**Condition 44: Compliance Certification**
**Effective between the dates of 01/19/2016 and 01/18/2021**

**Applicable Federal Requirement:** 40CFR 63.7500(a)(1), Subpart DDDDD

**Item 44.1:**
The Compliance Certification activity will be performed for the Facility.

Regulated Contaminant(s):
CAS No: 007647-01-0 HYDROGEN CHLORIDE

**Item 44.2:**
Compliance Certification shall include the following monitoring:

Monitoring Type: INTERMITTENT EMISSION TESTING
Monitoring Description:
The owner or operator of an existing industrial, commercial, or institutional liquid fuel-fired boiler with heat input capacity of 10 million Btu per hour or greater located at a major source of HAP emissions must limit the concentration of hydrogen chloride emissions.

The concentration limit for hydrogen chloride is 0.0011 lb/mmBtu of heat input or less based on the average of three runs. If using method 26A, each run must collect a minimum of two dry standard cubic meters and if using method 26 each run must collect a minimum of 240 liters.

The performance stack test must be conducted at the representative operating load conditions while burning the type of fuel or mixture of fuels that have the highest
emissions potential for each regulated pollutant. The owner or operator of an industrial, commercial, or institutional boiler that demonstrates compliance with a performance stack test must maintain the operating load of each unit such that is does not exceed 110 percent of the highest hourly average operating load recorded during the most recent performance stack test.

The facility must also meet the applicable operating limits listed in table 4 of subpart DDDDD.

Initial compliance will be demonstrated according to the provisions in 40 CFR 63.7530.

Subsequent performance tests will be required as specified in 40 CFR 63.7515, which requires performance tests to be conducted on an annual basis, no more than 13 months after the previous performance test. Testing can be reduced if the requirements in 40 CFR 63.7515 are followed.

Continuous compliance will then be demonstrated according to 40 CFR 63.7540. The facility must submit notifications and reports and keep records and according to the provisions in 40 CFR 63.7545, 7550, and 7555.

Parameter Monitored: HYDROGEN CHLORIDE
Upper Permit Limit: 0.0011 pounds per million Btus
Reference Test Method: see table 5.3 of subpart DDDDD
Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Averaging Method: AVERAGING METHOD - SEE MONITORING DESCRIPTION
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2016.
Subsequent reports are due every 6 calendar month(s).

Condition 45: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021
Applicable Federal Requirement: 40CFR 63.7500(a)(1), Subpart DDDDD

Item 45.1: The Compliance Certification activity will be performed for the Facility.

Regulated Contaminant(s):
CAS No: 007439-97-6 MERCURY

Item 45.2: Compliance Certification shall include the following monitoring:
Monitoring Type: INTERMITTENT EMISSION TESTING

Monitoring Description:

The owner or operator of an existing industrial, commercial, or institutional liquid fuel-fired boiler with heat input capacity of 10 million Btu per hour or greater located at a major source of HAP emissions must limit the concentration of mercury emissions.

The concentration limit for mercury is 0.0000020 (2.0E-06) lb/mmBtu of heat input or less based on the average of three runs. If using method 29, each run must collect a minimum of three dry standard cubic meters, if using method 30A or B, each run must collect a minimum sample volume as specified in the method, and if using ASTM D6784 each run must collect a minimum of two dry standard cubic meters.

The performance stack test must be conducted at the representative operating load conditions while burning the type of fuel or mixture of fuels that have the highest emissions potential for each regulated pollutant. The owner or operator of an industrial, commercial, or institutional boiler that demonstrates compliance with a performance stack test must maintain the operating load of each unit such that is does not exceed 110 percent of the highest hourly average operating load recorded during the most recent performance stack test.

The facility must also meet the applicable operating limits listed in table 4 of subpart DDDDD.

Initial compliance will be demonstrated according to the provisions in 40 CFR 63.7530.

Subsequent performance tests will be required as specified in 40 CFR 63.7515, which requires performance tests to be conducted on an annual basis, no more than 13 months after the previous performance test. Testing can be reduced if the requirements in 40 CFR 63.7515 are followed.

Continuous compliance will then be demonstrated according to 40 CFR 63.7540. The facility must submit notifications and reports and keep records and according to the provisions in 40 CFR 63.7545, 7550, and 7555.

Parameter Monitored: MERCURY
Upper Permit Limit: 0.0000020 pounds per million Btus
Reference Test Method: see table 5.4 of subpart DDDDD
Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Averaging Method: AVERAGING METHOD - SEE MONITORING
DESCRIPTION
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2016.
Subsequent reports are due every 6 calendar month(s).

Condition 46: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 40CFR 63.7500(a)(2), Subpart DDDDD

Item 46.1:
The Compliance Certification activity will be performed for the Facility.

Item 46.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
The owner or operator of an industrial, commercial, or institutional boiler with an oxygen analyzer system to demonstrate compliance with a carbon monoxide emission limit must maintain the 30-day rolling average oxygen level of the stack gas such that it is not below the lowest required hourly average oxygen concentration measured during the most recent CO performance test. This requirement does not apply to units that install an oxygen trim system since these units will set the trim system to the level specified in 40 CFR 63.7525(a).

This limit will be established according to Table 7 of subpart DDDDD and compliance will be demonstrated according to Table 8 of subpart DDDDD.

Monitoring Frequency: CONTINUOUS
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2016.
Subsequent reports are due every 6 calendar month(s).

Condition 47: Good air pollution control practices
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 40CFR 63.7500(a)(3), Subpart DDDDD

Item 47.1:
At all times, the owner or operator must operate and maintain any affected source, including associated air pollution control equipment and monitoring equipment, in a manner consistent with safety and good air pollution control practices for minimizing emissions. Determination of whether such operation and maintenance procedures are being used will be based on information available to the Administrator that may include, but is not limited to, monitoring results, review
of operation and maintenance procedures, review of operation and maintenance records, and inspection of the source.

**Condition 48: Compliance Certification**

Effect: between the dates of 01/19/2016 and 01/18/2021

**Applicable Federal Requirement:** 40CFR 63.7505(d), Subpart DDDDD

**Item 48.1:**
The Compliance Certification activity will be performed for the Facility.

**Item 48.2:**
Compliance Certification shall include the following monitoring:

- **Monitoring Type:** RECORD KEEPING/MAINTENANCE PROCEDURES
- **Monitoring Description:** Owners and operators demonstrating compliance with any applicable emission limit through performance testing and subsequent compliance with operating limits (including the use of CPMS), or with a CEMS, or COMS must develop a site-specific monitoring plan according to the requirements in paragraphs (1) through (4) for the use of any CEMS, COMS, or CPMS. This requirement also applies to the owner or operator if he/she petitions the EPA Administrator for alternative monitoring parameters under 40 CFR 63.8(f).

