PERMIT
Under the Environmental Conservation Law (ECL)

IDENTIFICATION INFORMATION

Permit Type: Air Title V Facility
Permit ID: 7-3134-00022/00011
Effective Date: 01/23/2012 Expiration Date: 01/22/2017

 Permit Issued To: TENNESSEE GAS PIPELINE COMPANY LLC
 1001 LOUISIANA ST
 PO BOX 2511
 HOUSTON, TX 77252-2511

Facility: TENNESSEE GAS PIPELINE CO - COMP STA 241
3447 SENTINEL HEIGHTS RD
LAFAYETTE, NY 13084

Contact: MAI-TRINH TRAN
TENNESSEE GAS PIPELINE CO
1001 LOUISIANA ST STE S1102A
HOUSTON, TX 77002
(713) 420-7931

Description:
This action includes a Title V Renewal and a modification to revise the condition requiring
that TGP comply with 6 NYCRR Part 212. This modification will authorize combustion
modifications to Unit 3A, and require the installation of an oxidatipon catalyst on Unit 1A.

By acceptance of this permit, the permittee agrees that the permit is contingent upon strict
compliance with the ECL, all applicable regulations, the General Conditions specified and any
Special Conditions included as part of this permit.

Permit Administrator: ELIZABETH A TRACY
615 ERIE BLVD WEST
SYRACUSE, NY 13204-2400

Authorized Signature: _________________________________ Date: ___ / ___ / _____
Notification of Other State Permittee Obligations

Item A: Permittee Accepts Legal Responsibility and Agrees to Indemnification

The permittee expressly agrees to indemnify and hold harmless the Department of Environmental Conservation of the State of New York, its representatives, employees and agents ("DEC") for all claims, suits, actions, and damages, to the extent attributable to the permittee's acts or omissions in connection with the compliance permittee's undertaking of activities in connection with, or operation and maintenance of, the facility or facilities authorized by the permit whether in compliance or not in any compliance with the terms and conditions of the permit. This indemnification does not extend to any claims, suits, actions, or damages to the extent attributable to DEC's own negligent or intentional acts or omissions, or to any claims, suits, or actions naming the DEC and arising under article 78 of the New York Civil Practice Laws and Rules or any citizen suit or civil rights provision under federal or state laws.

Item B: Permittee's Contractors to Comply with Permit

The permittee is responsible for informing its independent contractors, employees, agents and assigns of their responsibility to comply with this permit, including all special conditions while acting as the permittee's agent with respect to the permitted activities, and such persons shall be subject to the same sanctions for violations of the Environmental Conservation Law as those prescribed for the permittee.

Item C: Permittee Responsible for Obtaining Other Required Permits

The permittee is responsible for obtaining any other permits, approvals, lands, easements and rights-of-way that may be required to carry out the activities that are authorized by this permit.

Item D: No Right to Trespass or Interfere with Riparian Rights

This permit does not convey to the permittee any right to trespass upon the lands or interfere with the riparian rights of others in order to perform the permitted work nor does it authorize the impairment of any rights, title, or interest in real or personal property held or vested in a person not a party to the permit.
LIST OF CONDITIONS

DEC GENERAL CONDITIONS

General Provisions
Facility Inspection by the Department
Relationship of this Permit to Other Department Orders and Determinations
Applications for permit renewals, modifications and transfers
Permit modifications, suspensions or revocations by the Department
Permit modifications, suspensions or revocations by the Department

Facility Level
Submission of application for permit modification or renewal-REGION 7 HEADQUARTERS
Condition 1: Facility Inspection by the Department
Applicable State Requirement: ECL 19-0305

Item 1.1:
The permitted site or facility, including relevant records, is subject to inspection at reasonable hours and intervals by an authorized representative of the Department of Environmental Conservation (the Department) to determine whether the permittee is complying with this permit and the ECL. Such representative may order the work suspended pursuant to ECL 71-0301 and SAPA 401(3).

Item 1.2:
The permittee shall provide a person to accompany the Department’s representative during an inspection to the permit area when requested by the Department.

Item 1.3:
A copy of this permit, including all referenced maps, drawings and special conditions, must be available for inspection by the Department at all times at the project site or facility. Failure to produce a copy of the permit upon request by a Department representative is a violation of this permit.

Condition 2: Relationship of this Permit to Other Department Orders and Determinations
Applicable State Requirement: ECL 3-0301 (2) (m)

Item 2.1:
Unless expressly provided for by the Department, issuance of this permit does not modify, supersede or rescind any order or determination previously issued by the Department or any of the terms, conditions or requirements contained in such order or determination.

Condition 3: Applications for permit renewals, modifications and transfers
Applicable State Requirement: 6 NYCRR 621.11

Item 3.1:
The permittee must submit a separate written application to the Department for renewal, modification or transfer of this permit. Such application must include any forms or supplemental information the Department requires. Any renewal, modification or transfer granted by the Department must be in writing.

Item 3.2:
The permittee must submit a renewal application at least 180 days before expiration of permits for Title V Facility Permits, or at least 30 days before expiration of permits for State Facility Permits.

Item 3.3:
Permits are transferrable with the approval of the department unless specifically prohibited by
the statute, regulation or another permit condition. Applications for permit transfer should be submitted prior to actual transfer of ownership.

**Condition 4: Permit modifications, suspensions or revocations by the Department**

**Applicable State Requirement:** 6 NYCRR 621.13

**Item 4.1:**
The Department reserves the right to exercise all available authority to modify, suspend, or revoke this permit in accordance with 6NYCRR Part 621. The grounds for modification, suspension or revocation include:

a) materially false or inaccurate statements in the permit application or supporting papers;
b) failure by the permittee to comply with any terms or conditions of the permit;
c) exceeding the scope of the project as described in the permit application;
d) newly discovered material information or a material change in environmental conditions, relevant technology or applicable law or regulations since the issuance of the existing permit;
e) noncompliance with previously issued permit conditions, orders of the commissioner, any provisions of the Environmental Conservation Law or regulations of the Department related to the permitted activity.

**Condition 5: Permit modifications, suspensions or revocations by the Department**

**Applicable State Requirement:** 6 NYCRR 621.13

**Item 5.1:**
The Department reserves the right to modify, suspend, or revoke this permit in accordance with 6NYCRR Part 621. The grounds for modification, suspension or revocation include:

a) materially false or inaccurate statements in the permit application or supporting papers;
b) failure by the permittee to comply with any terms or conditions of the permit;
c) exceeding the scope of the project as described in the permit application;
d) newly discovered material information or a material change in environmental conditions, relevant technology or applicable law or regulations since the issuance of the existing permit;
e) noncompliance with previously issued permit conditions, orders of the commissioner, any provisions of the Environmental Conservation Law or regulations of the Department related to the permitted activity.

NOTIFICATION OF GENERAL PERMITTEE OBLIGATIONS

The items listed below are not subject to the annual compliance certification requirements under Title V. Permittees may also have other obligations under regulations of general applicability.

Item A: Emergency Defense - 6 NYCRR 201-1.5

An emergency constitutes an affirmative defense to an action brought for noncompliance with emissions limitations or permit conditions for all facilities in New York State.

(a) The affirmative defense of emergency shall be demonstrated through properly signed, contemporaneous operating logs, or other relevant evidence that:

1. An emergency occurred and that the facility owner and/or operator can identify the cause(s) of the emergency;
2. The equipment at the permitted facility causing the emergency was at the time being properly operated;
3. During the period of the emergency the facility owner and/or operator took all reasonable steps to minimize levels of emissions that exceeded the emission standards, or other requirements in the permit; and
4. The facility owner and/or operator notified the Department within two working days after the event occurred. This notice must contain a description of the emergency, any steps taken to mitigate emissions, and corrective actions taken.

(b) In any enforcement proceeding, the facility owner and/or operator seeking to establish the occurrence of an emergency has the burden of proof.

(c) This provision is in addition to any emergency or upset provision contained in any applicable requirement.

Item B: Public Access to Recordkeeping for Title V Facilities - 6 NYCRR 201-1.10 (b)

The Department will make available to the public any permit application, compliance plan, permit, and monitoring and compliance certification report pursuant to Section 503(e) of the Act, except for information entitled to confidential treatment pursuant to 6 NYCRR Part 616 - Public Access to records and Section 114(c) of the Act.
Air Pollution Control Permit Conditions

Renewal 2  Page  5    FINAL

Item C: Timely Application for the Renewal of Title V Permits - 6 NYCRR 201-6.3 (a) (4)
Owners and/or operators of facilities having an issued Title V permit shall submit a complete application at least 180 days, but not more than eighteen months, prior to the date of permit expiration for permit renewal purposes.

Item D: Certification by a Responsible Official - 6 NYCRR 201-6.3 (d) (12)
Any application, form, report or compliance certification required to be submitted pursuant to the federally enforceable portions of this permit shall contain a certification of truth, accuracy and completeness by a responsible official. This certification shall state that based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.

Item E: Requirement to Comply With All Conditions - 6 NYCRR 201-6.5 (a) (2)
The permittee must comply with all conditions of the Title V facility permit. Any permit non-compliance constitutes a violation of the Act and is grounds for enforcement action; for permit termination, revocation and reissuance, or modification; or for denial of a permit renewal application.

Item F: Permit Revocation, Modification, Reopening, Reissuance or Termination, and Associated Information Submission Requirements - 6 NYCRR 201-6.5 (a) (3)
This permit may be modified, revoked, reopened and reissued, or terminated for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any permit condition.

Item G: Cessation or Reduction of Permitted Activity Not a Defense - 6 NYCRR 201-6.5 (a) (5)
It shall not be a defense for a permittee in an enforcement action to claim that a cessation or reduction in the permitted activity would have been necessary in order to maintain compliance with the conditions of this permit.

Item H: Property Rights - 6 NYCRR 201-6.5 (a) (6)
This permit does not convey any property rights of any sort or any exclusive privilege.
Item I: Severability - 6 NYCRR 201-6.5 (a) (9)

If any provisions, parts or conditions of this permit are found to be invalid or are the subject of a challenge, the remainder of this permit shall continue to be valid.

Item J: Permit Shield - 6 NYCRR 201-6.5 (g)

All permittees granted a Title V facility permit shall be covered under the protection of a permit shield, except as provided under 6 NYCRR Subpart 201-6. Compliance with the conditions of the permit shall be deemed compliance with any applicable requirements as of the date of permit issuance, provided that such applicable requirements are included and are specifically identified in the permit, or the Department, in acting on the permit application or revision, determines in writing that other requirements specifically identified are not applicable to the major stationary source, and the permit includes the determination or a concise summary thereof. Nothing herein shall preclude the Department from revising or revoking the permit pursuant to 6 NYCRR Part 621 or from exercising its summary abatement authority. Nothing in this permit shall alter or affect the following:

i. The ability of the Department to seek to bring suit on behalf of the State of New York, or the Administrator to seek to bring suit on behalf of the United States, to immediately restrain any person causing or contributing to pollution presenting an imminent and substantial endangerment to public health, welfare or the environment to stop the emission of air pollutants causing or contributing to such pollution;

ii. The liability of a permittee of the Title V facility for any violation of applicable requirements prior to or at the time of permit issuance;

iii. The applicable requirements of Title IV of the Act;

iv. The ability of the Department or the Administrator to obtain information from the permittee concerning the ability to enter, inspect and monitor the facility.

