

Every Tree Counts!

New York State launched the 25 Million Trees by 2033 initiative to recognize the importance of trees and forests for climate mitigation and community health.

Help us meet our tree planting goal! If you've planted a tree since January 1, 2024, scan the QR code to enter it into the Tree Tracker.

For more information, visit on.ny.gov/25milliontrees.

Tree Planting Tips

- ✓ Make sure your planting site has the soil and light conditions suitable for your tree and can accommodate the tree's mature size and shape.
- ✓ Dig a hole that's the same depth as the roots and two to three times wider.
- ✓ Consider using a tree tube or fencing to protect your tree from browsing wildlife.
- ✓ Apply mulch around the base to help retain moisture. Avoid creating a mulch volcano—don't pile the mulch against the trunk.