1. For each CMS required in this section (including CEMS, COMS, or CPMS), the owner or operator must develop, and submit to the Administrator for approval upon request, a site-specific monitoring plan that addresses design, data collection, and the quality assurance and quality control elements outlined in 40 CFR 63.8(d) and the elements described in paragraphs (i) through (iii). The owner or operator must submit this site-specific monitoring plan, if requested, at least 60 days before his/her initial performance evaluation of the CMS. This requirement to develop and submit a site-specific monitoring plan does not apply to affected sources with existing CEMS or COMS operated according to the performance specifications under appendix B to part 60 and that meet the requirements of 40 CFR 63.7525. Using the process described in 40 CFR 63.8(f)(4), the owner or operator may request approval of alternative monitoring system quality assurance and quality control procedures in place of those specified in this paragraph and, if approved, include the alternatives in his/her site-specific monitoring plan.

(i) Installation of the CMS sampling probe or other interface at a measurement location relative to each affected process unit such that the measurement is representative of control of the exhaust emissions (e.g.,
on or downstream of the last control device);

(ii) Performance and equipment specifications for the sample interface, the pollutant concentration or parametric signal analyzer, and the data collection and reduction systems; and

(iii) Performance evaluation procedures and acceptance criteria (e.g., calibrations, accuracy audits, analytical drift).

(2) In the site-specific monitoring plan, the owner or operator must also address paragraphs (i) through (iii).

(i) Ongoing operation and maintenance procedures in accordance with the general requirements of 40 CFR 63.8(c)(1)(ii), (c)(3), and (c)(4)(ii);

(ii) Ongoing data quality assurance procedures in accordance with the general requirements of 40 CFR 63.8(d); and

(iii) Ongoing recordkeeping and reporting procedures in accordance with the general requirements of 40 CFR 63.10(c) (as applicable in Table 10 subpart DDDDD), (e)(1), and (e)(2)(i).

(3) The owner or operator must conduct a performance evaluation of each CMS in accordance with the site-specific monitoring plan.

(4) The owner or operator must operate and maintain the CMS in continuous operation according to the site-specific monitoring plan.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 49: Initial compliance date for existing sources
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 40 CFR 63.7510(e), Subpart DDDDD

Item 49.1:

The owner or operator of an existing affected sources (as defined in 40 CFR 63.7490) must complete the initial compliance demonstration, as specified in 40 CFR 63.7510(a) through (d), no later than 180 days after the compliance date that is specified for his/her source in 40 CFR 63.7495 and according to the applicable provisions in 40 CFR 63.7(a)(2) as cited in Table 10 to subpart DDDDD, except as specified in 40 CFR 63.7510(j). The owner or operator must
complete an initial tune-up by following the procedures described in 40 CFR 63.7540(a)(10)(i) through (vi) no later than the compliance date specified in 40 CFR 63.7495, except as specified in 40 CFR 63.7510(j). The owner or operator must complete the one-time energy assessment specified in Table 3 to subpart DDDD no later than the compliance date specified in 40 CFR 63.7495, except as specified in 40 CFR 63.7510(j).

**Condition 50: Compliance Certification**

**Effective between the dates of 01/19/2016 and 01/18/2021**

**Applicable Federal Requirement:** 40 CFR 63.7525(d), Subpart DDDD

**Item 50.1:**
The Compliance Certification activity will be performed for the Facility.

**Item 50.2:**
Compliance Certification shall include the following monitoring:

- **Monitoring Type:** RECORD KEEPING/MAINTENANCE PROCEDURES
- **Monitoring Description:**
  
  An owner or operator that has an operating limit that requires the use of a CMS other than a PM CPMS or COMS must install, operate, and maintain each CMS according to the procedures in 40 CFR 63.7525(d)(1) through (5) by the compliance date specified in 40 CFR 63.7495.

- **Monitoring Frequency:** AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
- **Reporting Requirements:** AS REQUIRED - SEE MONITORING DESCRIPTION

**Condition 51: Compliance Certification**

**Effective between the dates of 01/19/2016 and 01/18/2021**

**Applicable Federal Requirement:** 40 CFR 63.7530(b), Subpart DDDD

**Item 51.1:**
The Compliance Certification activity will be performed for the Facility.

**Item 51.2:**
Compliance Certification shall include the following monitoring:

- **Monitoring Type:** RECORD KEEPING/MAINTENANCE PROCEDURES
- **Monitoring Description:**
  
  An owner or operator that demonstrates compliance through performance testing must establish each site-specific operating limit in Table 4 to subpart DDDD that applies to the facility according to the requirements in 40 CFR 63.7520, Table 7 to subpart DDDD, and 40 CFR 63.7530(b)(4), as applicable. The owner or operator must also conduct or obtain fuel analyses according to 40 CFR 63.7521 and establish maximum fuel pollutant input levels according to 40 CFR 63.7530(b)(1) through (3), as
applicable, and as specified in 40 CFR 63.7510(a)(2). (Note that 40 CFR 63.7510(a)(2) exempts certain fuels from the fuel analysis requirements.) However, if the owner or operator switches fuel(s) and cannot show that the new fuel(s) does (do) not increase the chlorine, mercury, or TSM input into the unit through the results of fuel analysis, then he/she must repeat the performance test to demonstrate compliance while burning the new fuel(s).

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2016.
Subsequent reports are due every 6 calendar month(s).

Condition 52: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 40CFR 63.7530(d), Subpart DDDDD

Item 52.1:
The Compliance Certification activity will be performed for the Facility.

Item 52.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
The owner or operator of an existing unit with a heat input capacity of less than 10 million Btu per hour or a unit in the unit designed to burn gas 1 subcategory must submit a signed statement in the Notification of Compliance Status report that indicates that he/she conducted a tune-up of the unit.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2016.
Subsequent reports are due every 6 calendar month(s).

Condition 53: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 40CFR 63.7530(e), Subpart DDDDD

Item 53.1:
The Compliance Certification activity will be performed for the Facility.

Item 53.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
The owner or operator must include with the Notification of Compliance Status a signed certification that the energy assessment was completed according to Table 3 to subpart DDDDD and is an accurate depiction of the facility at the time of the assessment.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2016.
Subsequent reports are due every 6 calendar month(s).

Condition 54: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 40CFR 63.7530(h), Subpart DDDDD

Item 54.1:
The Compliance Certification activity will be performed for the Facility.

Item 54.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
The owner or operator of a unit subject to emission limits in Tables 1 or 2 or 11 through 13 to subpart DDDDD must meet the work practice standard according to Table 3 of subpart DDDDD. During startup and shutdown, the owner or operator must only follow the work practice standards according to item 5 of Table 3 of subpart DDDDD.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2016.
Subsequent reports are due every 6 calendar month(s).

Condition 55: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 40CFR 63.7540(a), Subpart DDDDD

Item 55.1:
The Compliance Certification activity will be performed for the Facility.
Item 55.2: Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
The owner or operator of an industrial, commercial, and institutional boiler or process heater must demonstrate continuous compliance with each emission limit in Tables 1 and 2 or 11 through 13 to subpart DDDDD, the work practice standards in Table 3 to subpart DDDDD, and the operating limits in Table 4 to subpart DDDDD that applies to you according to the methods specified in Table 8 to subpart DDDDD and 40 CFR 63.7540(a)(1) through (19).

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION

Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 56: Performance test notification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 40CFR 63.7545(d), Subpart DDDDD

Item 56.1:

Owners and operators that are required to conduct a performance test must submit a Notification of Intent to conduct a performance test at least 60 days before the performance test is scheduled to begin.