Item K: Reopening for Cause - 6 NYCRR 201-6.5 (i)

This Title V permit shall be reopened and revised under any of the following circumstances:

i. If additional applicable requirements under the Act become applicable where this permit's remaining term is
three or more years, a reopening shall be completed not later than 18 months after promulgation of the applicable requirement. No such reopening is required if the effective date of the requirement is later than the date on which this permit is due to expire, unless the original permit or any of its terms and conditions has been extended by the Department pursuant to the provisions of Part 201-6.7 and Part 621.

ii. The Department or the Administrator determines that the permit contains a material mistake or that inaccurate statements were made in establishing the emissions standards or other terms or conditions of the permit.

iii. The Department or the Administrator determines that the Title V permit must be revised or reopened to assure compliance with applicable requirements.

iv. If the permitted facility is an "affected source" subject to the requirements of Title IV of the Act, and additional requirements (including excess emissions requirements) become applicable. Upon approval by the Administrator, excess emissions offset plans shall be deemed to be incorporated into the permit.

Proceedings to reopen and issue Title V facility permits shall follow the same procedures as apply to initial permit issuance but shall affect only those parts of the permit for which cause to reopen exists.

Reopenings shall not be initiated before a notice of such intent is provided to the facility by the Department at least thirty days in advance of the date that the permit is to be reopened, except that the Department may provide a shorter time period in the case of an emergency.

Item L: Permit Exclusion - ECL 19-0305

The issuance of this permit by the Department and the receipt thereof by the Applicant does not and shall not be construed as barring, diminishing, adjudicating or in any way affecting any legal, administrative or equitable rights or claims, actions, suits, causes of action or demands whatsoever that the Department may have against the Applicant for violations based on facts and circumstances alleged to have occurred or existed prior to the effective date of this permit, including, but not limited to, any enforcement action authorized pursuant to the provisions of applicable federal law, the Environmental Conservation Law of the State of New York (ECL) and Chapter III of the Official Compilation of the Codes, Rules and Regulations of the State of New York...
Permit ID: 7-3134-00022/00011         Facility DEC ID: 7313400022

Air Pollution Control Permit Conditions

Item M: Federally Enforceable Requirements - 40 CFR 70.6 (b)
All terms and conditions in this permit required by the Act or any applicable requirement, including any provisions designed to limit a facility's potential to emit, are enforceable by the Administrator and citizens under the Act. The Department has, in this permit, specifically designated any terms and conditions that are not required under the Act or under any of its applicable requirements as being enforceable under only state regulations.

Mandatory Federally Enforceable Permit Conditions Subject to Annual Certifications at All Times

The following federally enforceable permit conditions are mandatory for all Title V permits and are subject to annual compliance certification requirements at all times.

Condition 1: Acceptable Ambient Air Quality
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 6 NYCRR 200.6

Item 1.1: Notwithstanding the provisions of 6 NYCRR Chapter III, Subchapter A, no person shall allow or permit any air contamination source to emit air contaminants in quantities which alone or in combination with emissions from other air contamination sources would contravene any applicable ambient air quality standard and/or cause air pollution. In such cases where contravention occurs or may occur, the Commissioner shall specify the degree and/or method of emission control required.

Condition 2: Fees
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 6 NYCRR 201-6.5 (a) (7)

Item 2.1: The owner and/or operator of a stationary source shall pay fees to the Department consistent with the fee schedule authorized by ECL 72-0303.

Condition 3: Recordkeeping and reporting of compliance monitoring
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 6 NYCRR 201-6.5 (c)

Item 3.1:
The following information must be included in any required compliance monitoring records and reports:

(i) The date, place, and time of sampling or measurements;

(ii) The date(s) analyses were performed;

(iii) The company or entity that performed the analyses;

(iv) The analytical techniques or methods used including quality assurance and quality control procedures if required;

(v) The results of such analyses including quality assurance data where required; and

(vi) The operating conditions as existing at the time of sampling or measurement.

Any deviation from permit requirements must be clearly identified in all records and reports. Reports must be certified by a responsible official, consistent with Section 201-6.3 of this Part 201.

Condition 4: Monitoring, Related Recordkeeping, and Reporting Requirements.

Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 6 NYCRR 201-6.5 (c) (2)

Item 4.1:
Compliance monitoring and recordkeeping shall be conducted according to the terms and conditions contained in this permit and shall follow all quality assurance requirements found in applicable regulations. Records of all monitoring data and support information must be retained for a period of at least 5 years from the date of the monitoring, sampling, measurement, report, or application. Support information includes all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by the permit.

Condition 5: Compliance Certification

Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 6 NYCRR 201-6.5 (c) (3) (ii)

Item 5.1:
The Compliance Certification activity will be performed for the Facility.

Item 5.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
To meet the requirements of this facility permit with respect to reporting, the permittee must:

Submit reports of any required monitoring at a minimum
frequency of every 6 months, based on a calendar year reporting schedule. These reports shall be submitted to the Department within 30 days after the end of a reporting period. All instances of deviations from permit requirements must be clearly identified in such reports. All required reports must be certified by the responsible official for this facility.

Notify the Department and report permit deviations and incidences of noncompliance stating the probable cause of such deviations, and any corrective actions or preventive measures taken. Where the underlying applicable requirement contains a definition of prompt or otherwise specifies a time frame for reporting deviations, that definition or time frame shall govern. Where the underlying applicable requirement fails to address the time frame for reporting deviations, reports of deviations shall be submitted to the permitting authority based on the following schedule:

1. For emissions of a hazardous air pollutant (as identified in an applicable regulation) that continue for more than an hour in excess of permit requirements, the report must be made within 24 hours of the occurrence.

2. For emissions of any regulated air pollutant, excluding those listed in paragraph (1) of this section, that continue for more than two hours in excess of permit requirements, the report must be made within 48 hours.

3. For all other deviations from permit requirements, the report shall be contained in the 6 month monitoring report required above.

4. This permit may contain a more stringent reporting requirement than required by paragraphs (1), (2) or (3) above. If more stringent reporting requirements have been placed in this permit or exist in applicable requirements that apply to this facility, the more stringent reporting requirement shall apply.

If above paragraphs (1) or (2) are met, the source must notify the permitting authority by telephone during normal business hours at the Regional Office of jurisdiction for this permit, attention Regional Air Pollution Control Engineer (RAPCE) according to the timetable listed in paragraphs (1) and (2) of this section. For deviations and incidences that must be reported outside of normal business hours, on weekends, or holidays, the DEC Spill Hotline phone number at 1-800-457-7362 shall be used.
written notice, certified by a responsible official consistent with 6 NYCRR Part 201-6.3(d)(12), must be submitted within 10 working days of an occurrence for deviations reported under (1) and (2). All deviations reported under paragraphs (1) and (2) of this section must also be identified in the 6 month monitoring report required above.

The provisions of 6 NYCRR 201-1.4 shall apply if the permittee seeks to have a violation excused unless otherwise limited by regulation. In order to have a violation of a federal regulation (such as a new source performance standard or national emissions standard for hazardous air pollutants) excused, the specific federal regulation must provide for an affirmative defense during start-up, shutdowns, malfunctions or upsets. Notwithstanding any recordkeeping and reporting requirements in 6 NYCRR 201-1.4, reports of any deviations shall not be on a less frequent basis than the reporting periods described in paragraphs (1) and (4) above.

In the case of any condition contained in this permit with a reporting requirement of “Upon request by regulatory agency” the permittee shall include in the semiannual report, a statement for each such condition that the monitoring or recordkeeping was performed as required or requested and a listing of all instances of deviations from these requirements.

In the case of any emission testing performed during the previous six month reporting period, either due to a request by the Department, EPA, or a regulatory requirement, the permittee shall include in the semiannual report a summary of the testing results and shall indicate whether or not the Department or EPA has approved the results.

All semiannual reports shall be submitted to the Administrator (or his or her representative) as well as two copies to the Department (one copy to the regional air pollution control engineer (RAPCE) in the regional office and one copy to the Bureau of Quality Assurance (BQA) in the DEC central office). Mailing addresses for the above referenced persons are contained in the monitoring condition for 6 NYCRR Part 201-6.5(e), contained elsewhere in this permit.

Reporting Requirements: SEMI-ANNUALLY (CALENDAR) Reports due 30 days after the reporting period. The initial report is due 7/30/2012. Subsequent reports are due every 6 calendar month(s).
Condition 6: Compliance Certification  
Effective between the dates of 01/23/2012 and 01/22/2017  

Applicable Federal Requirement: 6 NYCRR 201-6.5 (e)

Item 6.1:  
The Compliance Certification activity will be performed for the Facility.

Item 6.2:  
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES  
Monitoring Description:  
Requirements for compliance certifications with terms and conditions contained in this facility permit include the following:

i. Compliance certifications shall contain:
- the identification of each term or condition of the permit that is the basis of the certification;
- the compliance status;
- whether compliance was continuous or intermittent;
- the method(s) used for determining the compliance status of the facility, currently and over the reporting period consistent with the monitoring and related recordkeeping and reporting requirements of this permit;
- such other facts as the Department may require to determine the compliance status of the facility as specified in any special permit terms or conditions; and
- such additional requirements as may be specified elsewhere in this permit related to compliance certification.

ii. The responsible official must include in the annual certification report all terms and conditions contained in this permit which are identified as being subject to certification, including emission limitations, standards, or work practices. That is, the provisions labeled herein as "Compliance Certification" are not the only provisions of this permit for which an annual certification is required.

iii. Compliance certifications shall be submitted annually. Certification reports are due 30 days after the anniversary date of four consecutive calendar quarters. The first report is due 30 days after the calendar quarter that occurs just prior to the permit anniversary date, unless another quarter has been acceptable by the Department.

iv. All compliance certifications shall be submitted to
the Administrator (or his or her representative) as well as two copies to the Department (one copy to the regional air pollution control engineer (RAPCE) in the regional office and one copy to the Bureau of Quality Assurance (BQA) in the DEC central office). Please send annual compliance certifications to Chief of the Stationary Source Compliance Section, the Region 2 EPA representative for the Administrator, at the following address:

USEPA Region 2
Air Compliance Branch
290 Broadway
New York, NY 10007-1866

The address for the RAPCE is as follows:

615 Erie Boulevard, West
Syracuse, NY 13204-2400

The address for the BQA is as follows:

NYSDEC
Bureau of Quality Assurance
625 Broadway
Albany, NY 12233-3258

Monitoring Frequency: ANNUALLY
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2013.
Subsequent reports are due on the same day each year

Condition 7: Compliance Certification
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 6 NYCRR 202-2.1

Item 7.1:
The Compliance Certification activity will be performed for the Facility.

Item 7.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
Emission statements shall be submitted on or before April 15th each year for emissions of the previous calendar year.

Monitoring Frequency: ANNUALLY
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due by April 15th for previous calendar year
Condition 8: Recordkeeping requirements  
Effective between the dates of 01/23/2012 and 01/22/2017  

Applicable Federal Requirement: 6 NYCRR 202-2.5  

Item 8.1:  
(a) The following records shall be maintained for at least five years:  
   (1) a copy of each emission statement submitted to the department; and  
   (2) records indicating how the information submitted in the emission statement was determined, including any calculations, data, measurements, and estimates used.  
(b) These records shall be made available at the facility to the representatives of the department upon request during normal business hours.  

Condition 9: Open Fires - Prohibitions  
Effective between the dates of 01/23/2012 and 01/22/2017  

Applicable Federal Requirement: 6 NYCRR 215.2  

Item 9.1:  
Except as allowed by Title 6 NYCRR Section 215.3, no person shall burn, cause, suffer, allow or permit the burning of any materials in an open fire.  

Item 9.2  
Per Section 215.3, burning in an open fire, provided it is not contrary to other law or regulation, will be allowed as follows:  
(a) On-site burning in any town with a total population less than 20,000 of downed limbs and branches (including branches with attached leaves or needles) less than six inches in diameter and eight feet in length between May 15th and the following March 15th. For the purposes of this subdivision, the total population of a town shall include the population of any village or portion thereof located within the town. However, this subdivision shall not be construed to allow burning within any village.  
(b) Barbecue grills, maple sugar arches and similar outdoor cooking devices when actually used for cooking or processing food.  
(c) Small fires used for cooking and camp fires provided that only charcoal or untreated wood is used as fuel and the fire is not left unattended until extinguished.  
(d) On-site burning of agricultural wastes as part of a valid agricultural operation on contiguous agricultural lands larger than five acres actively devoted to agricultural or horticultural use, provided such waste is actually grown or generated on those lands and such waste is capable of being fully burned within a 24-hour period.  
(e) The use of liquid petroleum fueled smudge pots to prevent frost damage to crops.  
(f) Ceremonial or celebratory bonfires where not otherwise prohibited by law, provided that only untreated wood or other agricultural products are used as fuel and the fire is not left unattended until extinguished.  
(g) Small fires that are used to dispose of a flag or religious item, and small fires or other smoke producing process where not otherwise prohibited by law that are used in connection with a religious ceremony.  
(h) Burning on an emergency basis of explosive or other dangerous or contraband materials by police or other public safety organization.
(i) Prescribed burns performed according to Part 194 of this Title.
(j) Fire training, including firefighting, fire rescue, and fire/arson investigation training, performed under applicable rules and guidelines of the New York State Department of State's Office of Fire Prevention and Control. For fire training performed on acquired structures, the structures must be emptied and stripped of any material that is toxic, hazardous or likely to emit toxic smoke (such as asbestos, asphalt shingles and vinyl siding or other vinyl products) prior to burning and must be at least 300 feet from other occupied structures. No more than one structure per lot or within a 300 foot radius (whichever is bigger) may be burned in a training exercise.
(k) Individual open fires as approved by the Director of the Division of Air Resources as may be required in response to an outbreak of a plant or animal disease upon request by the commissioner of the Department of Agriculture and Markets, or for the destruction of invasive plant and insect species.
(l) Individual open fires that are otherwise authorized under the environmental conservation law, or by rule or regulation of the Department.

MANDATORY FEDERALLY ENFORCEABLE PERMIT CONDITIONS
SUBJECT TO ANNUAL CERTIFICATIONS ONLY IF APPLICABLE

The following federally enforceable permit conditions are mandatory for all Title V permits and are subject to annual compliance certification requirements only if effectuated during the reporting period.
[NOTE: The corresponding annual compliance certification for those conditions not effectuated during the reporting period shall be specified as "not applicable".]

Condition 10: Maintenance of Equipment
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 6 NYCRR 200.7

Item 10.1:
Any person who owns or operates an air contamination source which is equipped with an emission control device shall operate such device and keep it in a satisfactory state of maintenance and repair in accordance with ordinary and necessary practices, standards and procedures, inclusive of manufacturer's specifications, required to operate such device effectively.

Condition 11: Recycling and Salvage
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 6 NYCRR 201-1.7

Item 11.1:
Where practical, any person who owns or operates an air contamination source shall recycle or salvage air contaminants collected in an air cleaning device according to the requirements of the ECL.

Condition 12: Prohibition of Reintroduction of Collected Contaminants to the air
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 6 NYCRR 201-1.8

Item 12.1:
No person shall unnecessarily remove, handle or cause to be handled, collected air contaminants from an air cleaning device for recycling, salvage or disposal in a manner that would reintroduce them to the outdoor atmosphere.

Condition 13: Exempt Sources - Proof of Eligibility
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 6 NYCRR 201-3.2 (a)

Item 13.1:
The owner and/or operator of an emission source or unit that is eligible to be exempt may be required to certify that it operates within the specific criteria described in this Subpart. The owner or operator of any such emission source must maintain all required records on-site for a period of five years and make them available to representatives of the department upon request. Department representatives must be granted access to any facility which contains emission sources or units subject to this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other State and Federal air pollution control requirements, regulations, or law.

Condition 14: Trivial Sources - Proof of Eligibility
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 6 NYCRR 201-3.3 (a)

Item 14.1:
The owner and/or operator of an emission source or unit that is listed as being trivial in this Part may be required to certify that it operates within the specific criteria described in this Subpart. The owner or operator of any such emission source must maintain all required records on-site for a period of five years and make them available to representatives of the department upon request. Department representatives must be granted access to any facility which contains emission sources or units subject to this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other State and Federal air pollution control requirements, regulations, or law.

Condition 15: Standard Requirement - Provide Information
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 6 NYCRR 201-6.5 (a) (4)

Item 15.1:
The owner and/or operator shall furnish to the department, within a reasonable time, any information that the department may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating the permit or to determine compliance with the permit. Upon request, the permittee shall also furnish to the department copies of records required to be kept by the permit or, for information claimed to be confidential, the permittee may furnish such records directly to the administrator along with a claim of confidentiality, if the administrator initiated the request for information or otherwise has need of it.
Condition 16: General Condition - Right to Inspect
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 6 NYCRR 201-6.5 (a) (8)

Item 16.1:
The department or an authorized representative shall be allowed upon presentation of credentials and other documents as may be required by law to:

(i) enter upon the permittee's premises where a facility subject to the permitting requirements of this Subpart is located or emissions-related activity is conducted, or where records must be kept under the conditions of the permit;

(ii) have access to and copy, at reasonable times, any records that must be kept under the conditions of the permit;

(iii) inspect at reasonable times any emission sources, equipment (including monitoring and air pollution control equipment), practices, and operations regulated or required under the permit; and

(iv) sample or monitor at reasonable times substances or parameters for the purpose of assuring compliance with the permit or applicable requirements.

Condition 17: Standard Requirements - Progress Reports
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 6 NYCRR 201-6.5 (d) (5)

Item 17.1:
Progress reports consistent with an applicable schedule of compliance are to be submitted at least semiannually, or at a more frequent period if specified in the applicable requirement or by the department. Such progress reports shall contain the following:

(i) dates for achieving the activities, milestones, or compliance required in the schedule of compliance, and dates when such activities, milestones or compliance were achieved; and

(ii) an explanation of why any dates in the schedule of compliance were not or will not be met, and any preventive or corrective measures adopted.

Condition 18: Off Permit Changes
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 6 NYCRR 201-6.5 (f) (6)

Item 18.1:
No permit revision will be required for operating changes that contravene an express permit term, provided that such changes would not violate applicable requirements as defined under this Part or contravene federally enforceable monitoring (including test methods), recordkeeping, reporting, or compliance certification permit terms and conditions. Such changes may be made without requiring a permit revision, if the changes are not modifications under any provision of title I of the act and the changes do not exceed the emissions allowable under the permit.
(whether expressed therein as a rate of emissions or in terms of total emissions) provided that the facility provides the administrator and the department with written notification as required below in advance of the proposed changes within a minimum of seven days. The facility owner or operator, and the department shall attach each such notice to their copy of the relevant permit.

(i) For each such change, the written notification required above shall include a brief description of the change within the permitted facility, the date on which the change will occur, any change in emissions, and any permit term or condition that is no longer applicable as a result of the change.

(ii) The permit shield described in section 6 NYCRR 201-6.6 shall not apply to any change made pursuant to this paragraph.

Condition 19: Required Emissions Tests
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 6 NYCRR 202-1.1

Item 19.1:
For the purpose of ascertaining compliance or non-compliance with any air pollution control code, rule or regulation, the commissioner may require the person who owns such air contamination source to submit an acceptable report of measured emissions within a stated time.

Condition 20: Required Emissions Tests
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 6 NYCRR 202-1.1

Item 20.1:
For the purpose of ascertaining compliance or non-compliance with any air pollution control code, rule or regulation, the commissioner may require the person who owns such air contamination source to submit an acceptable report of measured emissions within a stated time.

Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 40 CFR Part 68

Item 21.1:
If a chemical is listed in Tables 1, 2, 3 or 4 of 40 CFR §68.130 is present in a process in quantities greater than the threshold quantity listed in Tables 1, 2, 3 or 4, the following requirements will apply:

a) The owner or operator shall comply with the provisions of 40 CFR Part 68 and;

b) The owner or operator shall submit at the time of permit issuance (if not previously submitted) one of the following, if such quantities are present:
1) A compliance schedule for meeting the requirements of 40 CFR Part 68 by the date provided in 40 CFR §68.10(a) or,

2) A certification statement that the source is in compliance with all requirements of 40 CFR Part 68, including the registration and submission of the Risk Management Plan. Information should be submitted to:

Risk Management Plan Reporting Center
C/O CSC
8400 Corporate Dr
Carrollton, Md. 20785

**Condition 22:** Recycling and Emissions Reduction
Effective between the dates of 01/23/2012 and 01/22/2017

**Applicable Federal Requirement:** 40 CFR 82, Subpart F

**Item 22.1:**
The permittee shall comply with all applicable provisions of 40 CFR Part 82.

The following conditions are subject to annual compliance certification requirements for Title V permits only.