Condition 57: Notification of compliance status
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 40CFR 63.7545(e), Subpart DDDDD

Item 57.1:

Owners and operators that are required to conduct an initial compliance demonstration as specified in 40 CFR 63.7530 must submit a Notification of Compliance Status according to 40 CFR 63.9(h)(2)(ii). For the initial compliance demonstration for each affected source, the owner or operator must submit the Notification of Compliance Status, including all performance test results and fuel analyses, before the close of business on the 60th day following the completion of all performance test and/or other initial compliance demonstrations for the affected source according to 40 CFR 63.10(d)(2). The Notification of Compliance Status report must contain all the information specified in 40 CFR 63.7545(e)(1) through (8), as applicable.

Condition 58: Fuel switching notification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 40CFR 63.7545(h), Subpart DDDDD

Item 58.1:
Owners or operators that have switched fuels or made a physical change that resulted in the applicability of a different subcategory must provide notice of the date upon which the source switched fuels or made the physical change within 30 days of the switch/change. The notification must identify:

(1) The name of the owner or operator of the affected source, the location of the source, the boiler(s) and process heater(s) that will switch fuels, were physically changed, and the date of the notice.

(2) The currently applicable subcategory under this subpart.

(3) The date on which the fuel switch or physical change occurred.

**Condition 59: Compliance Certification**
**Effective between the dates of 01/19/2016 and 01/18/2021**

**Applicable Federal Requirement:** 40CFR 63.7550(c), Subpart DDDDD

**Item 59.1:**
The Compliance Certification activity will be performed for the Facility.

**Item 59.2:**
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
The compliance report must contain the information required in 40 CFR 63.7550(c)(1) through (5).

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

**Condition 60: Compliance Certification**
**Effective between the dates of 01/19/2016 and 01/18/2021**

**Applicable Federal Requirement:** 40CFR 63.7550(e), Subpart DDDDD

**Item 60.1:**
The Compliance Certification activity will be performed for the Facility.

**Item 60.2:**
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
For each deviation from an emission limit, operating limit, and monitoring requirement in subpart DDDDD occurring at an affected source where the owner or operator is using a CMS to comply with that emission limit.
or operating limit, he/she must include the information required in 40 CFR 63.7550(e)(1) through (9). This includes any deviations from the site-specific monitoring plan as required in 40 CFR 63.7505(d).

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

**Condition 61:** Compliance Certification
**Effective between the dates of 01/19/2016 and 01/18/2021**

**Applicable Federal Requirement:** 40 CFR 63.7550(h), Subpart DDDDD

**Item 61.1:**
The Compliance Certification activity will be performed for the Facility.

**Item 61.2:**
Compliance Certification shall include the following monitoring:

**Monitoring Type:** RECORD KEEPING/MAINTENANCE PROCEDURES
**Monitoring Description:** Facility must submit the reports according to the procedures specified in paragraphs (1) through (3).

1) Within 60 days after the date of completing each performance test (defined in 40 CFR 63.2) as required by Subpart DDDDD the facility must submit the results of the performance tests, including any associated fuel analyses, required by Subpart DDDDD and the compliance reports required in 40 CFR 63.7550(b) to the EPA's WebFIRE database by using the Compliance and Emissions Data Reporting Interface (CEDRI) that is accessed through the EPA's Central Data Exchange (CDX) (www.epa.gov/cdx). Performance test data must be submitted in the file format generated through use of the EPA's Electronic Reporting Tool (ERT) (see http://www.epa.gov/tnn/chief/ert/index.html). Only data collected using test methods on the ERT Web site are subject to this requirement for submitting reports electronically to WebFIRE. Owners or operators who claim that some of the information being submitted for performance tests is confidential business information (CBI) must submit a complete ERT file including information claimed to be CBI on a compact disk or other commonly used electronic storage media (including, but not limited to, flash drives) to the EPA. The electronic media must be clearly marked as CBI and mailed to U.S. EPA/OAPQS/CORE CBI Office, Attention: WebFIRE Administrator, MD C404-02, 4930 Old Page Rd., Durham, NC 27703. The same ERT file with the CBI omitted must be submitted to the EPA via CDX as described earlier in this
paragraph. At the discretion of the Administrator, facility must also submit these reports, including the confidential business information, to the Administrator in the format specified by the Administrator. For any performance test conducted using test methods that are not listed on the ERT Web site, the owner or operator shall submit the results of the performance test in paper submissions to the Administrator.

(2) Within 60 days after the date of completing each CEMS performance evaluation test (defined in 40 CFR 63.2) facility must submit the relative accuracy test audit (RATA) data to the EPA's Central Data Exchange by using CEDRI as mentioned in paragraph (1). Only RATA pollutants that can be documented with the ERT (as listed on the ERT Web site) are subject to this requirement. For any performance evaluations with no corresponding RATA pollutants listed on the ERT Web site, the owner or operator shall submit the results of the performance evaluation in paper submissions to the Administrator.

(3) Facility must submit all reports required by Table 9 of Subpart DDDDD electronically using CEDRI that is accessed through the EPA's Central Data Exchange (CDX) (www.epa.gov/cdx). However, if the reporting form specific to Subpart DDDDD is not available in CEDRI at the time that the report is due facility must submit the report to the Administrator at the appropriate address listed in 40 CFR 63.13. At the discretion of the Administrator, facility must also submit these reports, to the Administrator in the format specified by the Administrator.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 62: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 40 CFR 63.7555(a), Subpart DDDDD

Item 62.1:
The Compliance Certification activity will be performed for the Facility.

Item 62.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
The owner or operator must keep records according to
paragraphs (1) and (2).

(1) A copy of each notification and report that was submitted to comply with this subpart, including all documentation supporting any Initial Notification or Notification of Compliance Status or semiannual compliance report that was submitted, according to the requirements in 40 CFR 63.10(b)(2)(xiv).

(2) Records of performance tests, fuel analyses, or other compliance demonstrations and performance evaluations as required in 40 CFR 63.10(b)(2)(viii).

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION

Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 63: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 40 CFR 63.7555(c), Subpart DDDDD

Item 63.1:
The Compliance Certification activity will be performed for the Facility.

Item 63.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES

Monitoring Description:
The owner or operator must keep the records required in Table 8 to subpart DDDDD including records of all monitoring data and calculated averages for applicable operating limits, such as opacity, pressure drop, pH, and operating load, to show continuous compliance with each emission limit and operating limit that apply.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION

Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 64: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 40 CFR 63.7555(d), Subpart DDDDD

Item 64.1:
The Compliance Certification activity will be performed for the Facility.

Item 64.2:
Compliance Certification shall include the following monitoring:
Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
For each boiler or process heater subject to an emission limit in Table 1, 2 or 11 through 13 to subpart DDDDD, the owner or operator must also keep the applicable records in 40 CFR 63.7555(d)(1) through (11).

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 65: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021
Applicable Federal Requirement: 40 CFR 63.7555(e), Subpart DDDDD

Item 65.1:
The Compliance Certification activity will be performed for the Facility.