**Condition 23:** Compliance Certification
Effective between the dates of 01/23/2012 and 01/22/2017

**Applicable Federal Requirement:** 6 NYCRR 200.6

**Item 23.1:**
The Compliance Certification activity will be performed for the Facility.

Regulated Contaminant(s):
CAS No: 000050-00-0 FORMALDEHYDE

**Item 23.2:**
Compliance Certification shall include the following monitoring:

Monitoring Type: AMBIENT AIR MONITORING

Monitoring Description:
The owner or operator shall evaluate the potential ambient impacts of formaldehyde emitted from the existing engines located at the facility. The facility owner or operator shall quantify the formaldehyde emissions rates and estimate ambient impacts pursuant to a modeling protocol approved by the DEC.

1. Not later than December 31, 2011, the owner or operator shall complete the installation of an oxidation
catalyst on Unit 1A, the 3,400 hp Clark TLA-10 compressor engine identified as Emission Source R001A.

2. Not later than 180 operating days after installation of the oxidation catalyst on Emission Source R001A, the owner or operator shall conduct formaldehyde and CO emissions testing in accordance with a protocol approved by the DEC. Not later than 60 days after the completion of the formaldehyde testing, the owner or operator shall submit to the DEC a complete report of the results of such tests.

3. The owner or operator shall conduct periodic formaldehyde emissions tests on Emission Unit R001A at least once every three years or 8,760 operating hours, whichever occurs first. Testing shall be conducted in accordance with a protocol approved by the DEC and results of such testing shall be submitted no later than 60 days after the completion of such tests.

4. Not later than December 31, 2011, the owner or operator shall complete the modification project on Emission Source R003A described elsewhere in this permit.

5. Not later than 180 operating days after installation of the piston modifications on Emission Source R003A, the owner or operator shall conduct formaldehyde and CO emissions testing in accordance with a protocol approved by the DEC. Not later than 60 days after the completion of the formaldehyde testing, the owner or operator shall submit to the DEC a complete report of the results of such tests.

6. Not later than 90 days after submission of the test report required in Item 5 above, the owner or operator shall submit to the DEC a report of ambient modeling conducted in accordance with a protocol approved by the DEC. Such report shall predict ambient concentrations of formaldehyde resulting from emissions from all five (5) compressor engines.

7. If predicted annual ambient impacts of formaldehyde exceed 0.60 micrograms per cubic meter, the owner or operator shall complete the installation of an oxidation catalyst on Unit 3A no later than December 31, 2013. Not later than 180 operating days after installation of the oxidation catalyst on Emission Source R003A, if required, the owner or operator shall conduct formaldehyde and CO emissions testing in accordance with a protocol approved by the DEC. Not later than 60 days after the completion of the formaldehyde testing, the owner or operator shall
submit to the DEC a complete report of the results of such tests.

8. On and after one year after receipt of written approval from the DEC of the modeling report specified in item 6, the owner or operator shall not cause or allow the emission of formaldehyde that will result in a predicted ambient impact in excess of (1) 30 micrograms per cubic meter, one hour average, or (2) 0.60 micrograms per cubic meter, annual average, based on the prior year's actual operating hours and operating load.

9. On an annual basis, the owner or operator shall submit to the DEC a report showing the actual operating hours and operating load for each engine, the associated emissions, and a modeling report showing the predicted ambient impacts of formaldehyde. Predicted ambient concentrations may be estimated by scaling the model results from the report submitted pursuant to item 6 above.

10. If, based on actual hours of operation for the most recently completed calendar year, the predicted ambient impact of formaldehyde is in excess of 0.60 micrograms per cubic meter, annual average, the owner or operator shall, undertake one of the following actions:

i) replace the catalyst on any one or all of Units 1A, 2A, and 3A, in accordance with Item 11 of this Condition such that emissions do not result in a predicted ambient impact in excess of (1) 30 micrograms per cubic meter, one hour average, or (2) 0.60 micrograms per cubic meter, annual average;

ii) not later than 2 years after submission of the modeling report required in Item 9 showing that predicted ambient concentrations exceed 0.60 micrograms per cubic meter, replacement of any or all of the existing engines (Units 1A, 2A and or 3A) with new engines or other sources of compression (such as electric compressors or stationary gas turbines) and associated controls

iii) not later than 2 years after submission of the modeling report required in Item 9 showing that predicted ambient concentrations exceed 0.60 micrograms per cubic meter, the installation of additional emission controls, either in addition to the controls that currently exist or a replacement in entirety, resulting in emissions that do not result in a predicted ambient impact in excess of (1) 30 micrograms per cubic meter, one hour average, or (2) 0.60 micrograms per cubic meter, annual average, based on the maximum potential operating hours and operating load.
11. If the performance of the oxidation catalysts on any unit degrades such that emissions of formaldehyde increase to the extent that predicted ambient impacts exceed 0.60 micrograms per cubic meter, that catalyst shall be replaced within 180 days of completion of such test results. After installation of the new catalyst, emissions of formaldehyde shall be tested in accordance with a protocol approved by the DEC and a test report submitted to the DEC within 60 days of completion of such tests.

On an annual basis, the owner or operator shall submit to the DEC a report stating whether he or she has complied with this condition.

Upper Permit Limit: 0.60 micrograms per cubic meter
Reference Test Method: DEC approved model
Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Averaging Method: ARITHMETIC MEAN
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2013.
Subsequent reports are due every 12 calendar month(s).

Condition 24: Emission Unit Definition
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 6 NYCRR Subpart 201-6

Item 24.1:
The facility is authorized to perform regulated processes under this permit for:
Emission Unit: R-24101
Emission Unit Description:
TWO 3,400 HP CLARK, MODEL TLA-10
RECIPIROCATING ENGINES (2SLB), EACH FIRING NATURAL GAS AND RETROFITTED WITH LOW EMISSIONS COMBUSTION KIT.

Building(s): 1

Item 24.2:
The facility is authorized to perform regulated processes under this permit for:
Emission Unit: R-24102
Emission Unit Description:
ONE 4,500 HP COOPER BESSEMER MODEL 10W-330C2 "CLEAN BURN" 2SLB RECIPIROCATING ENGINE THAT FIRES NATURAL GAS.
This device is rated at 4,500 hp at 80 F.
The maximum potential ambient rating is 5,220 hp at 40 F.
This modification (Ren 2 Mod 0) authorizes the redesign of the cylinder head, piston and pre-combustion chamber to improve fuel economy and spark plug life. A modest (5%) reduction in CO and HCHO is anticipated.

Building(s): 1

Item 24.3:
The facility is authorized to perform regulated processes under this permit for:
Emission Unit: R-24104
Emission Unit Description:
Caterpillar Model 3612 internal combustion engine (4 stroke, lean burn) rated at 3,785 hp.

Building(s): 2

Item 24.4:
The facility is authorized to perform regulated processes under this permit for:
Emission Unit: R-24105
Emission Unit Description:
Caterpillar Model 3612 internal combustion engine (4 stroke lean burn) rated at 3,785 HP

Building(s): 2

Condition 25: Compliance Certification
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 6 NYCRR 201-6.5 (b) (2)

Item 25.1:
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

Emission Unit: R-24102

Regulated Contaminant(s):
CAS No: 0NY210-00-0 OXIDES OF NITROGEN

Item 25.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: INTERMITTENT EMISSION TESTING
Monitoring Description:
Periodic Monitoring for Compliance with NOx RACT

On an annual basis, or at a more frequent basis, the owner or operator shall conduct emission tests for NOx. Such
testing shall be conducted using ASTM D6522-00 or equivalent, in accordance with a protocol approved by the DEC. Submission of the protocol and the final test report shall be in accordance with 6 NYCRR 202-1. The protocol shall be submitted at least 30 days prior to conducting the tests and the final report is due within 60 days of completion of such tests.

On an annual basis, the owners or operators shall submit to the DEC a report stating whether any testing has been conducted, and if so, the results of such testing.

Parameter Monitored: OXIDES OF NITROGEN
Upper Permit Limit: 1.0 grams per brake horsepower-hour
Reference Test Method: ASTM D6522-0
Monitoring Frequency: ANNUALLY
Averaging Method: 1-HOUR AVERAGE
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2013.
Subsequent reports are due every 12 calendar month(s).

Condition 26: Compliance Certification
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 6 NYCRR 201-6.5 (b) (2)

Item 26.1:
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

Emission Unit: R-24101

Regulated Contaminant(s):
CAS No: 0NY210-00-0 OXIDES OF NITROGEN

Item 26.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: INTERMITTENT EMISSION TESTING
Monitoring Description:
Periodic Monitoring for Compliance with NOx RACT

On an annual basis, or at a more frequent basis, the owner or operator shall conduct emission tests for NOx. Such testing shall be conducted using ASTM D6522-00 or equivalent, in accordance with a protocol approved by the DEC. Submission of the protocol and the final test report shall be in accordance with 6 NYCRR 202-1. The protocol shall be submitted at least 30 days prior to conducting the tests and the final report is due within 60 days of completion of such tests.
On an annual basis, the owners or operators shall submit to the DEC a report stating whether any testing has been conducted, and if so, the results of such testing.

Parameter Monitored: OXIDES OF NITROGEN  
Upper Permit Limit: 1.5 grams per brake horsepower-hour  
Reference Test Method: ASTM D6522-0  
Monitoring Frequency: ANNUALLY  
Averaging Method: 1-HOUR AVERAGE  
Reporting Requirements: ANNUALLY (CALENDAR)  
Reports due 30 days after the reporting period.

The initial report is due 1/30/2013. Subsequent reports are due every 12 calendar month(s).

**Condition 27:** Non Applicable requirements  
Effective between the dates of 01/23/2012 and 01/22/2017

**Applicable Federal Requirement:** 6 NYCRR 201-6.5 (g)

**Item 27.1:**
This section contains a summary of those requirements that have been specifically identified as being not applicable to this facility and/or emission units, emission points, processes and/or emission sources within this facility. The summary also includes a justification for classifying any such requirements as non-applicable.

- 40 CFR 60.14  
  Emission Unit: R24102  
  Reason: The modification of the piston, piston heads and pre-combustion chambers to extend useful spark plug life and fuel economy will result in modest emissions reductions of CO and VOC and no change in emissions of NOx.

The modification will not result in increases in emissions of any pollutant regulated by 40 CFR Part 60, Subpart JJJJ. If an increase occurs, the provisions of 40 CFR Part 60, Subpart JJJJ will apply to that pollutant.

The determination of whether an increase occurs is determined using the procedures of 40 CFR Part 60, Appendix C.

**Condition 28:** Capping Monitoring Condition  
Effective between the dates of 01/23/2012 and 01/22/2017

**Applicable Federal Requirement:** 6 NYCRR Subpart 201-7

**Item 28.1:**
Under the authority of 6 NYCRR Part 201-7, this condition contains an emission cap for the
purpose of limiting emissions from the facility, emission unit or process to avoid being subject to the following applicable requirement(s) that the facility, emission unit or process would otherwise be subject to:

6 NYCRR Subpart 231-2

**Item 28.2:**
Operation of this facility shall take place in accordance with the approved criteria, emission limits, terms, conditions and standards in this permit.

**Item 28.3:**
The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or law.

**Item 28.4:**
On an annual basis, unless otherwise specified below, beginning one year after the granting of an emissions cap, the responsible official shall provide a certification to the Department that the facility has operated all emission units within the limits imposed by the emission cap. This certification shall include a brief summary of the emissions subject to the cap for that time period and a comparison to the threshold levels that would require compliance with an applicable requirement.

**Item 28.5:**
The emission of pollutants that exceed the applicability thresholds for an applicable requirement, for which the facility has obtained an emissions cap, constitutes a violation of Part 201 and of the Act.

**Item 28.6:**
The Compliance Certification activity will be performed for the facility: The Compliance Certification applies to:

- Emission Unit: R-24104
- Emission Unit: R-24105

Regulated Contaminant(s):
- CAS No: 0NY998-00-0 VOC

**Item 28.7:**
Compliance Certification shall include the following monitoring:
- Capping: Yes
- Monitoring Type: INTERMITTENT EMISSION TESTING

Monitoring Description:
The owner and operator shall not cause or allow emissions of VOC in excess of 0.50 grams/bhp-hr. Emissions shall be determined using 40 CFR Part 60, Appendix A, Method 18, or equivalent.
Initial testing shall be conducted no later than 180 days after first combusting fuel, excluding the initial engine commissioning period of up to 200 operating hours. Testing shall be conducted in accordance with a test protocol approved by the DEC.

Subsequent performance tests must be conducted upon the request of the DEC.

Within 60 days after completion of any emissions tests, the owner or operator shall submit to the DEC a report describing the results of emissions testing.

On an annual basis, the owner or operator must submit to the DEC a report stating whether a performance test was conducted, and if so, state whether the emissions were less than the allowable emission limit. The owner or operator must also state whether any changes were made to the operation of the device that could lead to increased VOC emissions.

Parameter Monitored: VOC
Upper Permit Limit: 0.50 grams per brake horsepower-hour
Reference Test Method: EPA Method 18 or equivalent
Monitoring Frequency: ONCE DURING THE TERM OF THE PERMIT
Averaging Method: AVERAGING METHOD AS PER REFERENCE TEST METHOD INDICATED
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2013.
Subsequent reports are due every 12 calendar month(s).

Condition 29: Capping Monitoring Condition
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 6 NYCRR Subpart 201-7

Item 29.1: Under the authority of 6 NYCRR Part 201-7, this condition contains an emission cap for the purpose of limiting emissions from the facility, emission unit or process to avoid being subject to the following applicable requirement(s) that the facility, emission unit or process would otherwise be subject to:

6 NYCRR Subpart 231-2

Item 29.2: Operation of this facility shall take place in accordance with the approved criteria, emission limits, terms, conditions and standards in this permit.

Item 29.3: The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request.
Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or law.

**Item 29.4:**
On an annual basis, unless otherwise specified below, beginning one year after the granting of an emissions cap, the responsible official shall provide a certification to the Department that the facility has operated all emission units within the limits imposed by the emission cap. This certification shall include a brief summary of the emissions subject to the cap for that time period and a comparison to the threshold levels that would require compliance with an applicable requirement.

**Item 29.5:**
The emission of pollutants that exceed the applicability thresholds for an applicable requirement, for which the facility has obtained an emissions cap, constitutes a violation of Part 201 and of the Act.

**Item 29.6:**
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

- Emission Unit: R-24104
- Emission Unit: R-24105
- Regulated Contaminant(s):
  - CAS No: 0NY210-00-0 OXIDES OF NITROGEN

**Item 29.7:**
Compliance Certification shall include the following monitoring:

- Capping: Yes
- Monitoring Type: INTERMITTENT EMISSION TESTING
- Monitoring Description:
The owner and/operator shall not cause or allow emissions of NOx in excess of 0.50 grams/bhp-hr. Emissions shall be determined using Reference Method 7E or ASTM D6522-00, or equivalent.

Initial testing shall be conducted no later than 180 days after first combusting fuel, excluding the initial engine commissioning period of up to 200 operating hours. Testing shall be conducted in accordance with a test protocol approved by the DEC.

Subsequent performance tests must be conducted annually.

No later than 60 days after completion of any emissions tests, the owner or operator shall submit to the DEC a report describing the results of emissions testing.
On an annual basis, the owner or operator must submit to the DEC a report stating whether a performance test was conducted, and if so, state whether the emissions were less than the allowable emission limit.

Parameter Monitored: OXIDES OF NITROGEN  
Upper Permit Limit: 0.50 grams per brake horsepower-hour  
Reference Test Method: ASTM D6522-00 or EPA 7E  
Monitoring Frequency: ANNUALLY  
Averaging Method: AVERAGING METHOD AS PER REFERENCE TEST METHOD INDICATED  
Reporting Requirements: ANNUALLY (CALENDAR)  
Reports due 30 days after the reporting period.  
The initial report is due 1/30/2013.  
Subsequent reports are due every 12 calendar month(s).

Condition 30: Capping Monitoring Condition  
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 6 NYCRR Subpart 201-7

Item 30.1:  
Under the authority of 6 NYCRR Part 201-7, this condition contains an emission cap for the purpose of limiting emissions from the facility, emission unit or process to avoid being subject to the following applicable requirement(s) that the facility, emission unit or process would otherwise be subject to:

40 CFR 52.21

Item 30.2:  
Operation of this facility shall take place in accordance with the approved criteria, emission limits, terms, conditions and standards in this permit.

Item 30.3:  
The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or law.

Item 30.4:  
On an annual basis, unless otherwise specified below, beginning one year after the granting of an emissions cap, the responsible official shall provide a certification to the Department that the facility has operated all emission units within the limits imposed by the emission cap. This certification shall include a brief summary of the emissions subject to the cap for that time period and a comparison to the threshold levels that would require compliance with an applicable requirement.

Item 30.5:  
The emission of pollutants that exceed the applicability thresholds for an applicable requirement, for which the facility has obtained an emissions cap, constitutes a violation of Part 201 and of the Act.
Item 30.6:
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

  Emission Unit: R-24104

  Emission Unit: R-24105

  Regulated Contaminant(s):
  CAS No: 000630-08-0  CARBON MONOXIDE

Item 30.7:
Compliance Certification shall include the following monitoring:

  Capping: Yes
  Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE
  Monitoring Description:
  No owner or operator shall cause annual emissions of carbon monoxide from the combined emissions points 24104 and 24105 in excess of 100 tons per 12 month rolling basis.

  Emissions from each emission point shall be computed according to the following equation:

  CO emissions, TPY = (mass of CO emissions/bhp-hr)x(average bhp for each hour)x(operating hour).

  The emissions factors (mass of CO per brake horsepower hour) shall be based on the most recent stack test (including results from the use of ASTM D6522-00) or on the highest emissions factor (based on testing) in that reporting period. The revised CO emissions factor must be used upon submission of the test report to the DEC.

  On an annual basis, the owner or operator shall submit to the DEC a report stating whether combined emissions were less than 100 tons per year for each 12 month rolling period in the reporting period. Additionally, in the event that emissions of CO exceed 100 TPY in any rolling 12 month period, the owner or operator shall, within 30 days of such excess emission, submit to the DEC a report of such excess emissions.

Parameter Monitored: CARBON MONOXIDE
Upper Permit Limit: 100  tons per year
Monitoring Frequency: MONTHLY
Averaging Method: 12 MONTH AVERAGE - ROLLED MONTHLY
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2013.
Subsequent reports are due every 12 calendar month(s).

**Condition 31:** Air pollution prohibited
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 6 NYCRR 211.1

**Item 31.1:**
No person shall cause or allow emissions of air contaminants to the outdoor atmosphere of such quantity, characteristic or duration which are injurious to human, plant or animal life or to property, or which unreasonably interfere with the comfortable enjoyment of life or property. Notwithstanding the existence of specific air quality standards or emission limits, this prohibition applies, but is not limited to, any particulate, fume, gas, mist, odor, smoke, vapor, pollen, toxic or deleterious emission, either alone or in combination with others.

**Condition 32:** Compliance Certification
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 6 NYCRR Part 226

**Item 32.1:**
The Compliance Certification activity will be performed for the Facility.

**Item 32.2:**
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
6NYCRR 226. Requirements for Cold Cleaning Degreasers
(For Title V after 12/31/2003)

Compressor Station 241 will operate the cold cleaner
degreasers in accordance with the equipment specifications
outlined below or under the exemption provisions of NYCRR
226.6(a)(4).

A. Equipment Specifications

The following types of control equipment must be used when
conducting cold cleaning degreasing, solvent metal
cleaning:

1. A cover which can be operated easily.
2. An internal drainage facility (under cover), if
   practical.
3. A control system that limits VOC emissions to those
   achievable with equipment having a freeboard ratio greater
   than or equal to 0.5, or a water cover when the solvent is
insoluble in and heavier than water. This does not apply to remote reservoir degreasers.
(4) Solvent with a vapor pressure of 1.0 mm Hg, or less, at 20 °C.

B. Operating Requirements:

When cold cleaning, the clean parts must be drained at least 15 seconds or until dripping ceases.

C. General Requirements:

A Person conducting solvent metal cleaning must:
(1) Store solvent in covered containers and transfer or dispose of waste solvent in such a manner that less than 20 percent of the waste solvent (by weight) can evaporate into the atmosphere.
(2) Maintain equipment to minimize leaks and fugitive emissions.
(3) Display at the equipment location a conspicuous summary of proper operating procedures consistent with minimizing emissions of VOCs.
(4) Keep the degreaser cover closed except when:
   (a) parts are being placed into or being removed from the degreaser;
   (b) adding or removing solvent from the degreaser;
   (c) no solvent is in the degreaser; or
   (d) when manually cleaning metal parts in the cold cleaning degreaser.
(5) Create and retain a record of solvent consumption for five years. This record must be made available to the Department upon request.
(6) Not clean sponges, fabric, wood, leather, paper products and other absorbent materials in a degreaser.
(7) If using a cold cleaning degreaser that is subject to paragraph 226.3(a)(4), retain a record of the following three items for five years and provide these records to the Department upon request. An invoice, a bill of sale, a certificate covering multiple sales, a Material Safety Data Sheet (MSDS), or other appropriate documentation acceptable to the Department may be used to comply with this requirement.
   (a) the name and address of the solvent supplier;
   (b) the type of solvent including the product or vendor identification number; and
   (c) the vapor pressure of the solvent measured in mm Hg at 20 °C (68 °F).
(8) Include in the semiannual monitoring report and annual compliance certifications (required of all permittees subject to Title V) the solvent consumption required under (5) above, as well as a statement that the permittee's
obligations under items (1) through (7) above have been
met for the period of the report or certification. This
statement must be based on the permittee's observations on
a daily basis that the operation of the solvent metal
cleaning process has met the above criteria. The
permittee must maintain a log of instances when the above
have not been met, and such statement must summarize these
instances.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING
DESCRIPTION
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2013.
Subsequent reports are due every 12 calendar month(s).