Item 65.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
Owners and operators that elect to average emissions consistent with 40 CFR 63.7522 must additionally keep a copy of the emission averaging implementation plan required in 40 CFR 63.7522(g), all calculations required under 40 CFR 63.7522, including monthly records of heat input or steam generation, as applicable, and monitoring records consistent with 40 CFR 63.7541.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 66: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021
Applicable Federal Requirement: 40 CFR 63.7555(i), Subpart DDDDD

Item 66.1:
The Compliance Certification activity will be performed for the Facility.

Item 66.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
The owner or operator must maintain records of the calendar date, time, occurrence and duration of each startup and shutdown.
Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 67: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 40 CFR 63.7555(j), Subpart DDDDD

Item 67.1: The Compliance Certification activity will be performed for the Facility.

Item 67.2: Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description: You must maintain records of the type(s) and amount(s) of fuels used during each startup and shutdown.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 68: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 40 CFR 63.7560, Subpart DDDDD

Item 68.1: The Compliance Certification activity will be performed for the Facility.

Item 68.2: Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description: Records must be in a form suitable and readily available for expeditious review, according to 40 CFR 63.10(b)(1).

As specified in 40 CFR 63.10(b)(1), the owner or operator must keep each record for 5 years following the date of each occurrence, measurement, maintenance, corrective action, report, or record.

The owner or operator must keep each record on site, or they must be accessible from on site (for example, through a computer network), for at least 2 years after the date of each occurrence, measurement, maintenance, corrective action, report, or record, according to 40 CFR
63.10(b)(1). The owner or operator can keep the records off site for the remaining 3 years.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 69: General provisions
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 40 CFR 63.7565, Subpart DDDDD

Item 69.1:
Table 10 to subpart DDDDD shows which parts of the General Provisions in 40 CFR 63.1 through 63.15 apply to the facility. The owner or operator is responsible for ensuring they comply with all General Provisions contained in Table 10.

Condition 70: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 40 CFR 63.3320(b)(3), Subpart JJJJ

Item 70.1:
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Emission Unit: U-PAPER</td>
<td>Process: AAA</td>
<td></td>
</tr>
</tbody>
</table>

Item 70.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: WORK PRACTICE INVOLVING SPECIFIC OPERATIONS
Monitoring Description:
The owner or operator of an affected source must limit the organic HAP emissions to no more than 0.20 kg of organic HAP per kg of solids applied at existing affected sources (.08 kg for new affected sources) for each month.

To demonstrate compliance with this limit using "as-applied" compliant coatings, the owner or operator shall follow procedures specified in § 63.3370(a)(2)(ii). The owner or operator shall perform all of the following:

- Determine the organic HAP weight-fraction of each coating
material "as-purchased" by following § 63.3360(c)(1)-(3).

-Determine the organic HAP weight-fraction of each coating material "as-applied" by following § 63.3370(c)(1)-(ii).

-Determine the solids content of each "as-purchased" coating material by following § 63.3360(d)(1)-(2).

-Calculate the solids content of "as-applied" materials by using Equation 2 in § 63.3370(c)(2)(i).

-Calculate the solids content of "as-applied" organic HAP to solids ratio using Equation 3 in § 63.3370(c)(2)(ii).

Work Practice Type: PARAMETER OF PROCESS MATERIAL
Process Material: COATING
Parameter Monitored: ORGANIC HAP CONTENT
Upper Permit Limit: 0.20 kilograms organic HAP per kilogram solids applied
Monitoring Frequency: MONTHLY
Averaging Method: MAXIMUM - NOT TO EXCEED STATED VALUE - SEE MONITORING DESCRIPTION
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2016.
Subsequent reports are due every 6 calendar month(s).

**Condition 71:** Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

**Applicable Federal Requirement:** 40CFR 63.3410(a), Subpart JJJJ

**Item 71.1:**
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

Emission Unit: U-PAPER
Process: 016 Emission Source: DRY10

Emission Unit: U-PAPER
Process: AAA

Item 71.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
The owner or operator of an affected source subject to this subpart must maintain the following records on a monthly basis in accordance with the requirements of § 63.10(b)(1).

- Organic HAP content data for the purpose of demonstrating compliance in accordance with the requirements of § 63.3360(c)

- Volatile matter and coating solids content data for the purpose of demonstrating compliance in accordance with the requirements of § 63.3360(d)

- Material usage, organic HAP usage, volatile matter usage, and coating solids usage and compliance demonstrations using these data in accordance with the requirements of § 63.3370(b), (c), and (d).

Monitoring Frequency: MONTHLY
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2016.
Subsequent reports are due every 6 calendar month(s).

Condition 72: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 40CFR 63.6585, Subpart ZZZZ

Item 72.1:
The Compliance Certification activity will be performed for the Facility.

Item 72.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
You are subject to this subpart (40 CFR 63, Subpart ZZZZ) if you own or operate a stationary RICE at a major or area source of HAP emissions, except if the stationary RICE is being tested at a stationary RICE test cell/stand.

Monitoring Frequency: CONTINUOUS
Reporting Requirements: UPON REQUEST BY REGULATORY AGENCY
**** Emission Unit Level ****

Condition 73: Emission Point Definition By Emission Unit
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR Subpart 201-6

Item 73.1:
The following emission points are included in this permit for the cited Emission Unit:

Emission Unit: U-BOILR

Emission Point: 00018
Height (ft.): 115 Diameter (in.): 42
NYTMN (km.): 4774.576 NYTME (km.): 616.473 Building: BOILERHOUS

Item 73.2:
The following emission points are included in this permit for the cited Emission Unit:

Emission Unit: U-BROKE

Emission Point: 00024
Height (ft.): 20 Diameter (in.): 12
NYTMN (km.): 4774.546 NYTME (km.): 616.459 Building: EASTON MIL

Emission Point: 00025
Height (ft.): 14 Diameter (in.): 16
NYTMN (km.): 4774.547 NYTME (km.): 616.45 Building: EASTON MIL

Item 73.3:
The following emission points are included in this permit for the cited Emission Unit:

Emission Unit: U-MIXRS

Emission Point: 009A7
Height (ft.): 26 Diameter (in.): 12
NYTMN (km.): 4774.51 NYTME (km.): 616.396 Building: EASTON MIL

Item 73.4:
The following emission points are included in this permit for the cited Emission Unit:

Emission Unit: U-PAPER

Emission Point: 008A1
Height (ft.): 39 Diameter (in.): 49
NYTMN (km.): 4774.432 NYTME (km.): 616.36 Building: NO. 14

Emission Point: 008A2
Height (ft.): 39 Diameter (in.): 49
Condition 74: Process Definition By Emission Unit

Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR Subpart 201-6

Item 74.1:
This permit authorizes the following regulated processes for the cited Emission Unit:

**Item 74.2:**

This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: U-BOILR  
Process: 001  
Source Classification Code: 1-02-004-02  
Process Description:
Two large boilers whose combined heat input capacity is 75.9 MMBtu/hr; this process involves firing them with No. 6 fuel oil. When No 6 fuel is fired, other than gas curtailments or for periodic testing (not to exceed 48 hours in a calendar year), the boiler is operating in accordance with 40 CFR 63, Subpart DDDDD, liquids fuel subcategory (specifically Heavy fuels).