**Condition 33: Compliance Certification**
**Effective between the dates of 01/23/2012 and 01/22/2017**

**Applicable Federal Requirement:** 6 NYCRR 227-1.3 (a)

**Item 33.1:**
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

- Emission Unit: R-24101
- Emission Unit: R-24102
- Emission Unit: R-24104
- Emission Unit: R-24105

**Item 33.2:**
Compliance Certification shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL
DEVICE PARAMETERS AS SURROGATE
Monitoring Description:
No owner or operator of a combustion installation shall
emit greater than 20 percent opacity except for one six
minute period per hour, not to exceed 27 percent, based
upon the six minute average in reference test method 9 in
Appendix A of 40 CFR 60.

The owner or operator shall conduct opacity observations
according to 40 CFR Part 60, Appendix A, RM 9 upon request
of the DEC. Results of such testing shall be submitted
to the DEC within 30 days of concluding such tests.
On a semi-annual basis, the owner or operator shall submit to the DEC a report stating whether such testing was conducted and if so, stating the results of such testing.

Parameter Monitored: OPACITY
Upper Permit Limit: 20 percent
Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Averaging Method: 6-MINUTE AVERAGE (METHOD 9)
Reporting Requirements: ONCE / BATCH OR MONITORING OCCURRENCE

**Condition 51:** Compliance Certification
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 6 NYCRR 227-2.4 (d)

**Item 51.1:**
The Compliance Certification activity will be performed for the Facility.

**Item 51.2:**
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
The owner or operator of each small boiler (with a maximum heat input capacity equal to or greater than 1 million Btu/hr but less than 25 million Btu/hr) must perform an annual tune up in accordance with the DEC's DAR-5 guidance document. Records of each tune up must be kept on site for a minimum of 5 years.

Monitoring Frequency: ANNUALLY
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2013.
Subsequent reports are due every 12 calendar month(s).

**Condition 34:** Compliance Certification
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 40CFR 63.6600, Subpart ZZZZ

**Item 34.1:**
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

Emission Unit: R-24104

Emission Unit: R-24105

**Item 34.2:**
Compliance Certification shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE

Monitoring Description:

Pursuant to 40 CFR 63.6600(b) and Table 2b of that regulation, the owner or operator must maintain the catalyst in each engine so that the pressure drop across the catalyst does not change by more than two inches of water at 100 percent load plus or minus 10 percent from the pressure drop across the catalyst that was measured during the initial performance test. The pressure drop must be measured at least once per month.

On a semi-annual basis, the owner or operator shall submit to the DEC a report stating whether he or she has complied with this requirement. Deviations are required to be reported to the DEC as described elsewhere in this permit.

Parameter Monitored: PRESSURE DROP
Upper Permit Limit: 10 percent
Monitoring Frequency: MONTHLY
Averaging Method: RANGE - NOT TO FALL OUTSIDE OF STATED RANGE AT ANY TIME
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2012.
Subsequent reports are due every 6 calendar month(s).

Condition 35: Compliance Certification
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 40CFR 63.6600, Subpart ZZZZ

Item 35.1:
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

Emission Unit: R-24104

Emission Unit: R-24105

Item 35.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE

Monitoring Description:

Pursuant to 40 CFR 63.6600(b) and Table 2b of that regulation, the owner or operator must maintain the temperature of each engine exhaust so that the catalyst
inlet temperature is greater than or equal to 450 degrees F and less than or equal to 1350 degrees F. The averaging period is a rolling four hour period.

On a semi-annual basis, the owner or operator shall submit to the DEC a report stating whether he or she has complied with this requirement. Deviations are required to be reported to the DEC as described elsewhere in this permit.

Parameter Monitored: TEMPERATURE
Lower Permit Limit: 450 degrees Fahrenheit
Upper Permit Limit: 1350 degrees Fahrenheit
Monitoring Frequency: CONTINUOUS
Averaging Method: 4-HOUR ROLLING AVERAGE
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2012.
Subsequent reports are due every 6 calendar month(s).

Condition 36: Compliance Certification
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 40CFR 63.6600, Subpart ZZZZ

Item 36.1:
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

Emission Unit: R-24104

Emission Unit: R-24105

Regulated Contaminant(s):
CAS No: 000630-08-0  CARBON MONOXIDE

Item 36.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: INTERMITTENT EMISSION TESTING
Monitoring Description:
(1) The Caterpillar G3612 engines, Emission Units R24104 and R24105, are subject to the requirements of 40 CFR 63.6600, Table 2a and Table 2b. Emissions of carbon monoxide must be reduced by 93% or more, on a dry volume basis when corrected to 15%O2.

Pursuant to 40 CFR 63.6605, this limit applies at all times except during periods of startup, shutdown or malfunction. The owner or operator must maintain and operate the engines, air pollution control equipment and
monitoring equipment in a manner consistent with safety and good air pollution control practices for minimizing emissions at all times, including during startup, shutdown and malfunction.

(2) Compliance shall be determined through emissions testing using either ASTM D6522-00 (portable analyzers) or 40 CFR Part 60, Appendix A, Methods 3A and 10. The owner or operator must comply with the procedures in 40 CFR 63.6620(a)-(e) and (i).

(3) Pursuant to 40 CFR 63.6610 and 40 CFR 63.7(a)(2), the owner or operator must conduct the initial emissions tests on each engine no later than 180 days after first combusting fuel in such engine. Thereafter, each engine must be tested semi-annually, except as follows: after demonstrating compliance for two consecutive semi-annual tests, the owner or operator may test emissions annually. If the results from any test show non-compliance, the engines must then be tested semi-annually.

(4) Pursuant to 40 CFR 63.7, the owner or operator must notify the EPA and the DEC of his or her intention to conduct each performance test at least 60 days before the performance test is initially scheduled to begin. The owner or operator shall submit to the DEC and the EPA a site-specific test plan at least 60 days before the test is to commence. Results of each test shall be submitted to the DEC and the EPA no later than 60 days after the completion of each performance test.

On an annual basis, the owner or operator shall submit to the DEC a report stating whether he or she complied with this condition. Deviations are required to be reported to the DEC as described elsewhere in this permit.

Parameter Monitored: CARBON MONOXIDE
Upper Permit Limit: 93 percent reduction by volume
Reference Test Method: ASTM D6522-00 or equivalent
Monitoring Frequency: ANNUALLY
Averaging Method: AVERAGING METHOD AS PER REFERENCE TEST METHOD INDICATED
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2013.
Subsequent reports are due every 12 calendar month(s).
Condition 37: Compliance Certification
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 40CFR 63.6602, Subpart ZZZZ

Item 37.1:
The Compliance Certification activity will be performed for the Facility.

Item 37.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: WORK PRACTICE INVOLVING SPECIFIC OPERATIONS
Monitoring Description:
This condition applies to an emergency generator at the site.

The owner or operator must:

1. Change the oil and filter every 500 hours of operation or annually, whichever comes first. Alternatively, the owner or operator shall institute an oil analysis program as described in 40 CFR 63.6625(j).

2. Inspect the spark plugs every 1000 hours or annually, whichever comes first;

3. Inspect all hoses and belts every 500 hours of operation or annually, whichever comes first, and replace as necessary.

4. Operate and maintain, according to the manufacturer's emission-related written instructions or develop a maintenance plan to provide for the maintenance and operation of the engine in a manner consistent with good air pollution control practice for minimizing emissions.

5. Install a non-resettable hour meter.

6. Minimize idle time during startup. Not to exceed 30 minutes for each startup event.

7. There is no time limit on the use of emergency stationary RICE in emergency situations.

8. The owner or operator may operate the emergency stationary RICE for the purpose of maintenance checks and readiness testing, provided that the tests are recommended by Federal, State or local government, the manufacturer, the vendor, or the insurance company associated with the engine. Maintenance checks and readiness testing of such
units is limited to 100 hours per year. The owner or operator may petition the Administrator for approval of additional hours to be used for maintenance checks and readiness testing, but a petition is not required if the owner or operator maintains records indicating that Federal, State, or local standards require maintenance and testing of emergency RICE beyond 100 hours per year.

9. The owner or operator may operate the emergency stationary RICE up to 50 hours per year in non-emergency situations, but those 50 hours are counted towards the 100 hours per year provided for maintenance and testing. The 50 hours per year for non-emergency situations cannot be used for peak shaving or to generate income for a facility to supply power to an electric grid or otherwise supply power as part of a financial arrangement with another entity; except that owners and operators may operate the emergency engine for a maximum of 15 hours per year as part of a demand response program if the regional transmission organization or equivalent balancing authority and transmission operator has determined there are emergency conditions that could lead to a potential electrical blackout, such as unusually low frequency, equipment overload, capacity or energy deficiency, or unacceptable voltage level. The engine may not be operated for more than 30 minutes prior to the time when the emergency condition is expected to occur, and the engine operation must be terminated immediately after the facility is notified that the emergency condition is no longer imminent. The 15 hours per year of demand response operation are counted as part of the 50 hours of operation per year provided for non-emergency situations. The supply of emergency power to another entity or entities pursuant to financial arrangement is not limited by this paragraph (f)(1)(iii), as long as the power provided by the financial arrangement is limited to emergency power.

9. Keep records of maintenance conducted to demonstrate compliance in accordance with 40 CFR 63.6625(e)(2).

10. Keep records of the hours of operation recorded through the non-resettable hour meter and document hours spent for emergency and non-emergency operation.

11. Keep records readily accessible in hard copy or electronic form for at least 5 years.

Work Practice Type: HOURS PER YEAR OPERATION
Upper Permit Limit: 100 hours
Condition 38: Compliance Certification  
Effective between the dates of 01/23/2012 and 01/22/2017  

Applicable Federal Requirement: 40CFR 63.6640, Subpart ZZZZ

Item 38.1:  
The Compliance Certification activity will be performed for the Facility.

Item 38.2:  
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES  
Monitoring Description:
(1) The owner or operator must report each instance in which the emission units did not meet each emission limitation or operating limitation in Tables 2a and 2b. Deviations must be reported according to the requirements in 40 CFR 63.6650. If the catalyst is changed, the values of the operating parameters measured during the initial performance test must be re-established by conducting a performance test (as soon as practical after such change) to demonstrate that the engines are meeting the required emission limitation.

(2) The owner or operator must also report each instance in which an affected engine did not meet the requirements in Table 8 of 40 CFR Part 63, Subpart ZZZZ (listing the General Provisions of 40 CFR Part 63).