Emission Source/Control: 00001 - Combustion  
Design Capacity: 43.4 million Btu per hour

Emission Source/Control: 00002 - Combustion  
Design Capacity: 32.5 million Btu per hour

**Item 74.3:**

This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: U-BROKE  
Process: 003  
Source Classification Code: 3-07-999.99  
Process Description:
Exhaust vent from broke beater. Caustic is added to broke and broke is steam heated. Vapors are vented to outside air.

Emission Source/Control: BEATR - Process

**Item 74.4:**
This permit authorizes the following regulated processes for the cited Emission Unit:

**Item 74.5:**
This permit authorizes the following regulated processes for the cited Emission Unit:

</table>
Process Description:
This process includes web coating operations that coat both paper and non-woven substrate (greater than 10% by mass). This web coating line is subject to 40 CFR 63, Subpart OOOO, when applying organic HAP containing coatings.

Various coatings/binders may be applied to the web at different points, depending on the machine and the formulation being used. The coated/saturated sheet passes over steam dryer cans to drive off volatile material. Some coatings/binders may also be cured using natural gas fired heating units.

Emission Source/Control: 0DRY9 - Process

Emission Source/Control: 0WET9 - Process

**Item 74.8:**
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: U-PAPER
Process: 0AA  Source Classification Code: 3-07-999-01
Process Description:
On No. 8 Paper Machine, a wet web of paper passes over steam heated can dryers. For some papers, sprays are applied (see Process ID AAA). For some papers, infrared curing is used to enhance paper properties. Exhausts are vented to 4 emission points on roof. In addition, 2 emission points may be added to this source as previously approved.

Emission Source/Control: 00PM8 - Process

**Item 74.9:**
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: U-PAPER
Process: 0BB  Source Classification Code: 3-07-999-99
Process Description:
On Paper Machine No. 9 wet end, a wet web of paper is formed and passes over steam heated can dryers. For some papers, sprays are applied (see Process ID 016). The exhausts are vented to 3 emission points on roof.

Emission Source/Control: 0WET9 - Process

**Item 74.10:**
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: U-PAPER
Process: 0CC  Source Classification Code: 3-07-999-99
Process Description:
On Paper Machine No. 10 a wet web of paper is formed and passes over steam heated can dryers and thru-dryer. The exhausts are vented to 3 emission points on roof.

Emission Source/Control: WET10 - Process

Item 74.11:
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: U-PAPER
Process: AAA Source Classification Code: 4-02-013-01
Process Description:
Coatings are sprayed onto the paper web on Paper Machine No. 8.

Emission Source/Control: 00PM8 - Process

Condition 75: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR 227-1.3 (a)

Item 75.1:
The Compliance Certification activity will be performed for:

Emission Unit: U-BOILR Emission Point: 00018

Item 75.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE
Monitoring Description:
No owner or operator of a combustion installation shall emit greater than 20 percent opacity except for one six minute period per hour, not to exceed 27 percent, based upon the six minute average in reference test Method 9 in Appendix A of 40 CFR 60.

The Department reserves the right to perform or require the performance of a Method 9 opacity evaluation at any time during facility operation. In addition, Method 9 opacity evaluations must be conducted in accordance with daily visible emissions verification described in this permit.

Parameter Monitored: OPACITY
Upper Permit Limit: 20 percent
Reference Test Method: Method 9
Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Averaging Method: 6-MINUTE AVERAGE (METHOD 9)
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2016.
Subsequent reports are due every 6 calendar month(s).

Condition 76: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR 227-1.3

Item 76.1:
The Compliance Certification activity will be performed for:

- Emission Unit: U-BOILR
- Emission Point: 00018
- Process: 001

Item 76.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
Operators of oil-fired boilers which are not exempt from permitting and where a continuous opacity monitor is not utilized for measuring smoke emissions, shall be required to perform the following:

1) Observe the stack for each boiler which is operating on oil once per day for visible emissions. This observation(s) must be conducted during daylight hours except during adverse weather conditions (fog, rain, or snow).

2) The results of each observation must be recorded in a bound logbook or other format acceptable to the Department. The following data must be recorded for each stack:
   - date and time of day
   - observer's name
   - identity of emission point
   - weather condition
   - was a plume observed?

Inclement weather conditions shall be recorded for those days when observations are prohibited. This logbook must be retained at the facility for five (5) years after the date of the last entry.

3) If the operator observes any visible emissions (other than steam - see below) two consecutive days firing oil (the firing of other fuels in between days of firing oil does not count as an interruption in the consecutive days
of firing oil), then a Method 9 analysis (based upon a 6-minute mean) of the affected emission point(s) must be conducted within two (2) business days of such occurrence. The results of the Method 9 analysis must be recorded in the logbook. The operator must contact the Regional Air Pollution Control Engineer within one (1) business day of performing the Method 9 analysis if the opacity standard is contravened. Upon notification, any corrective actions or future compliance schedules shall be presented to the Department for acceptance.

** NOTE ** Steam plumes generally form after leaving the top of the stack (this is known as a detached plume). The distance between the stack and the beginning of the detached plume may vary, however, there is (normally) a distinctive distance between the plume and stack. Steam plumes are white in color and have a billowy consistency. Steam plumes dissipate within a short distance of the stack (the colder the air the longer the steam plume will last) and leave no dispersion trail downwind of the stack.

Monitoring Frequency: DAILY
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2016.
Subsequent reports are due every 6 calendar month(s).

** Condition 77: ** Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

** Applicable Federal Requirement:** 6 NYCRR 212-2.4 (b)

** Item 77.1:**
The Compliance Certification activity will be performed for:

- Emission Unit: U-MIXRS
- Emission Point: 009A7
- Regulated Contaminant(s):
  - CAS No: 0NY075-00-0 PARTICULATES

** Item 77.2:**
Compliance Certification shall include the following monitoring:

- Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE
- Monitoring Description:
  - Emissions of solid particulates are limited to less than 0.050 grains of particulates per cubic foot of exhaust gas, expressed at standard conditions on a dry gas basis.
  - The Department reserves the right to perform or require
the performance of a Method 5 emissions evaluation at any time.

The permittee will conduct compliance verifications at the monitoring frequency stated below. These verifications include review of pertinent information relating to particulate emissions of the source, including but not limited to production rate, process material, air flow rate, control equipment parameters, visible emissions, etc. The permittee will confirm that during source operation all pertinent parameters (whether used to directly calculate particulate emission rate, or as surrogates) are within ranges that ensure compliance with the particulate emission rate.

Additionally, the permittee will investigate, in a timely manner, any instance where there is cause to believe that particulate emissions above 0.050 gr/dscf are occurring or have occurred. These instances include but are not limited to process upsets, control device malfunctions or problems, abnormal visible emissions, complaints, etc. The permittee shall determine the cause of any exceedance, make the necessary correction, and verify that the excess emissions problem has been corrected.

Records of these verifications, investigations and corrective actions will be kept on-site. Should the Department determine that permittee's record keeping format is inadequate to demonstrate compliance with this condition, it shall provide written notice to the permittee stating the inadequacies, and permittee shall have 90 days to revise its prospective record keeping format in a manner acceptable to the Department.