(5) On an annual basis, the owner or operator shall submit to the DEC a report stating whether he or she complied with this requirement for the just completed reporting period.

Condition 39: Compliance Certification  
Effective between the dates of 01/23/2012 and 01/22/2017
Applicable Federal Requirement: 40CFR 63.6645, Subpart ZZZZ

Item 39.1:
The Compliance Certification activity will be performed for the Facility.

Item 39.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
MACT NOTIFICATIONS

Both the General Provisions of 40 CFR Part 63 and the regulations under the RICE standard, 40 CFR Part 63 Subpart ZZZZ, have testing and notification requirements. These regulations require that performance tests and continuous monitoring system (CMS) performance evaluations be conducted, and require the owner or operator to submit notifications of the dates when these tests are to be conducted. When the notifications are submitted, site-specific protocols are also required to be submitted. The test results are due 60 days after completion.

(1) Pursuant to 40 CFR 63.9(b)(4)(v), the owner or operator must submit to the DEC and the EPA a notification of the actual date of startup, delivered or postmarked within 15 calendar days of that date.

(2) Pursuant to 40 CFR 63.8(c)(3), all CMS shall be installed, operational, and the data verified either prior to or in conjunction with conducting the performance tests under 40 CFR 63.7.

(3) Pursuant to 40 CFR 63.6645(c) and 40 CFR 63.9(b)(4), the owner or operator must submit an Initial Notification not later than 120 days after becoming subject to 40 CFR Part 63, Subpart ZZZZ.

(4) Pursuant to 40 CFR 63.45(e), 63.7(b)(1) and 63.9(e), the owner or operator must submit to the DEC and the EPA a Notification of Intent to conduct a performance test. Such notification shall be submitted at least 60 days before the performance test is scheduled to begin.

(5) Pursuant to 40 CFR 63.7(b)(2), the owner or operator shall submit to the DEC and the EPA a site specific test plan. Such report shall be submitted no later than 60 days before the performance test is to take place (simultaneously with the Notification of Intent to test).
(6) Pursuant to 40 CFR 63.8(e)(2) and 40 CFR 63.6625(b), the owner or operator shall submit to the DEC and the EPA a notification of the date of the continuous monitoring systems performance evaluation. Such notification shall be submitted no later than 60 days prior to conducting the evaluation.

(7) Pursuant to 40 CFR 63.8(e)(3)(iii), the owner or operator shall submit to the DEC and the EPA a site specific performance evaluation test plan for the continuous monitoring systems at the facility. Such plan shall be submitted at least 60 days before the performance evaluation is to be conducted, simultaneously with the notification.

(8) Pursuant to 40 CFR 63.6645(f) and 63.9, the owner or operator must submit a Notification of Compliance Status as follows:

   (i) For each initial compliance demonstration required in Table 5 of 40 CFR Part 63, Subpart ZZZZ that does not include a performance test, the owner or operator must submit the Notification of Compliance Status before the close of business on the 30th day following the completion of the initial compliance demonstration; and

   (ii) For each initial compliance demonstration required in Table 5 of 40 CFR Part 63, Subpart ZZZZ that includes a performance test conducted according to the requirements in Table 4 to this subpart, the owner or operator must submit the Notification of Compliance Status, including the performance test results, before the close of business on the 60th day following the completion of the performance test according to 40 CFR 63.10(d)(2) and 40 CFR 63.7(g).

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

**Condition 40: Compliance Certification**

Effective between the dates of 01/23/2012 and 01/22/2017

**Applicable Federal Requirement:** 40 CFR 63.6655, Subpart ZZZZ

**Item 40.1:**
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

Emission Unit: R-24104
Emission Unit: R-24105

**Item 40.2:**
Compliance Certification shall include the following monitoring:

**Monitoring Type:** RECORD KEEPING/MAINTENANCE PROCEDURES

**Monitoring Description:**
MACT RECORDS

The owner or operator must keep the following records:

1. A copy of each notification and report that you submitted to comply with this subpart, including all documentation supporting any Initial Notification or Notification of Compliance Status that was submitted, according to the requirement in 40 CFR 63.10(b)(2)(xiv).

2. Records of performance tests and performance evaluations as required in Sec. 63.10(b)(2)(viii).

For each CEMS or CPMS, the owner or operator must keep:

1. Records described in 40 CFR 63.10(b)(2)(vi) through (xi).

2. Previous (i.e., superseded) versions of the performance evaluation plan as required in 40 CFR 63.8(d)(3).

The owner or operator must keep the records of catalyst inlet temperature (four hour rolling averages) and records of the monthly measurement of pressure drop across the catalyst.

On an annual basis, the owner or operator shall submit to the DEC a report stating whether he or she complied with this condition.

**Monitoring Frequency:** AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION

**Reporting Requirements:** ANNUALLY (CALENDAR)

Reports due 30 days after the reporting period.
The initial report is due 1/30/2013.
Subsequent reports are due every 12 calendar month(s).

**** **Emission Unit Level ****

**Condition 41:**
Emission Point Definition By Emission Unit
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 6 NYCRR Subpart 201-6
Item 41.1:
The following emission points are included in this permit for the cited Emission Unit:

Emission Unit: R-24101

Emission Point: R001A
   Height (ft.): 59   Diameter (in.): 36
   NYTMN (km.): 4754.685   NYTME (km.): 408.907   Building: 1

Emission Point: R002A
   Height (ft.): 53   Diameter (in.): 28
   NYTMN (km.): 4754.68   NYTME (km.): 408.913   Building: 1

Item 41.2:
The following emission points are included in this permit for the cited Emission Unit:

Emission Unit: R-24102

Emission Point: R003A
   Height (ft.): 52   Diameter (in.): 54
   NYTMN (km.): 4754.676   NYTME (km.): 408.921   Building: 1

Item 41.3:
The following emission points are included in this permit for the cited Emission Unit:

Emission Unit: R-24104

Emission Point: 24104
   Height (ft.): 55   Diameter (in.): 32
   NYTMN (km.): 4754.673   NYTME (km.): 408.927

Item 41.4:
The following emission points are included in this permit for the cited Emission Unit:

Emission Unit: R-24105

Emission Point: 24105
   Height (ft.): 55   Diameter (in.): 32
   NYTMN (km.): 4754.669   NYTME (km.): 408.934   Building: 1

Condition 42: Process Definition By Emission Unit
   Effective between the dates of 01/23/2012 and 01/22/2017
   Applicable Federal Requirement: 6 NYCRR Subpart 201-6

Item 42.1:
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: R-24101
   Process: RC1   Source Classification Code: 2-02-002-02
   Process Description: Two 3,400 hp Clark TLA-10 reciprocating engines.
Emission Source/Control: 0R01A - Combustion

Emission Source/Control: 0R02A - Combustion

Emission Source/Control: 0R02C - Control
Control Type: CATALYTIC OXIDATION

Item 42.2:
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: R-24102
Process: RC2  Source Classification Code: 2-02-002-02
Process Description:
One 4,500 hp Cooper Bessemer 10W-330C2 Engine. This
device is rated at 4,500 hp at 80 F. The maximum
potential ambient rating is 5,220 hp at 40 F.

Emission Source/Control: 0R03A - Combustion

Item 42.3:
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: R-24104
Process: RC3  Source Classification Code: 2-02-002-54
Process Description:
4 Stroke lean burn internal combustion engine - natural
gas fired

Emission Source/Control: 0R04A - Combustion
Design Capacity: 3,785 horsepower (mechanical)

Emission Source/Control: 0R04C - Control
Control Type: CATALYTIC OXIDATION

Item 42.4:
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: R-24105
Process: RC4  Source Classification Code: 2-02-002-54
Process Description:
4 stroke lean burn internal combustion engine - natural
gas fired

Emission Source/Control: 0R05A - Combustion
Design Capacity: 3,785 horsepower (mechanical)

Condition 43: Emission Unit Permissible Emissions
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 6 NYCRR Subpart 201-7

Item 43.1:
The sum of emissions from all regulated processes specified in this permit for the emission unit cited shall not exceed the following Potential to Emit (PTE) rates for each regulated contaminant:

- **Emission Unit: R-24104**
  - CAS No: 000630-08-0
  - Name: CARBON MONOXIDE
  - PTE(s): 1.6 pounds per hour
  - 14,071 pounds per year

- **Emission Unit: R-24105**
  - CAS No: 000630-08-0
  - Name: CARBON MONOXIDE
  - PTE(s): 1.6 pounds per hour
  - 14,071 pounds per year

- **Emission Unit: R-24104**
  - CAS No: 0NY210-00-0
  - Name: OXIDES OF NITROGEN
  - PTE(s): 4.2 pounds per hour
  - 36,800 pounds per year

- **Emission Unit: R-24105**
  - CAS No: 0NY210-00-0
  - Name: OXIDES OF NITROGEN
  - PTE(s): 4.2 pounds per hour
  - 36,800 pounds per year

- **Emission Unit: R-24104**
  - CAS No: 0NY998-00-0
  - Name: VOC
  - PTE(s): 4.1 pounds per hour
  - 36,183 pounds per year

- **Emission Unit: R-24105**
  - CAS No: 0NY998-00-0
  - Name: VOC
  - PTE(s): 4.1 pounds per hour
  - 36,183 pounds per year

**Condition 44:** Capping Monitoring Condition  
Effective between the dates of 01/23/2012 and 01/22/2017  
Applicable Federal Requirement: 6 NYCRR Subpart 201-7

**Item 44.1:**
Under the authority of 6 NYCRR Part 201-7, this condition contains an emission cap for the purpose of limiting emissions from the facility, emission unit or process to avoid being subject to the following applicable requirement(s) that the facility, emission unit or process would otherwise be subject to:

40 CFR 52.21

**Item 44.2:**
Operation of this facility shall take place in accordance with the approved criteria, emission limits, terms, conditions and standards in this permit.

**Item 44.3:**
The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or law.

**Item 44.4:**
On an annual basis, unless otherwise specified below, beginning one year after the granting of an emissions cap, the responsible official shall provide a certification to the Department that the facility has operated all emission units within the limits imposed by the emission cap. This certification shall include a brief summary of the emissions subject to the cap for that time period and a comparison to the threshold levels that would require compliance with an applicable requirement.

**Item 44.5:**
The emission of pollutants that exceed the applicability thresholds for an applicable requirement, for which the facility has obtained an emissions cap, constitutes a violation of Part 201 and of the Act.

**Item 44.6:**
The Compliance Certification activity will be performed for:

- **Emission Unit:** R-24102
- **Regulated Contaminant(s):**
  - CAS No: 0NY210-00-0 OXIDES OF NITROGEN

**Item 44.7:**
Compliance Certification shall include the following monitoring:

- **Capping:** Yes
- **Monitoring Type:** WORK PRACTICE INVOLVING SPECIFIC OPERATIONS
- **Monitoring Description:**
  In order to avoid PSD, the operation of Unit 3A shall not exceed 8040 hours of operation per year, based on a 12 month rolling average. The facility must record and update daily the 12 month rolling total hours of operation. These records must be made available upon request by the DEC.
On a semiannual basis, the owners or operators must submit to the DEC a report stating whether such monitoring was conducted.