Parameter Monitored: PARTICULATES
Upper Permit Limit: 0.050 grains per dscf
Reference Test Method: USEPA METHOD 5
Monitoring Frequency: SEMI-ANNUALLY
Averaging Method: AVERAGING METHOD AS PER REFERENCE TEST METHOD INDICATED
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2016.
Subsequent reports are due every 6 calendar month(s).

Condition 78: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR 212-2.1 (b)

Item 78.1:
The Compliance Certification activity will be performed for:

Emission Unit: U-PAPER

Regulated Contaminant(s):
CAS No: 000096-23-1    1,3-DICHLORO-2-PROPANOL

**Item 78.2:**
Compliance Certification shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE

Monitoring Description:
Source owner shall limit annual emissions of 1,3-dichloro-2-propanol from all sources to no more than 3,720 lbs. during any consecutive twelve (12) months, rolled monthly.

Records shall include, for each month, raw material consumption and acceptable calculations of the total pounds of 1,3-dichloro-2-propanol emitted for that month, as well as the total amounts emitted for the past consecutive twelve (12) months. Each consecutive twelve (12) month total must meet the allowable limit noted above.

Parameter Monitored: 1,3-DICHLORO-2-PROPANOL
Upper Permit Limit: 3720 pounds per year
Monitoring Frequency: MONTHLY
Averaging Method: ANNUAL MAXIMUM ROLLED MONTHLY
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2016.
Subsequent reports are due every 6 calendar month(s).

**Condition 79:** Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR 212-1.5 (e) (2)

**Item 79.1:**
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

Emission Unit: U-PAPER
Process: 016    Emission Source: DRY10

Emission Unit: U-PAPER
Process: 017    Emission Source: 0DRY9

Emission Unit: U-PAPER
Process: AAA
Item 79.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
A process emission source subject to the Federal National Emission Standards for Hazardous Air Pollutants (NESHAP) under 40 CFR Part 61 or Part 63 (see Table 1 of Section 200.9 of this Title) satisfies the requirements of this Part for the respective air contaminant regulated by the Federal standard if the facility owner or operator can demonstrate that the process emission source is in compliance with the relevant Federal regulation and, for those NESHAPs regulating HTACs found in Section 212-2.2, Table 2 – High Toxicity Air Contaminant List, of this Part, provide a Toxic Impact Assessment (TIA) demonstrating that the maximum offsite ambient air concentration is less than the AGC/SGC and that emissions are less than the PB trigger for the respective air contaminant.

Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 80: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR 228-1.3 (b) (1)

Item 80.1:
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

Emission Unit: U-PAPER
Process: 016

Emission Unit: U-PAPER
Process: 017

Emission Unit: U-PAPER
Process: AAA

Item 80.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
The owner or operator of an emission source subject to 6 NYCRR Part 228-1 must maintain the following records in a format acceptable to the department for a period of at least five years:
1. A certification from the coating supplier or manufacturer which lists the parameters used to determine the actual VOC content of each as applied coating used at the facility.

2. Purchase, usage and/or production records of each coating material, including solvents.

3. Records identifying each air cleaning device that has an overall removal efficiency of at least 90 percent.

4. Records verifying each parameter used to calculate the overall removal efficiency, as described in Equation 2 of Section 228-1.5(c), if applicable.

5. Any additional information required to determine compliance with Part 228-1.

Upon request, the owner or operator of an emission source subject to 6 NYCRR Part 228-1 must submit a copy of the records kept in accordance with this condition to the department within 90 days of receipt of the request.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION

Reporting Requirements: UPON REQUEST BY REGULATORY AGENCY

Condition 81: Compliance Certification

Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR 228-1.6 (a)

Item 81.1:
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

- Emission Unit: U-PAPER
  Process: 016

- Emission Unit: U-PAPER
  Process: 017

- Emission Unit: U-PAPER
  Process: AAA

Item 81.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
Upon request by the Department, the owner or operator of an emission source subject to 6 NYCRR Part 228-1 must determine the actual VOC content of an as applied coating by measuring the volatile content, water content, density, volume of solids, and weight of solids in accordance with EPA Reference Test Method 311 or Method 24, included in Appendix A of 40 CFR parts 63 and 60 respectively, to demonstrate compliance with the requirements of Part 228-1.

An alternate sampling method that has been approved by both the Department and the Administrator may be used when Method 311 and/or Method 24 are not appropriate.

Reference Test Method: EPA Reference Test Method 311 or 24
Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: UPON REQUEST BY REGULATORY AGENCY

**Condition 82:** Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021
Applicable Federal Requirement: 6 NYCRR 228-1.6 (h)

**Item 82.1:**
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

- Emission Unit: U-PAPER
  Process: 016

- Emission Unit: U-PAPER
  Process: 017

- Emission Unit: U-PAPER
  Process: AAA

**Item 82.2:**
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
Any information or record showing noncompliance with the requirements of 228-1 'Surface Coating Processes' must be reported to the department within 30 days following notice or generation of the information or record. All records required by this condition must be maintained at the facility for a period of five years.

Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION
Condition 83: Compliance Certification  
Effective between the dates of 01/19/2016 and 01/18/2021  
Applicable Federal Requirement: 6 NYCRR 212-1.5 (e) (2)  

Item 83.1:  
The Compliance Certification activity will be performed for:  

Emission Unit: U-PAPER  
Process: 016  
Emission Source: 010SC  

Item 83.2:  
Compliance Certification shall include the following monitoring:  

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE  
Monitoring Description:  
To assure compliance with the 1.85 lbs/hr formaldehyde emission limit for emission point 09C10 and provide the basis for emission factors used in other formaldehyde compliance certification activities, the scrubbing solution flow rate shall be at least 120 gpm when running formulations containing formaldehyde.  

The minimum flow rate may need to be revised based on the results of the required performance testing  

Parameter Monitored: FLOW RATE  
Lower Permit Limit: 120 gallons per minute  
Monitoring Frequency: CONTINUOUS  
Averaging Method: MINIMUM - NOT TO FALL BELOW STATED VALUE AT ANY TIME  
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)  
Reports due 30 days after the reporting period.  
The initial report is due 7/30/2016.  
Subsequent reports are due every 6 calendar month(s).  

Condition 84: Compliance Certification  
Effective between the dates of 01/19/2016 and 01/18/2021  
Applicable Federal Requirement: 40CFR 63.4291(a)(2), Subpart OOOO  

Item 84.1:  
The Compliance Certification activity will be performed for:  

Emission Unit: U-PAPER  
Process: 017  

Item 84.2:  
Compliance Certification shall include the following monitoring:  

Monitoring Type: WORK PRACTICE INVOLVING SPECIFIC
OPERATIONS

Monitoring Description:
The source owner or operator of existing coating operations shall limit organic HAP emissions to the atmosphere to no more than 0.12 kg of organic HAP per kg of solids applied. The source owner or operator must include all regulated materials (as defined in §63.4371) used in the affected source when determining the organic HAP emission rate.

A source owner or operator demonstrating compliance with this emission rate using the “without add-on controls option” shall demonstrate that, based on the regulated materials applied in the web coating operation(s), the organic HAP emission rate for the web coating operation(s) is less than or equal to the applicable emission limit, calculated as a rolling 12-month average emission rate. Source owner or operator must meet all the requirements of §§63.4330, 63.4331, and 63.4332 to demonstrate compliance with the applicable emission limit using this option.

To demonstrate compliance with this emission rate using the “without add-on control option,” the source owner or operator shall follow procedures specified in §63.4331(a):

1. Determine the mass fraction of organic HAP for each material. Determine the mass fraction of organic HAP for each coating, thinning, and cleaning material applied during the compliance period according to the requirements in §63.4321(e)(1).

2. Determine the mass fraction of solids for each material. Determine the mass fraction of solids (kg of solids per kg of coating or printing material) for each coating material applied during the compliance period according to the requirements in §63.4321(e)(2).

3. Determine the mass of each material. Determine the mass (kg) of each coating, thinning, or cleaning material applied during the compliance period by measurement or usage records.

4. Calculate the mass of organic HAP emissions. The mass of organic HAP emissions is the combined mass of organic HAP contained in all coating, thinning, and cleaning materials applied during the compliance period minus the organic HAP in certain waste materials. Calculate the mass of organic HAP emissions using Equations 1, 1A, and 1B of this section.

5. Calculate the total mass of coating solids. Determine
the total mass of coating solids applied, kg, which is the combined mass of the solids contained in all the coating and printing materials applied during the compliance period, using Equation 2 of this section.

(6) Calculate the organic HAP emission rate for the compliance period, kg organic HAP emitted per kg solids used, using Equation 3 of this section.

Work Practice Type: PARAMETER OF PROCESS MATERIAL
Process Material: COATING
Parameter Monitored: ORGANIC HAP CONTENT
Upper Permit Limit: .12 kilograms organic HAP per kilogram solids applied
Monitoring Frequency: MONTHLY
Averaging Method: 12-month rolling average
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2016.
Subsequent reports are due every 6 calendar month(s).

Condition 85: General Provisions
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 40CFR 63.4301, Subpart OOOO

Item 85.1:
This Condition applies to Emission Unit: U-PAPER
Process: 017

Item 85.2:
Table 3 of subpart OOOO lists which parts of the general provisions in §63.1-63.15 apply to the facility.

Condition 86: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 40CFR 63.4311(a), Subpart OOOO

Item 86.1:
The Compliance Certification activity will be performed for:

Emission Unit: U-PAPER
Process: 017

Item 86.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
Semiannual compliance reports for each affected sources
using the “without add-on controls option” must submit
information specified under § 63.4311 including the
following:

(i) Company name and address.

(ii) Statement by a responsible official with that
official’s name, title, and signature, certifying the
truth, accuracy, and completeness of the content of the
report.

(iii) Date of report and beginning and ending dates of the
reporting period.

(iv) Identification of the compliance option or options
specified in §63.4291 that source owner or operator used
on each web coating operation during the reporting period.
If you switched between compliance options during the
reporting period, you must report the beginning and ending
dates you used each option.

(v) If you used the emission rate without add-on controls
the calculation results for each compliance period ending
each month during the 6-month reporting period.

(vi) If there were no deviations from the emission
limitations in Table 1 to this subpart that apply to you,
the semiannual compliance report must include a statement
that there were no deviations from the emission
limitations during the reporting period because the
organic HAP emission rate for each compliance period was
less than or equal to the applicable limit in Table 1 of
this subpart.

If there were deviations from the applicable emission
limit in Table 1 to this subpart, and you use the emission
rate without add-on controls option, the semiannual
compliance report must contain the following additional
information:

(i) The beginning and ending dates of each compliance
period during which the organic HAP emission rate exceeded
the applicable emission limit in Table 1 to this
subpart.

(ii) The calculations used to determine the organic HAP
emission rate for the compliance period in which the
deviation occurred. You must submit the calculations for
Equations 1, 1A and 1B, 2, and 3 in §63.4331 for web
coating operations. You do not need to submit background
data supporting these calculations (e.g., information
provided by materials suppliers or manufacturers, or test
reports).

(iii) A statement of the cause of each deviation.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING
DESCRIPTION
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2016.
Subsequent reports are due every 6 calendar month(s).

Condition 87: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 40CFR 63.4312, Subpart OOOO

Item 87.1:
The Compliance Certification activity will be performed for:

Emission Unit: U-PAPER
Process: 017

Item 87.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
The source owner or operator for each affected sources
using the “without add-on controls option” must collect
and keep a records of the following data and information.
Failure to collect and keep these records is a deviation
from the applicable standard.

(a) A copy of each notification and report that you
submitted to comply with this subpart, and the
documentation supporting each notification and
report.

(b) A current copy of information provided by materials
suppliers or manufacturers, such as manufacturer’s
formulation data or test data used to determine the mass
fraction of organic HAP for coating, thinning, and
cleaning materials; and the mass fraction of solids for
coating materials. If you conducted testing to determine
mass fraction of organic HAP of coating materials or the
mass fraction of solids of coating materials, you must
keep a copy of the complete test report. If you use
information provided to you by the manufacturer or
supplier of the material that was based on testing, you
must keep the summary sheet of results provided to you by the manufacturer or supplier. You are not required to obtain the test report or other supporting documentation from the manufacturer or supplier.

(c) For each compliance period, the records specified in paragraph (c)(1) of this section for web coating operations.

(1) A record of the web coating operations on which you used each compliance option and the time periods (beginning and ending dates) you used each option. For each month, a record of all required calculations for the compliance option(s) you used.

For the emission rate without add-on controls option, a record of the calculation of the total mass of organic HAP emissions for the coating, thinning and cleaning materials applied each compliance period using Equations 1, 1A, and 1B of § 63.4331 and, if applicable, the calculation used to determine the mass of organic HAP in waste materials according to § 63.4331(a)(4)(iii); the calculation of the total mass of the solids contained in all coating materials applied each compliance period using Equation 2 of § 63.4331; and the calculation of the organic HAP emission rate for each compliance period using Equation 3 of § 63.4331.

(d) A record of the name and mass of each regulated material applied in the web coating and printing subcategory during each compliance period.

(e) A record of the mass fraction of organic HAP for each regulated material applied during each compliance period.

(f) A record of the mass fraction of coating and printing solids for each coating and printing material applied during each compliance period.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 0 days after the reporting period.
The initial report is due 6/30/2016.
Subsequent reports are due every 6 calendar month(s).

**Condition 88:** Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement: 6 NYCRR 212-2.1 (b)
Item 88.1:
The Compliance Certification activity will be performed for:

- Emission Unit: U-PAPER
- Process: 0BB
- Emission Source: 0WET9

Regulated Contaminant(s):
- CAS No: 000096-23-1 1,3-DICHLORO-2-PROPANOL

Item 88.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE

Monitoring Description:
Source owner shall limit annual emissions of 1,3-dichloro-2-propanol from Paper Machine No. 9 sources to no more than 1,230 lbs. during any consecutive twelve (12) months, rolled monthly.

Records shall include, for each month, raw material consumption and acceptable calculations of the pounds of 1,3-dichloro-2-propanol emitted for that month, as well as the total pounds emitted for the past consecutive twelve (12) months. Each consecutive twelve (12) month total must meet the allowable limit noted above.