On an annual basis, the applicant must state whether it has complied with this requirement. Additionally, in the event that the engine is operated in excess of 8040 hours in any 12 month period, the owners or operators must submit to the DEC a report stating such occurrence within 48 hours of exceeding that limit.

Work Practice Type: HOURS PER YEAR OPERATION  
Upper Permit Limit: 8040  hours per year  
Monitoring Frequency: DAILY  
Averaging Method: ANNUAL MAXIMUM ROLLED DAILY  
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)  
Reports due 30 days after the reporting period.  
The initial report is due 7/30/2012.  
Subsequent reports are due every 6 calendar month(s).

Condition 45:  
Compliance Certification  
Effective between the dates of  01/23/2012 and 01/22/2017  

Applicable Federal Requirement:6 NYCRR Subpart 202-1

Item 45.1:  
The Compliance Certification activity will be performed for:  

Emission Unit: R-24102

Item 45.2:  
Compliance Certification shall include the following monitoring:  

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES  
Monitoring Description:  
No later than 60 days after commencement of operation post replacement of the engine components described herein and in the permit application submitted May 14, 2010, the owner or operator shall conduct formaldehyde emissions testing on the Cooper Bessemor, Emission Unit R-24102. The test shall be conducted in accordance with methods approved by the DEC in accordance with the time frames specified in 6 NYCRR 202-1.

No later than 60 days after completing the emissions tests, the owner or operator shall submit to the DEC the results of testing.

Not later than 90 days after commencement of operation, the owner or operator shall conduct an inspection of the engine and review its operation from a reliability
perspective. In the event that TGP determines the replaced components impart adverse impacts on the reliability, physical integrity of the engines and/or unacceptable emissions, TGP will restore the engine back to the pre-project configuration no later than April 30, 2011. TGP will provide to the DEC notification of such event within 30 days after the restoration.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION

Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 46: Compliance Certification
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable Federal Requirement: 40CFR 52.21, Subpart A

Item 46.1:
The Compliance Certification activity will be performed for:

Emission Unit: R-24102

Regulated Contaminant(s):
CAS No: 0NY210-00-0 OXIDES OF NITROGEN

Item 46.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: INTERMITTENT EMISSION TESTING
Monitoring Description:
Compliance Testing

The owners or operators must not allow the operation of Unit 3A to emit oxides of nitrogen in excess of 1.0 gram per brake horsepower-hour.

Compliance shall be determined using 40 CFR Part 60, Appendix A, Method 7E. Testing shall be conducted in accordance with a protocol approved by the DEC. Submission of the protocol and the final test report shall be in accordance with 6 NYCRR 202-1. The protocol shall be submitted at least 30 days prior to conducting the tests and the final report is due within 60 days of completion of such tests.

Testing shall be conducted once per permit term and at any other time upon written notification from the DEC.

On an annual basis, the owners or operators shall submit to the DEC a report stating whether any testing has been
conducted, and if so, the results of such testing.

Upper Permit Limit: 1.0 grams per brake horsepower-hour
Reference Test Method: EPA Method 7E
Monitoring Frequency: ONCE DURING THE TERM OF THE PERMIT
Averaging Method: 1 HOUR MAXIMUM - NOT TO BE EXCEEDED AT ANY TIME
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2013.
Subsequent reports are due every 12 calendar month(s).
STATE ONLY ENFORCEABLE CONDITIONS

**** Facility Level ****

NOTIFICATION OF GENERAL PERMITTEE OBLIGATIONS
This section contains terms and conditions which are not federally enforceable. Permittees may also have other obligations under regulations of general applicability

Item A: General Provisions for State Enforceable Permit Terms and Condition - 6 NYCRR Part 201-5
Any person who owns and/or operates stationary sources shall operate and maintain all emission units and any required emission control devices in compliance with all applicable Parts of this Chapter and existing laws, and shall operate the facility in accordance with all criteria, emission limits, terms, conditions, and standards in this permit. Failure of such person to properly operate and maintain the effectiveness of such emission units and emission control devices may be sufficient reason for the Department to revoke or deny a permit.

The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or law.

STATE ONLY APPLICABLE REQUIREMENTS
The following conditions are state applicable requirements and are not subject to compliance certification requirements unless otherwise noted or required under 6 NYCRR Part 201.

Condition 47: Contaminant List
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable State Requirement:ECL 19-0301

Item 47.1: Emissions of the following contaminants are subject to contaminant specific requirements in this permit(emission limits, control requirements or compliance monitoring conditions).

CAS No: 000050-00-0
Name: FORMALDEHYDE
CAS No: 000630-08-0  
Name: CARBON MONOXIDE

CAS No: 0NY210-00-0  
Name: OXIDES OF NITROGEN

CAS No: 0NY998-00-0  
Name: VOC

Condition 48:  Unavoidable noncompliance and violations  
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable State Requirement: 6 NYCRR 201-1.4

Item 48.1:  
At the discretion of the commissioner a violation of any applicable emission standard for necessary scheduled equipment maintenance, start-up/shutdown conditions and malfunctions or upsets may be excused if such violations are unavoidable. The following actions and recordkeeping and reporting requirements must be adhered to in such circumstances.

(a) The facility owner and/or operator shall compile and maintain records of all equipment maintenance or start-up/shutdown activities when they can be expected to result in an exceedance of any applicable emission standard, and shall submit a report of such activities to the commissioner's representative when requested to do so in writing or when so required by a condition of a permit issued for the corresponding air contamination source except where conditions elsewhere in this permit which contain more stringent reporting and notification provisions for an applicable requirement, in which case they supercede those stated here. Such reports shall describe why the violation was unavoidable and shall include the time, frequency and duration of the maintenance and/or start-up/shutdown activities and the identification of air contaminants, and the estimated emission rates. If a facility owner and/or operator is subject to continuous stack monitoring and quarterly reporting requirements, he need not submit reports for equipment maintenance or start-up/shutdown for the facility to the commissioner's representative.

(b) In the event that emissions of air contaminants in excess of any emission standard in 6 NYCRR Chapter III Subchapter A occur due to a malfunction, the facility owner and/or operator shall report such malfunction by telephone to the commissioner's representative as soon as possible during normal working hours, but in any event not later than two working days after becoming aware that the malfunction occurred. Within 30 days thereafter, when requested in writing by the commissioner's representative, the facility owner and/or operator shall submit a written report to the commissioner's representative describing the malfunction, the corrective action taken, identification of air contaminants, and an estimate of the emission rates. These reporting requirements are superceded by conditions elsewhere in this permit which contain reporting and notification provisions for applicable requirements more stringent than those above.

(c) The Department may also require the owner and/or operator to include in reports described under (a) and (b) above an estimate of the maximum ground level concentration of each air contaminant emitted and the effect of such emissions depending on the deviation of the malfunction and the air contaminants emitted.

(d) In the event of maintenance, start-up/shutdown or malfunction conditions which...
result in emissions exceeding any applicable emission standard, the facility owner and/or operator shall take appropriate action to prevent emissions which will result in contravention of any applicable ambient air quality standard. Reasonably available control technology, as determined by the commissioner, shall be applied during any maintenance, start-up/shutdown or malfunction condition subject to this paragraph.

(e) In order to have a violation of a federal regulation (such as a new source performance standard or national emissions standard for hazardous air pollutants) excused, the specific federal regulation must provide for an affirmative defense during start-up, shutdowns, malfunctions or upsets.

**Condition 49: Unavoidable noncompliance and violations**

**Effective between the dates of 01/23/2012 and 01/22/2017**

**Applicable State Requirement:** 6 NYCRR 201-1.4

**Item 49.1:**

At the discretion of the commissioner a violation of any applicable emission standard for necessary scheduled equipment maintenance, start-up/shutdown conditions and malfunctions or upsets may be excused if such violations are unavoidable. The following actions and recordkeeping and reporting requirements must be adhered to in such circumstances.

(a) The facility owner and/or operator shall compile and maintain records of all equipment maintenance or start-up/shutdown activities when they can be expected to result in an exceedance of any applicable emission standard, and shall submit a report of such activities to the commissioner's representative when requested to do so in writing or when so required by a condition of a permit issued for the corresponding air contamination source except where conditions elsewhere in this permit which contain more stringent reporting and notification provisions for an applicable requirement, in which case they supersede those stated here. Such reports shall describe why the violation was unavoidable and shall include the time, frequency and duration of the maintenance and/or start-up/shutdown activities and the identification of air contaminants, and the estimated emission rates. If a facility owner and/or operator is subject to continuous stack monitoring and quarterly reporting requirements, he need not submit reports for equipment maintenance or start-up/shutdown for the facility to the commissioner's representative.

(b) In the event that emissions of air contaminants in excess of any emission standard in 6 NYCRR Chapter III Subchapter A occur due to a malfunction, the facility owner and/or operator shall report such malfunction by telephone to the commissioner's representative as soon as possible during normal working hours, but in any event not later than two working days after becoming aware that the malfunction occurred. Within 30 days thereafter, when requested in writing by the commissioner's representative, the facility owner and/or operator shall submit a written report to the commissioner's representative describing the malfunction, the corrective action taken, identification of air contaminants, and an estimate of the emission rates. These reporting requirements are superseded by conditions elsewhere in this permit which contain reporting and notification provisions for applicable requirements more stringent than those above.

(c) The Department may also require the owner and/or operator to include in reports described under (a) and (b) above an estimate of the maximum ground level concentration of each air contaminant emitted and the effect of such emissions depending on the deviation of the malfunction and the air contaminants emitted.
(d) In the event of maintenance, start-up/shutdown or malfunction conditions which result in emissions exceeding any applicable emission standard, the facility owner and/or operator shall take appropriate action to prevent emissions which will result in contravention of any applicable ambient air quality standard. Reasonably available control technology, as determined by the commissioner, shall be applied during any maintenance, start-up/shutdown or malfunction condition subject to this paragraph.

(e) In order to have a violation of a federal regulation (such as a new source performance standard or national emissions standard for hazardous air pollutants) excused, the specific federal regulation must provide for an affirmative defense during start-up, shutdowns, malfunctions or upsets.

Condition 50: Visible Emissions Limited
Effective between the dates of 01/23/2012 and 01/22/2017

Applicable State Requirement: 6 NYCRR 211.2

Item 50.1:
Except as permitted by a specific part of this Subchapter and for open fires for which a restricted burning permit has been issued, no person shall cause or allow any air contamination source to emit any material having an opacity equal to or greater than 20 percent (six minute average) except for one continuous six-minute period per hour of not more than 57 percent opacity.