Parameter Monitored: 1,3-DICHLORO-2-PROPANOL
Upper Permit Limit: 1230 pounds per year
Monitoring Frequency: MONTHLY
Averaging Method: ANNUAL MAXIMUM ROLLED MONTHLY
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2016.
Subsequent reports are due every 6 calendar month(s).

Condition 89: Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable Federal Requirement:6 NYCRR 212-1.5 (e) (2)

Item 89.1:
The Compliance Certification activity will be performed for:

- Emission Unit: U-PAPER
- Process: AAA

Regulated Contaminant(s):
- CAS No: 000050-00-0 FORMALDEHYDE

Item 89.2:
Compliance Certification shall include the following monitoring:
Monitoring Type: INTERMITTENT EMISSION TESTING
Monitoring Description:
The hourly emission rate of formaldehyde from Paper Machine No. 8 (ES 00PM8) shall not exceed 0.15 lbs/hr.

Source owner shall notify the Department within thirty (30) days of commencement of the use of formaldehyde-containing coatings on Paper Machine No. 8. R & D activities are not considered as part of the commencement of use.

For the purpose of ascertaining compliance or noncompliance with this limit, source owner shall perform stack testing of the emission points involved within ninety (90) days of the first use of a formaldehyde-containing coating and once per permit term thereafter. An acceptable report of the measured emissions shall be submitted within sixty (60) days of completion of each test.

Upper Permit Limit: 0.15 pounds per hour
Reference Test Method: NCASI Method 98.01 or other method approved by DEC
Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Averaging Method: AVERAGING METHOD AS PER REFERENCE TEST METHOD INDICATED
Reporting Requirements: ONCE / BATCH OR MONITORING OCCURRENCE

**Condition 90:** Compliance Certification
Effective between the dates of 01/19/2016 and 01/18/2021

**Applicable Federal Requirement:** 6 NYCRR 212-1.5 (e) (2)

**Item 90.1:**
The Compliance Certification activity will be performed for:

- Emission Unit: U-PAPER
- Emission Point: 09C10
- Regulated Contaminant(s):
  - CAS No: 000050-00-0 FORMALDEHYDE

**Item 90.2:**
Compliance Certification shall include the following monitoring:

- Monitoring Type: INTERMITTENT EMISSION TESTING
- Monitoring Description:
The hourly emission rate of formaldehyde from combined Paper Machine Nos. 9 & 10 shall not exceed 1.85 lbs/hr (when no formaldehyde is being emitted from Paper Machine No. 8).
For the purpose of ascertaining compliance or noncompliance with this limit, source owner shall perform a stack test of the emission point (EP 09C10) within 60 days of startup of Paper Machine No. 10's "dry-end" scrubber (ES 010SC). Otherwise, testing shall be conducted on an annual basis.

Upper Permit Limit: 1.85 pounds per hour
Reference Test Method: NCASI Method 98.01 or other method approved by DEC
Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Averaging Method: AVERAGING METHOD AS PER REFERENCE TEST METHOD INDICATED
Reporting Requirements: ONCE / BATCH OR MONITORING OCCURRENCE
STATE ONLY ENFORCEABLE CONDITIONS
**** Facility Level ****

NOTIFICATION OF GENERAL PERMITTEE OBLIGATIONS
This section contains terms and conditions which are not federally enforceable. Permittees may also have other obligations under regulations of general applicability

Item A: General Provisions for State Enforceable Permit Terms and Condition - 6 NYCRR Part 201-5
Any person who owns and/or operates stationary sources shall operate and maintain all emission units and any required emission control devices in compliance with all applicable Parts of this Chapter and existing laws, and shall operate the facility in accordance with all criteria, emission limits, terms, conditions, and standards in this permit. Failure of such person to properly operate and maintain the effectiveness of such emission units and emission control devices may be sufficient reason for the Department to revoke or deny a permit.

The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or law.

STATE ONLY APPLICABLE REQUIREMENTS
The following conditions are state applicable requirements and are not subject to compliance certification requirements unless otherwise noted or required under 6 NYCRR Part 201.

Condition 91: Contaminant List
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable State Requirement:ECL 19-0301

Item 91.1:
Emissions of the following contaminants are subject to contaminant specific requirements in this permit(emission limits, control requirements or compliance monitoring conditions).

CAS No: 000050-00-0
Name: FORMALDEHYDE
Condition 92: Malfunctions and start-up/shutdown activities
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable State Requirement: 6 NYCRR 201-1.4

Item 92.1:
(a) The facility owner or operator shall take all necessary and appropriate actions to prevent the emission of air pollutants that result in contravention of any applicable emission standard during periods of start-up, shutdown, or malfunction.

(b) The facility owner or operator shall compile and maintain records of all equipment malfunctions, maintenance, or start-up/shutdown activities when they can be expected to result in an exceedance of any applicable emission standard, and shall submit a report of such activities to the department when requested to do so, or when so required by a condition of a permit issued for the corresponding air contamination source. Such reports shall state whether any violations occurred and, if so, whether they were unavoidable, include the time, frequency and duration of the maintenance and/or start-up/shutdown activities, and an estimate of the emission rates of any air contaminants released. Such records shall be maintained for a period of at least five years and made available for review to department representatives upon request. Facility owners or operators subject to continuous stack monitoring and quarterly reporting requirements need not submit additional reports for equipment maintenance or start-up/shutdown activities for the facility to the department.

(c) In the event that emissions of air contaminants in excess of any emission standard in this Subchapter occur due to a malfunction, the facility owner or operator shall compile and maintain records of the malfunction and notify the department as soon as possible during normal working hours, but not later than two working days after becoming aware that the malfunction occurred.
When requested by the department, the facility owner or operator shall submit a written report to the department describing the malfunction, the corrective action taken, identification of air contaminants, and an estimate of the emission rates.

(d) The department may also require the owner or operator to include, in reports described under Subdivisions (b) and (c) of this Section, an estimate of the maximum ground level concentration of each air contaminant emitted and the effect of such emissions.

(e) A violation of any applicable emission standard resulting from start-up, shutdown, or malfunction conditions at a permitted or registered facility may not be subject to an enforcement action by the department and/or penalty if the department determines, in its sole discretion, that such a violation was unavoidable. The actions and recordkeeping and reporting requirements listed above must be adhered to in such circumstances.

Condition 93: Compliance Demonstration
Effective between the dates of 01/19/2016 and 01/18/2021

Applicable State Requirement: 6 NYCRR 212-2.1 (a)

Item 93.1:
The Compliance Demonstration activity will be performed for the Facility.

Item 93.2:
Compliance Demonstration shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
Emissions of air contaminants to the outdoor atmosphere from any process emission source or emission point are restricted for an air contaminant listed in Section 212-2.2 Table 2 - High Toxicity Air Contaminant List, of this Part, the facility owner or operator shall either limit the actual annual emissions from all process operations at the facility so as to not exceed the mass emission limit listed for the individual HTAC; or demonstrate compliance with the air cleaning requirements for the HTAC as specified in Subdivision 212-2.3(b), Table 4 - Degree of Air Cleaning Required for Non-Criteria Air Contaminants, of this Part for the environmental rating assigned to the contaminant by the department.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2016.
Subsequent reports are due every 6 calendar month(s).
